100 Years of Christian Medical College, Vellore

Women in Science and Technology: Confronting Inequalities comprehensively explores women's status in the Science and Technology (S&T) domain by rigorously analysing and interpreting extensive recent information on major areas such as engineering, medicine, physical sciences, biosciences and mathematics. The book forcefully

demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and opportunities for advancement. The book makes substantive recommendations for policy measures on college admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.

The United States and India have pledged to deepen the linkages between their people, their businesses, and their governments for the mutual benefit of both countries and for the promotion of global peace, stability, economic growth and prosperity. Both nations are now inclined to improve relations and cooperation, but the nations need specific actions that will yield progress and build confidence and momentum for further cooperation. The Indo-U.S. Workshop on Challenges of Emerging Infections and Global Health Safety, held in November 2014, encouraged scientists from both countries to examine global issues related to emerging and existing infections and global health

safety, to share experience and approaches, and to identify opportunities for cooperation to improve practice and research in these areas. This report summarizes the presentations and discussions from the workshop.

An authoritative, comprehensive, and accessible cardiology textbook that caters to the needs of trainees and practicing cardiologists. Cardiovascular disease is now the largest contributor to global mortality. Low and middle income countries. (Lmics) presently bear the brunt of this global epidemic, accounting for over three quarters of cardiovascular deaths and 90% of these deaths under 70 years of age. The experience and expertise of health professionals in these countries will therefore be the principal determinant of global success in countering and curbing the global cardiovascular epidemic in the coming decades. This book covers the fundamentals of cardiology in depth, to provide conceptual clarity, and delves into specific cardiovascular disorders with detailed descriptions that range from aetiology and pathophysiology to evidence informed approaches to diagnosis and management. It does all of this by blending contextual relevance with uncompromising academic rigor.

Equity and Access attempts to unravel the complex narrative of why inequities in the health sector are growing and access to basic health care is worsening, and the underlying forces that contribute to this situation. It draws attention to the way globalization has influenced India's development trajectory as healthcare issues have assumed significant socio-economic and political significance in contemporary India.

The volume explains how state and market forces have progressively heightened the iniquitous health care system and the process through which substantial burden of meeting health care needs has fallen on the individual households. Twenty-eight scholars comprising social scientists, medical experts, public health experts, policy makers, health activists, legal experts, and gender specialists have delved into the politics of access for different classes, castes, gender, and other categories to contribute to a new field 'health care studies' in this volume. Adopting an interdisciplinary approach within a broader political-economy framework, the volume is useful for understanding power relations within social groups and complex organizational systems.

Educating the Global Workforce for Public HealthFrontiers Media SA

This book on and signs and symptoms, which is indexed in alphabetical order from which the physician will be able to weave a clinical narrative, anatomically and pathophysiologically explicit, to form the accurate diagnostic hypotheses. It is compact, handy and bedside clinical companion book for all dedicated healthcare professionals who are committed to evaluate the patient accurately on the basis of signs and the symptoms. Seeking to extend existing scholarship on gender and colonialism and on women and

American religion, this cross-cultural study examines the work of American missionary women in South Asia at several levels. A primary concern of the study is to historicize the interventions of these women and situate them within the dual contexts of the sending society and the receiving culture. It focuses on missionaries Isabella Thoburn and Ida Scudder, who founded some of the premier women's colleges and hospitals in British colonial India. The book also draws upon the narratives and reminiscences of South Asian women, now in their seventies, who attended such institutions in the 1940s, and whose voices texture our understanding of American women's missionary work in "Other" cultures.

"There are more things in heaven and earth than are dreamt of ..." Who could have predicted how the life of a runaway street child would turn out to be? An amazing story of the transformation of a footloose wayward boy into a responsible member of society ... Bhakter Solomon was brought back home from the streets, and literally pushed into going back to school, and then to college. This is his real life story, covering nearly six decades. It is nothing but God's amazing grace, that this one-time vagabond has turned into a devout believer, who has dedicated his life to the service of the marginalised. He believes that it is part of God's grand plan to mould him as His own instrument, to execute His mandate, that he was tempted to run away as a child and be exposed to life on the streets ...

