The prerequisite is to be able to organize and precisely control IT deployment in the respective area of operation in a holistic manner. The following aspects, among others, are highlighted: - Ongoing consistency of technical and organizational processes - Availability, confidentiality, authenticity and integrity of digital content - Up-to-date and evidence-based documentation of processes (procedural documentation) An answer to the specific HOW can be found in the VOI PK-DML, the guide and audit framework for information security and compliance that has been continuously developed and proven in practice for 20 years: - Suitable for all company sizes - Quickly identify vulnerabilities and inconsistencies - Applicable internationally - Basic coverage of all information security requirements The VOI PK-DML are a guide by practitioners for practitioners. Florence Thépot provides the first systematic account of the interaction between competition law and corporate governance. She challenges the 'black box' conception of the firm- or 'undertaking' - in competition law, as applied to increasingly complex corporate relations. The book opens the 'black box' of the firm to understand the internal drivers of collusive behaviour, and proposes a unified approach to cartel

enforcement, based on the agency theory. It explores key issues including corporate compliance programmes, the attribution of liability in corporate groups, and structural links between competitors, and should be read by anyone interested in how the evolution of the corporate landscape impacts competition law.

The original essays in this book address the influential writings of Peter A. French on the nature of responsibility, ethics, and moral practices. French's contributions to a wide spectrum of philosophical discussions have made him a dominant figure in the fields of normative ethics, meta-ethics, applied ethics, as well as legal and political philosophy. Many of French's deepest insights come from identifying and exploring the scope and nature of moral responsibility and human agency as they appear in actual events, real social and cultural practices, as well as in literature and film. This immediacy renders French's scholarship vital and accessible to a wide variety of audiences. The authors, recognized for their own contributions to the understanding of the nature of morality and moral practices offer new and unique positions while exploring, expanding and responding to those of French. The final chapter is written by French, in which he provides both new philosophical insight as well as some reflection on his own work and its influence. This book will appeal to philosophers, as well as advanced students and researchers in the humanities, social sciences, law, and political science.

The last twenty years have witnessed an astonishing transformation: the fight against corruption has grown from a handful of local undertakings into a truly global effort. Law occupies a central role in that effort and this timely book assesses the challenges faced in using law as it too morphs from a handful of local rules into a global regime. The book presents the perspectives of a global array of scholars, of policy makers, and of practitioners. Topics range from critical theoretical understandings of the global regime as a whole, to regional and local experiences in implementing and influencing the regime, including specific legal techniques such as deferred prosecution agreements, addressing corruption issues in dispute resolution, whistleblower protection, civil and administrative prosecutions, as well as blocking statutes. The book also includes discussions of the future shape of the global regime, the emergence of transnational compliance standards, and discussions by leaders of international organizations that take a leading role in the transnationalization of anti-corruption law. The *Transnationalization of Anti-Corruption Law* deals with the most salient aspects of the global anti-corruption regime. It is written by people

who contribute to the structure of the regime, who practice within the regime, and who study the regime. It is written for anyone interested in corruption or corruption control in general, anyone with a general interest in jurisprudence or in international law, and especially anyone who is interested in critical thinking and analysis of how law can control corruption in a global context.

Compliance has become key to our contemporary markets, societies, and modes of governance across a variety of public and private domains. While this has stimulated a rich body of empirical and practical expertise on compliance, thus far, there has been no comprehensive understanding of what compliance is or how it influences various fields and sectors. The academic knowledge of compliance has remained siloed along different disciplinary domains, regulatory and legal spheres, and mechanisms and interventions. This handbook bridges these divides to provide the first one-stop overview of what compliance is, how we can best study it, and the core mechanisms that shape it. Written by leading experts, chapters offer perspectives from across law, regulatory studies, management science, criminology, economics, sociology, and psychology. This volume is the definitive and comprehensive account of compliance.

The essential resource for fraud examiners around the globe The International Fraud Handbook provides comprehensive guidance toward effective anti-fraud measures around the world. Written by the founder and chairman of the Association of Certified Fraud Examiners (ACFE), this book gives examiners a one-stop resource packed with authoritative information on cross-border fraud investigations, examination methodology, risk management, detection, prevention, response, and more, including new statistics from the ACFE 2018 Report to the Nations on Occupational Fraud and Abuse that reveal the prevalence and real-world impact of different types of fraud. Examples and detailed descriptions of the major types of fraud demonstrate the various manifestations examiners may encounter in organizations and show readers how to spot the “red flags” and develop a robust anti-fraud program. In addition, this book includes jurisdiction-specific information on the anti-fraud environment for more than 35 countries around the globe. These country-focused discussions contributed by local anti-fraud experts provide readers with the information they need when conducting cross-border engagements, including applicable legal and regulatory requirements, the types and sources of information available when investigating fraud, foundational anti-fraud frameworks, cultural

considerations, and more. The rising global economy brings both tremendous opportunity and risks that are becoming increasingly difficult to manage. As a result, many jurisdictions are attempting to strengthen their anti-fraud environments — whether through stricter anti-bribery laws or more stringent risk management guidelines — but a lack of uniformity in legal rules and guidance can be challenging for organizations doing business abroad. This book helps examiners mitigate fraud in their own organizations, while taking the necessary steps to prevent potential legal exposure. Understand the different types of fraud, their common elements, and their impacts across an organization Conduct a thorough risk assessment and implement effective response and control activities Learn the ACFE's standard investigation methodology for domestic and cross-border fraud investigations Explore fraud trends and region-specific information for countries on every continent As levels of risk increase and the risks themselves become more complex, the International Fraud Handbook gives examiners a robust resource for more effective prevention and detection.

