Introduction to E-commerce discusses the foundations and key aspects of E-commerce while focusing on the latest developments in the E-commerce industry. Practical case studies offer a useful reference for dealing with various issues in E-commerce such as latest applications, management techniques, or psychological methods. Dr. Zheng Qin is currently Director of the E-Commerce Institute of Xi'an Jiaotong University.

Senior Secondary Commerce for Nigeria Longman

Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Complete Commerce for Senior Secondary offers comprehensive coverage of the SS1-SS3 curriculum in Nigeria. The textbook is designed to promote independent learning and fully prepares students for both WASSCE and NECO exams.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Reissue of a textbook first published in Australia in 1982. Designed for senior secondary students of courses in accounting, commerce, business and economics, it includes Australian case studies.

This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

Dictionary contains over 6,500 entries relating to all aspects of management and business as well as e-commerce.

Answers to coursebook questions are in the teacher's resource.

"As a young man, my fondest dream was to become a geographer. However, while working at the customs office, I thought deeply about the matter and concluded it was far too difficult a subject. I then turned to Physics as a substitute." Albert Einstein, great scientist is reported to have said in despair about Geography. The present series aptly titled "Geography Made Simple" is our humble attempt at removing fear of Geography subject from minds of students by presenting books that are written in lucid, simple and easy-to-understand language. The present eBook in full colours caters to needs of students of as diverse a field as Economic Geography, International Trade, Management, Economics, Political Economy, Commerce, Industrial Geography, Regional planning and development, International Business Management, Foreign Trade, International Finance, Trade and Transport Geography, etc. This evergreen book has stood the test of time since its first edition was published in October, 2002. This book is recommended as a reference-book by Geography teachers and used as a text-book by undergrads and postgraduate students even today. This second edition carries a 'Preface' by Jaiprakash Jadhav, Head of Geography Department, Dr. D. Y. Patil Arts, Commerce & Science College, Pimpri in Pune, India. Praise for Geography, Economics & Economic Geography "Hello, Parmar! Thanks for introducing the book of Economic Geography. I got it from my friend. I am modern college student of MA. I am Ram Shripati Payal."-Ram Shripati Payal, student of Modern College, Pune "Hi there! I just clicked on the website where your book will appear next month. I will try to do it next month...as I'm teaching Economic Geography in the fall at CWU. I haven't used a text in a couple of years because I didn't like any on the market. Thanks for your help!"-Ms Nancy, Central Washington University Jaiprakash Jadhav, Head of Geography Department, Dr. D. Y. Patil Arts, Commerce & Science College, Pimpri had presented in 2003 a few hardcopies of this eBook to the members of national accreditation agency, the National Assessment and Accreditation Council (NAAC) as the evidence of high quality of education at the College. He later personally acknowledged before Sher Singh Parmar that outstanding quality of his book made NAAC give a higher credible rating to Geography Department, Dr. D. Y. Patil Arts, Commerce & Science College. Noteworthy Features Possibly until the publication of the second edition of the book "Geography, Economics and Economic Geography" by Sher Singh Parmar in October, 2003, the Indian intelligentsia, Indian and the world mass media had not attributed the liberalization of the Indian economy to the Balance-of-Payment Crisis that India had faced in the year 1991. It was possibly for the first time in the world that this second edition by Sher Singh Parmar correctly pointed out, described and explained the balance-of-payment crisis faced by the Indian government in 1991 to be the main cause that had forced India into adopting the liberalization-mode for the Indian economy. The book contains for the first time many of the Economic terms/jargons that have been rephrased/paraphrased/elaborated/redefined/repurposed to make these Economic terms inclusive, better and more understandable. For example, see following definition of the term Trade included in this e-book: "10.2 BASIC CONCEPTS 1. TRADE: Exchange of goods, services or information." The definition of TRADE given above by Sher Singh Parmar is more inclusive than the following definition of TRADE that had been given until then in numerous Standard Texts/Books on subject of Economics: "TRADE: Exchange of goods" The book introduces altogether new fresh concepts called idealised perfectly balanced pentagonal model and realistic isostatically balanced amorphous model to understand economic landscapes. Author applies these two economic models to real life situations past and present to successfully build his thesis that "...even a slight imbalance in economic landscapes at any level is sufficient enough to engineer political and other problems. World peace may be achieved if the whole globe is developed into a perfectly balanced economic landscape." He brings in new insight to understand and appreciate dignity of labour in light of these new concepts. This new conceptual framework introduced by author definitely helps us understand and resolve present day problems in much better and peaceful ways. The book introduces new concepts of Economic Liberalization Model, Four Stages of Globalization model, and Tricellular LPG model. These models give us fresh incisive insight into vexing issues of Globalization, Liberalization, and Privatisation. Worth mentioning also is author's creative description, elaboration, and explanation of factors of international trade and business.

An Introduction to e-Business provides the contemporary knowledge of the key issues affecting the modern e-business environment and links theory and practice of management strategies relating to e-business. This book brings together the most cogent themes for an introduction to e-business and constitutes a valuable contribution to formalising

common themes for teaching the subject in higher education. It brings together theoretical perspectives based on academic research and the application of e-business strategies. These concepts are further explored in the six case studies that follow the set chapters. This new textbook integrates the main themes to provide a complete picture of the key elements relevant to an introductory text in e-business. To fully appreciate the e-business environment it is necessary to understand the links between the different disciplines that come together to form
