A thorough immersion in the art of botanical drawing, this book is sure to attract both aspiring and more experienced artists seeking scientific accuracy and the illusion of 3-dimension in their botanical artwork.

For more than 200 years the world has accepted that red, yellow and blue - the artists primaries - give new colours when mixed. And for more than 200 years artists have been struggling to mix colours on this basis. In this exciting new book, Michael Wilcox offers a total reassessment of the principles underlying colour mixing. It is the first major break-away from the traditional and limited concepts that have caused painters and others who work with colour so many problems. Back Cover.

Get a feel for your art—literally! 101 Textures in Colored Pencil teaches you every technique you'll need to give your colored-pencil drawings realistic, palpable texture. There has never been a better opportunity to master textures. Knowing how to make your surfaces and textures look real is one of the most challenging aspects of creating art in colored pencil, even for experienced artists. 101 Textures in Colored Pencil provides artists with step-by-step instructions for drawing a wide variety of the most common textures and surfaces, including sand, water, metals, foliage, wood, fabrics, stone, grass, hair, and many more. To get you started, this comprehensive guide opens with a review of tools and materials as well as basic skills, such as strokes, effects, and color mixing. Each page of instruction is a comprehensive resource on how to create a specific texture, complete with two to three easy-to-follow steps and a final, detailed image of the finished artwork. Plus, the book is organized into sections based on subject matter, so you can easily find the specific texture you're looking for. An artist's gallery in the back of the book provides examples of the textures in completed works of art. Just a sample of the textures you will learn to render: People: smooth skin; aged skin; straight, curly, and wavy hair; lips Animals & Insects: smooth, curly, and coarse canine fur; elephant skin; feather; fish scales Fabrics & Textiles: burlap, tweed, silk, velvet, leather, lace, sequins Glass, Stone, Ceramics, Wood & Metal: porcelain, polished silver, hammered brass, peeling paint Food & Beverage: red wine, cut citrus fruit, coconut, peach, dark chocolate Nature: smooth and rough bark, moss, river pebbles, still and rippled lake, clouds 101 Textures in Colored Pencil includes all the textures you need to create realistic masterpieces in colored pencil.

Many people who bought colored pencils during the adult coloring book craze are now looking to learn new ways to be creative with them. In Mastering Colored Pencil, artist and colored pencil evangelist Lisa Dinhofer presents everything artists need to know about traditional and contemporary drawing techniques, materials, and color theory in order to master this versatile medium. Colored pencils, an inexpensive, easy to use, and mobile medium, are coming of age. More and more artists are discovering the incredible qualities of drawing with colored pencils. The wide variety of vibrant color choices among the major manufacturers seems endless. At a recent count, there are more than fifty different reds in the colored pencil spectrum of Prismacolor, Faber-Castell, and Derwent. The base of the pencils vary as well: wax, watercolor, pastel, and graphite. These can be interchanged or mixed together. The effects that can be achieved are limitless. A work in pencil can be a drawing, a watercolor, or an oil painting. A wax pencil can sketch, can draw, can paint. A watercolor pencil can do the same. The drawing can be transparent as a loose wash or as dense as an oil on canvas. Artists can work as small as a postage stamp or as large as a wall. Mastering Colored Pencil is illustrated throughout with Dinhofer's fresh and sophisticated artwork and includes more than twenty-five step-by-step demonstrations, thoughtful exercises, workbook templates, and specific assignments that are sure to help every artist achieve striking results with pencils. A special exhibition section includes work, technique descriptions, and insights from seven additional contemporary artists.

A Gray Scale Color Chart to track your favorite colored pencils! It is so easy to use! There are two sides of rectangle block columns on a page for your favorite coloring pencils, with lines beside them to add your pencil numbers and color names to identify and organize. One column has plain white rectangles for shading your pencils in. Next

to it are blocks with dark, mid and light tone gray scale. For best comprehension add same color pencil number to both white and gray tone blocks before going on to a new color. I use the gray scale models to help me choose which pencils works best for defined shading, a darker area in a picture. Why? It helps me get the definition I normally can't achieve unless I color blend several layers together. As an artist I have conditioned my mind to see gray neutral tones in my layers to get the shadows and shapes needed in my composition. Deciding whether to purchase a gray scale coloring book, can be difficult for some people. We are so used to a white canvas to work on. To tell you the truth, I prefer coloring in a gray scale tone myself. I have created this color chart to get you started in this direction. Easy peasy! All you need to do is add the pencil in a block. I added the heavier color on top, then mid to light in order below in each rectangle shape. I recommend my coloring books to get you started on your exploration and developing your artistry skill of coloring to another level! They will guide you with color suggestions for each coloring image, with a color chart for you to use on each page.

IMPORTANT: watercolor and marker pages have black-backed pages to minimize bleed-through. The paper in this book (depending on where it was printed) is fairly tough, but obviously thinner than watercolor paper. Colors can look splotchy until completely dry. We recommend using a sheet of card stock or plastic to help protect the pages underneath from colors bleeding through as well as potential rub-through of pencil pigments while swatching. You can make PERSONAL COPIES of the charts you plan to use onto your favorite paper or card stock if the paper in this book feels too thin for your needs, or, if you just want to put those pages of the charts you are using into a ring binder for safe keeping. You can also deconstruct this book for ease of use, so feel free to take it apart, keep the pages you are using in one binder, and store the rest in case you need them later. Many office supply stores (and FedEx service centers) will remove the spine and even spiral-bind or punch holes in the book for you for a small fee. If you choose to do it yourself, I have a step-by-step tutorial using another book (Creative Companion Book Binding DIY) on my blog at rubycharmcolors.com. Or keep it as is--the choice is yours! It is meant to be a book that grows along with you and your artistic needs! Happy color swatching!
