Canadian Curriculum (Preschool) is a curriculum-based activity book series that aligns with the curricula from all provinces and territories in Canada. This series provides playful and interesting activities to help preschoolers grasp the basic concepts of Math, English, and French. Working with this set of fun activity books, preschoolers will build the essential fine motor skills and develop a positive learning habit for their future success.

Covers reading skills, spelling skills, math skills, language arts, writing skills, and test preparation.

Canadian Curriculum ScienceSmart covers the essentials of elementary science. Curriculum-based, each title provides students with succinct information and engaging activities to stimulate their natural curiosity, and help them master the basic concepts and develop an interest in learning science.

These workbooks provide hundreds of fun pages for

practicing all the skills kids need to succeed in each grade. Compiled from the popular Reading Skills, Spelling Skills, Math Skills, Language Arts, Writing Skills, and test Prep series, these colorful workbooks include: High interest stories to develop reading proficiency; exercises in math problems students will face; grade appropriate spelling words grouped by vowel sound or suffix; lessons in parts of speech, usage, and constructing sentences; creative prompts for writing sentences, letters, and even short reports; and practice in using standardized test formats.

Harcourt Family Learning Workbooks are a comprehensive line of workbook developed through a partnership with Harcourt, a leading educational publisher. Based on national teaching standards, these workbooks provide complete practice in math, reading, and other key subject areas.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of

methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Complete EnglishSmart (New Edition) is a curriculum-based workbook series that provides ample practice for developing and improving English skills.
