In The Classroom and Communications Skills Program: Practical Strategies for Educating Young Children with Autism Spectrum and Other Developmental Disabilities in the Public School Setting, Megan Ahlers and Colleen Zillich openly share their experience in the classroom and how they developed the CCSP. Created in response to the frustrations of young students attempting to adjust to the classroom, the Classroom and Communications Skills Program is based on the authors' shared belief that the least restrictive environment is a principle, not a place. It is an idea that teaches us to look at the continuum of service or placement options for children. Brimming with effective ways to facilitate the learning of young children who are non-verbal/limited verbal and not table ready in a public school setting, the program emphasizes the importance of creating a fluid continuum between the child's natural environments, including home and school, to increase the chances for generalizing skills.

How can history be taught effectively? Does knowing about the past give meaning to the present and hints to what will happen in the future? This book responds to these questions as it explores the key elements of history instruction—the use of primary sources and narratives, involving students in the historical inquiry through classroom discussions, teaching toward chronological thinking, and the use of historical documents to develop in students a “detective approach” to solving historical problems. Taking a systematic approach to improve students' historical thinking, this book emphasizes certain strategies that will help students know more about the past in ways that will help them in their lives today. The second edition is organized in three parts—Part One describes the theoretical background to teaching history. Part Two, Planning and Assessment, emphasizes the importance of good organization and lesson planning as well as how to assess students' knowledge, reasoning power, and effective use of communication in the history classroom. Part Three, Instruction, focuses on the use of primary sources, class discussions, incorporating photographs and paintings, and writing in teaching history. Both the study of history and the teaching of history are multifaceted. The author's hope in writing this book is to engage new and experienced teachers in thoughtful discourse regarding the teaching and learning of history and to develop lifelong learners of history in the 21st century.