Bachelor Thesis from the year 2017 in the subject Business economics - General, grade: 1,2, University of Applied Sciences Dresden, language: English, abstract: ISO 19600 is an international standard issued by the International Organization of Standardization (ISO) that aims at supporting organizations worldwide in introducing good compliance measures and maintain integrity. The standard was published in December 2014 and has received both praise and criticism, but no in-depth analysis of its effectiveness. This paper is set out to further analyze the approach offered by ISO 19600 towards compliance. It is supposed to assist cooperations in their decision whether or not to use ISO 19600 as their sole or main resource in implementing good compliance measures within their organization. The research question of this thesis could thus be stated as follows: How effective are the measures suggested by ISO 19600 in ensuring good compliance in a cooperation? The term „effectiveness” is defined by the Oxford dictionary as "[t]he degree to which something is successful in producing a desired result". Therefore, this thesis is going to analyze the degree to which ISO 19600 is successful in producing the desired result of preventing compliance violations in cooperations. The research is based on findings of studies on compliance as well as the suggestions in popular literature on the topic and opinions voiced by various economists and organizations upon the release of ISO 19600 itself. By

comparing those with the suggestions made in ISO 19600 it is possible to assess the standard's potential effectiveness when it is utilized by a cooperation. Note that ISO 19600 is aimed at all kinds of organizations including non-profit organizations and governmental institutions. The focus of this thesis lies on private, profit-driven enterprises, but most of the thesis' findings apply to other types of organizations as well.

This book is a comprehensive, road-tested framework for managing Corporate Social Responsibility (CSR) based on years of award winning performance in senior management roles in a multinational business. The author shows why non-financial performance indicators are just as important as financial ones when it comes to delivering performance and securing long term shareholder value. CSR is not window dressing, it is not a tiresome box ticking exercise and it is not a cost centre. Done properly, CSR is a cost-saving, simple everyday process that adds value to your business. While most companies already have suitable founding values and have carried out some basic CSR measures, many lack the systematics for managing the issue holistically across the business. Beginning with a CSR briefing paper for managers new to the area (or for providing to senior management who may need convincing) Managing Corporate Responsibility in the Real World goes on to provide a fully integrated framework for delivering a corporate responsibility programme in your organization. Drawing on real world examples and stories, Jouko Kuisma shows how to start with the political practicalities of setting up an internal steering group to analysis of your firm's value chain and management principles before drawing up an action plan and set of performance criteria on which to be measured.

Corporate Legal Compliance Handbook, Third Edition, provides the knowledge necessary to implement or enhance a compliance program in a specific company, or in a client's company. The book focuses not only on doing what is legal or what is right--the two are both important but not always the same--but also on how to make a compliance program actually work. The book is organized in a sequence that follows how to approach a compliance program. It gives the compliance officer, consultant, or attorney a good grounding in the basics of compliance law.

This includes such things as the rules about corporate and individual liability, an understanding of the basics of the key laws that impact companies, and the workings of the U.S. Sentencing Guidelines. Successful programs also require an understanding of educational techniques, good communication skills, and the use of computer tools. The effective compliance program also takes into account how to deliver messages using a variety of media to reach employees in different locations, of different ages or education, who speak different languages. Note: Online subscriptions are for three-month periods.

This book offers a practical and reliable approach to how an organization can move beyond all of the separate initiatives and hype associated with sustainability. It shows how to build in what is already in place, in order to create a sense of stewardship that protects the environment,

This handbook is the first resource to provide a scientific analysis of the nature of compliance. It examines the subject from such crucial and varied perspectives as ethics, behavioral science, risk management, accounting, and European and international law. Much more than a critical approach to the existing practice of supervision, it provides a wealth of information, guidance, and valuable insights for the day-to-day work of compliance officers. With chapters contributed by lecturers of VU University Amsterdam's flourishing post-doctoral Executive Master Program in Compliance and Integrity Management – which fosters alternatives such as greater trust in self-regulation and market discipline – the book explores such aspects of compliance and integrity management as the following: • monitoring risk compliance and integrity; • stakeholder and reputation management; • conflicts of interest; • anti-bribery; • export controls; • extraterritorial jurisdiction of U.S. legislation; • fraud; • duty of care; • market abuse; • privacy; and • competition. The analysis throughout is supported by a comprehensive study of the literature concerning the *raison d'être* of supervision and regulation. Meeting the need for an in-depth analysis of the expanding field of compliance and integrity management, this book is a milestone in a field that is rapidly growing in importance across a wide spectrum of business and professional activity. It will prove an essential practical resource for company or institutional officers worldwide in setting up a compliance function in their organization. Well known as a consultant in compliance-related matters, Sylvie C. Bleker-van Eyk is currently Senior Director at PricewaterhouseCoopers Forensic Services, Chair of the Supervisory Committee on Monitoring Anti-Money Laundering Policy at WODC, the Research and Documentation Centre of the Netherlands Ministry of Security and Justice, and Professor and Program Director of Postgraduate Education in Compliance and Integrity Management at VU University Amsterdam. Raf A. M. Houben is Head of Compliance and Security at HDI Global SE–The Netherlands in Rotterdam, and program coordinator and lecturer at the same Postgraduate Education in Amsterdam.
