In the wake of the violent labor disputes in Colorado's two-year Coalfield War, a young woman and single mother resolved in 1916 to change the status quo for "girls," as well-to-do women in Denver referred to their hired help. Her name was Jane Street, and this compelling biography is the first to chronicle her defiant efforts—and devastating misfortunes—as a leader of the so-called housemaid rebellion. A native of Indiana, Jane Street (1887–1966) began her activist endeavors as an organizer for the Industrial Workers of the World (IWW). In riveting detail, author Jane Little Botkin recounts Street's attempts to orchestrate a domestic mutiny against Denver's elitist Capitol Hill women, including wives of the state's national guard officers and Colorado Fuel and Iron operators. It did not take long for the housemaid rebellion to make local and national news. Despite the IWW's initial support of the housemaids' fight for fairness and better pay, Street soon found herself engaged in a gender war, the target of sexism

within the very organization she worked so hard to support. The abuses she suffered ranged from sabotage and betrayal to arrests and abandonment. After the United States entered World War I and the first Red Scare arose, Street's battle to balance motherhood and labor organizing began to take its toll. Legal troubles, broken relationships, and poverty threatened her very existence. In previous western labor and women's studies accounts, Jane Street has figured only marginally, credited in passing as the founder of a housemaids' union. To unearth the rich detail of her story, Botkin has combed through case histories, family archives, and—perhaps most significant—Street's own writings, which express her greatest joys, her deepest sorrows, and her unfortunate dealings with systematic injustice. Setting Jane's story within the wider context of early-twentieth-century class struggles and the women's suffrage movement, *The Girl Who Dared to Defy* paints a fascinating—and ultimately heartbreaking—portrait of one woman's courageous fight for equality.

Nothing can change the terrible facts of the Sand Creek Massacre. The human toll of this horrific event and the ensuing loss of a way of life have never been fully recounted until now. In *Sand Creek and the Tragic End of a Lifeway*, Louis Kraft tells this story, drawing on the words and actions of those who participated in the events at this critical time. The history that culminated in the end of a lifeway begins with the arrival of Algonquin-speaking peoples in North America, proceeds through the emergence of the Cheyennes and Arapahos on the Central Plains, and ends with the incursion of white people seeking land and gold. Beginning in the earliest days of the Southern Cheyennes, Kraft brings the voices of the past to bear on the events leading to the brutal murder of people and its disastrous aftermath. Through their testimony and their deeds as reported by contemporaries, major and supporting players give us a broad and nuanced view of the discovery of gold on Cheyenne and Arapaho land in the 1850s, followed by the land theft condoned by the U.S. government. The peace treaties and perfidy, the unfolding massacre and the investigations that followed, the devastating end of the Indians' already-circumscribed freedom—all are revealed through the eyes of government officials, newspapers, and the military; Cheyennes and Arapahos who sought peace with or who fought Anglo-Americans; whites and Indians who intermarried and their offspring; and whites who dared to question what they considered heinous actions. As instructive as it is harrowing, the history recounted here lives on in the telling, along with a way of life destroyed in all but cultural memory. To that memory this book gives eloquent, resonating voice.

On the morning of April 8, 2006, a pale green, twenty-eight-foot-long, 1976 FireMaster fire truck—Engine 633—drove away from a port in Sihanoukville, Cambodia, after traveling some 8,500 miles from Colorado's Rocky Mountains. It had just cleared customs and was en route to a small fire station six kilometers away. Just two years before that, Captain Sok, Sihanoukville's fire chief, told author Douglas Mendel that his town was in need of a new fire truck. Mendel made it happen. In *Cambodia Fire*, Mendel shares the story of how he came to visit Cambodia, how it changed his life and the lives of numerous Cambodian people, and how he began his journey to help them with firetrucks, supplies, and gear to make their lives safer and better. This memoir tells how the delivery of the fire truck was only one of dozens of projects and years of work in connection with the Douglas Mendel Cambodian Relief Fund. *Cambodia Fire* narrates how the country of Cambodia and its warm, loving people have shaped the last seventeen years of Mendel's life.

Utah's landscape is among the most spectacular in the world. It is a region of prominent peaks, sweeping valleys, dramatic canyons, and plateaus rimmed by sheer cliffs. Unique among western states, Utah's landscape includes the Colorado Plateau, Basin and Range, and Rocky Mountains geologic provinces. Exposed rocks tell the geologic story of the region's basement structures, overlying surface features, and rock sequences that have contributed to sculpting the appearance of today's landscape. Rocks and formations record the evolution of the western part of the North American continent, and give clues to the nature of ancient crustal basement and Earth's deeper layers. Climate change has shaped the present landscape through the erosional power of ancient glaciers and the presence of today's large lakes and basins. Geology of Utah introduces the state's deep earth, plate tectonics, and the development of its ancient

mountains. It describes the geology of the three main geological provinces, ancient elevations, cliffs, valleys, and the history of the region's climate. This book will enrich the experience of enthusiastic amateur geologists who want to understand and explore the development of Utah's highlands and the history of this dynamic landscape.

Many of us spend a great deal of our time dreaming about our next trip to the mountains, whether for a weekend getaway or our yearly vacation. We hear within that deep inexplicable pull toward the wilderness and would agree with John Muir, who said: "The mountains are calling and I must go." We sense that in the wild we are touching the edge of something that is both wonderful and mysterious. In this book Erik Stensland, a professional landscape photographer based in Estes Park, Colorado, explores this longing we have for the wilderness and suggests that it is the trailhead for a journey to wholeness. Through short daily reflections on the natural world paired with his gorgeous photos from Rocky Mountain National Park, he encourages us to go deeper within ourselves and discover the healing that nature is offering.

an organizational condition challenging nonprofit/nongovernmental, social enterprise, and for-profit and publicly traded organizations. The book uses applied social and psychological theories and concepts to peel away the layers of an organizational enigma, revealing three causes of Founder's Syndrome and insight into the power and privileges assumed by founders who engage in undesirable and self-destructive behaviors leading to their termination; going from hero status to antihero. Researchers, instructors, students, and practitioners will find thought-provoking case studies from the real world of organization development practice.

Segments from interviews during interventions reveal the type of emotional turmoil experienced in organizations where founder's syndrome is present. Insight is provided into accounts of well-known founders who were terminated or forced to resign.

The unique features of this book include: integrating theory into practice, describing a new theory about the psychological reaction of founder's syndrome victims, prevention ideas when designing new organizations, strategies for intervention, using content based on research and organization development consultation experiences, and, integrating feedback from students who have launched organizations.