For every story of optimism about the growth of medical tourism to India, there are multiple others about medical neglect. Scratch the surface and you find a thick layer of corruption in this life-sustaining sector. This hard-hitting volume shows a mirror to society and, more specifically, to those associated with the health sector—on how healers, in many cases, are shifting shape to becoming predators. In the essays by contributors from within and outside the medical

fraternity, we see the many faces, the many facets of corruption—from exorbitant billing by corporate hospitals to the non-merit-based selection in medical colleges to questionable motives playing strong in the area of organ transplantation. *But Healers or Predators?* is not only about the illness affecting the sector. It also offers solutions, and some stories of hope. The Foreword by Amartya Sen is an added bonus. ‘This splendid, if depressing, book will do a lot to remedy [the] momentous neglect [of healthcare]. We have excellent reasons to be grateful to the authors and editors of this important collection of investigative studies.’—Amartya Sen

This book provides a comprehensive overview on the clinical issues and biology of acute promyelocytic leukemia (APL) and on the molecular mechanisms of targeted therapy with ATRA and ATO. The text covers major topics such as the pathophysiology of APL coagulopathy, biologic and clinical differences between children and adults with APL, and the role of minimal residual disease monitoring. Additionally, the book summarizes historical, current, and future treatment strategies in both adults and children, while highlighting the most recent therapeutic recommendations for relapsed disease and the evolving indications for autologous and allogeneic stem cell transplant. This volume also features chapters focusing on secondary APL and therapy, late effects, rare presentations such as APL in the elderly and during pregnancy, and rare APL variants that may represent therapeutic challenges. Written by top experts in the field, *Acute Promyelocytic Leukemia: A Clinical Guide* is a valuable resource for clinicians and researchers who treat and investigate this disease in children and adults. *Competition Science Vision* (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance

provides the various important people, event, issue and ideas of latest times. Good quality management of the health system demands a critical mass of health professionals with sound technical knowledge. The education that produces a workforce of appropriate size and skills is often a challenge in the delivery of quality health services. Incidentally, health professionals' education has not kept pace with the new emerging challenges. Recent globalization of health has further led to international migration of health professionals, thereby leading to cross-border recognition of health workers with an appropriate skill-mix, knowledge, and competence. The Lancet Commission Report of 2010 highlighted the need to develop a common strategy at a global level for postgraduate medical, nursing, and public health education that reaches beyond the confines of national borders and the silos of individual professions. This vision would require a series of instructional and institutional reforms, which should be guided by two proposed outcomes: transformative learning and interdependence in education. The purpose of this Research Topic is to increase the shared understanding of the current status of the education of the health workforce around the globe, particularly those working in the public health sector. With this foundation, further research and evaluation studies can then be done with a perspective that addresses global workforce issues impacting access, prevention, and care.

mHealth: From Smartphone to Smart Systems provides a high level and comprehensive survey of the emergence of mobile technology healthcare. This book looks beyond the already-popular devices and apps associated with mHealth, exploring the major role this technology could play as healthcare steers inexorably toward an architecture

This book aims to provide condensed and crystallised knowledge, providing the rationale for investigations and interventions. Emergency medicine is a specialty where time and knowledge are critical factors in deciding appropriate management which could otherwise result in loss of life or limb. The challenge often is to have lucid management plans, whilst standing at the bedside of the patient. In order to address this challenge, a manuscript is needed which aims to enhance the clinical skills of the emergency physician. The objective of this book is to compile a road map for practitioners of emergency medicine, which would guide them through algorithm-based pathways. This format is distinctive by nature for its concise presentation, which facilitates easy reading and early application. Written by global experts, this book aims to be a truly international representation of emergency physicians who have come together to deliver contemporary concepts in emergency patient care.

Career planning has become a survival skill in today's world. Choosing a Career should be by Choice and not by Chance. But HOW TO CHOOSE THE RIGHT CAREER? What are the factors one should consider while choosing a career? A Complete Guide to Career Planning is about how to decide the direction your

career will take. The purpose behind writing this book is to make you conversant with the various career options that you can pursue and enable you to select the right career you most fit in. The author has meticulously explored and mapped the cavernous paths of the globe of careers, which exist presently. The book provides a straightforward introduction to the concepts of career choices and the importance of planning. It emphasises the importance of self-exploration by empowering readers to look at themselves, their strengths and weaknesses, and their background and values, and then realistically evaluate the various opportunities in the world of career. With this comprehensive guide a student can learn how to explore career options, plan a career path, and find the right school and colleges for higher studies that will help him achieve his goals easily and convincingly. The book includes all the information you need to plan your future and take control of your career.
