The principal goal of this study was to determine the financial and organizational impacts of project management. This study began with the development of a project management maturity model and an analysis methodology to assess the maturity of project management processes. The project management maturity analysis methodology consists of 148 multiple-choice questions that measure project management maturity, and cover 8 knowledge areas and 6 project phases. The maturity model and methodology were then applied by benchmarking 38 different companies and government agencies in 4 different industries. This assessment methodology provides solid and comparative studies on project management practices across industries and companies within an industry.
