When the Storm Comes Linda Ashman,2020-05-26 A storm and its sunny aftermath come to life through gorgeous art and lyrical text. What do you do when the clouds roll in, When the wind chimes clang and the weather vanes spin? When stormy skies threaten, people stock up on supplies, bring in their outside toys, and check the news for updates. And during the storm, if the power goes out, they can play games and tell stories by candlelight. But what do animals do? They watch and listen, look for a cozy den or some other sheltered spot, and hunker down to wait. After the storm, while the people are cleaning up their yards, making repairs, and checking on the neighbors, the animals emerge from their hiding places and shake off the rain. And everyone is happy to be out in the sunshine again, grateful for better weather and the company of friends.

The Last Dogs: Dark Waters Christopher Holt,2013-06-11 When canine heroes Max, Rocky, and Gizmo encounter a lavish riverboat moored close to shore, they're wary of what they might find on board. But as they're welcomed by a friendly community of dogs, the trio discover that there's more to their new world than they expected. These dogs have seen humans -- who Max, Rocky, and Gizmo thought had disappeared without a trace. The brave companions meet new friends and encounter old enemies in their search for their people, traveling to places they never imagined -- from a high-speed monorail to a zoo filled with exotic animals. Max, Rocky, and Gizmo uncover secrets that promise to change their lives forever as they draw closer to figuring out why the humans left and being reunited with their families. The Last Dogs: Dark Waters is the second book in a thrilling series about three friends on a journey to find their people -- and bring them home.

The Last Dogs: The Long Road Christopher Holt,2013-11-05 A science experiment gone horribly awry has granted Max, Rocky, and Gizmo the unique ability to read and understand human words. Armed with this know-how, they continue to journey south, on the lookout for beacons planted by a trusted friend's owner -- beacons that promise to lead the trio to their people. When the companions reach the ocean's edge, they find a free-spirited beachfront community. Reunited with long-lost friends (and introduced to a new delicacy -- cat kibble), Max, Rocky, and Gizmo gain the motivation they need to keep going. But danger lies ahead. . . . As their travels take them deep into the spooky swampland, can they discover what's driven the humans away? Or have they finally reached the end of the long road? The Last Dogs: The Long Road is the third book in a thrilling series about three unlikely friends on an epic quest to find their people -- and bring them home.

Becoming Animal David Abram, 2011-09-06 David Abram's first book, The Spell of the Sensuous has become a classic of environmental literature. Now he returns with a startling exploration of our human entanglement with the rest of nature. As the climate veers toward catastrophe, the innumerable losses cascading through the biosphere make vividly evident the need for a metamorphosis in our relation to the living land. For too long we've ignored the wild intelligence of our bodies, taking our primary truths from technologies that hold the living world at a distance. Abram's writing subverts this distance, drawing readers ever closer to their animal senses in order to explore, from within, the elemental kinship between the human body

and the breathing Earth. The shape-shifting of ravens, the erotic nature of gravity, the eloquence of thunder, the pleasures of being edible: all have their place in this book.

Irrational Man William Barrett, 2011-01-26 Widely recognized as the finest definition of existentialist philosophy ever written, this book introduced existentialism to America in 1958. Barrett speaks eloquently and directly to concerns of the 1990s: a period when the irrational and the absurd are no better integrated than before and when humankind is in even greater danger of destroying its existence without ever understanding the meaning of its existence. *Irrational Man* begins by discussing the roots of existentialism in the art and thinking of Augustine, Aquinas, Pascal, Baudelaire, Blake, Dostoevski, Tolstoy, Hemingway, Picasso, Joyce, and Beckett. The heart of the book explains the views of the foremost existentialists—Kierkegaard, Nietzsche, Heidegger, and Sartre. The result is a marvelously lucid definition of existentialism and a brilliant interpretation of its impact.

The Greyfriar Clay Griffith, Susan Griffith, 2010-11 This is the first book in a trilogy of high adventure and alternate history. Using Research and Reason in Education Paula J. Stanovich, Keith E. Stanovich, 2003 As professionals, teachers can become more effective and powerful by developing the skills to recognize scientifically based practice and, when the evidence is not available, use some basic research concepts to draw conclusions on their own. This paper offers a primer for those skills that will allow teachers to become independent evaluators of educational research.

Converging Technologies for Improving Human Performance Mihail C. Roco, William Sims Bainbridge, 2013-04-17 M. C. Roco and W.S. Bainbridge In the early decades of the 21st century, concentrated efforts can unify science based on the unity of nature, thereby advancing the combination of nanotechnology, biotechnology, information technology, and new technologies based in cognitive science. With proper attention to ethical issues and societal needs, converging in human abilities, societal technologies could achieve a tremendous improvement outcomes, the nation's productivity, and the quality of life. This is a broad, cross cutting, emerging and timely opportunity of interest to individuals, society and humanity in the long term. The phrase convergent technologies refers to the synergistic combination of four major NBIC (nano-bio-info-cogno) provinces of science and technology, each of which is currently progressing at a rapid rate: (a) nanoscience and nanotechnology; (b) biotechnology and biomedicine, including genetic engineering; (c) information technology, including advanced computing and communications; (d) cognitive science, including cognitive neuroscience. Timely and Broad Opportunity. Convergence of diverse technologies is based on material unity at the nanoscale and on technology integration from that scale.

Based on the authors' experiences and extensive research, The Responsive City explores topics including: Building trust in the public sector and fostering a sustained, collective voice among communities; Using data-smart governance to preempt and predict problems while improving quality of life; Creating efficiencies and saving taxpayer money with digital tools; and Spearheading these new approaches to government with innovative leadership.

Salt Sugar Fat Michael Moss, 2013-02-26 From a Pulitzer Prize-winning investigative reporter at The New York Times comes the troubling story of the rise of the processed food industry -- and how it used salt, sugar, and fat to addict us. Salt Sugar Fat is a journey into the highly secretive world of the processed food giants, and the story of how they have deployed these three essential ingredients, over the past five decades, to dominate the North American diet. This is an eye-opening book that demonstrates how the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). Salt Sugar Fat is the story of how we got here, and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, Enough already.

Information Arts Stephen Wilson, 2003-02-28 An introduction to the work and ideas of artists who use—and even influence—science and technology. A new breed of contemporary artist engages science and technology—not just to adopt the vocabulary and gizmos, but to explore and comment on the content, agendas, and possibilities. Indeed, proposes Stephen Wilson, the role of the artist is not only to interpret and to spread scientific knowledge, but to be an active partner in determining the direction of research. Years ago, C. P. Snow wrote about the two cultures of science and the humanities; these developments may finally help to change the outlook of those who view science and technology as separate from the general culture. In this rich compendium, Wilson offers the first comprehensive survey of international artists who incorporate concepts and research from mathematics, the physical sciences, biology, kinetics, telecommunications, and experimental digital systems such as artificial intelligence and ubiquitous computing. In addition to visual documentation and statements by the artists, Wilson examines relevant art-theoretical writings and explores emerging scientific and technological research likely to be culturally significant in the future. He also provides lists of resources including organizations, publications, conferences, museums, research centers, and Web sites.
