Major works from the Walker Art Center's collection, seen in the context of two watershed moments in American history This diverse survey of American art from the collection of the Walker Art Center uses two of the nation's most significant events as its chronological boundaries: the failed Bay of Pigs Invasion in 1961 that escalated the Vietnam War and the 2001 terrorist attacks on New York and Washington, DC. Within the timeframe of these two landmark calamities, the United States saw the emergence of some of its most noteworthy artists. The publication examines the many themes and techniques developed during those 40 years within the greater context of American history and culture, from modernist abstraction to mass production. These generations of artists probed the very notion of what art is

and what it can do using paint, performance, installation, video and photography. This paperback volume features work by artists such as Jasper Johns, Donald Judd, Barbara Kruger, Robert Mapplethorpe, Bruce Nauman, Cindy Sherman, Robert Rauschenberg, Kara Walker and Andy Warhol from the Walker Art Center's acclaimed collection. Important new insights into how various components and systems evolved. Premised on the idea that one cannot know a science without knowing its history, *History of Wireless* offers a lively new treatment that introduces previously unacknowledged pioneers and developments, setting a new standard for understanding the evolution of this important technology. Starting with the background-magnetism, electricity, light, and Maxwell's Electromagnetic Theory-this book offers new insights into the initial theory and experimental exploration of wireless. In addition to the well-known contributions of Maxwell, Hertz, and Marconi, it examines work done by Heaviside, Tesla, and passionate amateurs such as the Kentucky melon farmer Nathan Stubblefield and the unsung hero Antonio Meucci. Looking at the story from mathematical, physics, technical, and other perspectives, the clearly written text describes the development of wireless within a vivid scientific milieu. *History of Wireless* also goes into other key areas, including: The work of J. C. Bose and J. A. Fleming German, Japanese, and Soviet contributions to physics and applications of electromagnetic oscillations and waves Wireless telegraphic and telephonic development and attempts to achieve transatlantic wireless communications Wireless telegraphy in South Africa in the early twentieth century Antenna development in Japan: past and present Soviet quasi-optics at near-mm and sub-mm wavelengths The evolution of electromagnetic waveguides The history of phased array antennas Augmenting the typical, Marconi-centered

approach, *History of Wireless* fills in the conventionally accepted story with attention to more specific, less-known discoveries and individuals, and challenges traditional assumptions about the origins and growth of wireless. This allows for a more comprehensive understanding of how various components and systems evolved. Written in a clear tone with a broad scientific audience in mind, this exciting and thorough treatment is sure to become a classic in the field.

The Art of War is an enduring classic that holds a special place in the culture and history of East Asia. An ancient Chinese text on the philosophy and politics of warfare and military strategy, the treatise was written in 6th century B.C. by a warrior-philosopher now famous all over the world as Sun Tzu. Sun Tzu's teachings remain as relevant to leaders and strategists today as they were to rulers and military generals in ancient times. Divided into thirteen chapters and written succinctly, *The Art of War* is a must-read for anybody who works in a competitive environment.

Kathy Acker's characteristically outrageous, lyrical, and hyperinventive novel concerns three characters who share an impulse toward self-immolation through doomed, obsessive romance. Teetering somewhere between the Beats and Punk, *IN MEMORIAM TO IDENTITY* is at once a revelatory addition to, and an irreverent critique of, literature of decadence and self-destruction.

how these ancient teachings can be applied to the modern world. Nhat Hanh focuses on the direct experience of recognizing and embracing the nature of our feelings and perceptions. The quality of our lives, he says, depends on the quality of the seeds in our minds. Buddhism teaches us how to nourish the seeds of joy and transform the seeds of suffering so that our understanding, love, and compassion can flower.

To everyone he's every played dice with, Mitch Corley seems like the luckiest guy around. But in truth, Corley's fast hands are the only gift fate's ever given him. He's never held down a steady job, and when it comes to women, his luck might just be the worst of all -- his girlfriend and partner-in-crime Red would double-cross him in a heartbeat if she knew just how short on cash they really were. And if Red ever finds out about the wife Corley neglected to mention, there's a good chance that Corley might not survive the night. At first, Mitch was sure Texas would be the perfect place for him and Red to run their game -- there are players in nearly every back room and side-street across the state and here, the pockets run just a little deeper. But Corley forgot about

Patricia S. Mann explains our current period as a time of social transformation resulting from an 'unmooring' of women, men, and children from the nuclear family, gender relations having replaced economic relations as the primary site of social tension and change in our lives. From the bestselling author of *I Didn't Do My Homework Because...* comes an irresistible meditation on the quest for connection. When an elephant falls in love, he does many foolish things. He hides when the elephant-object of his affection is around. He writes dozens of letters that he will never send. And he tries to be healthy, but ends up finishing the cheesecake. This soulful book is at once relatable and revealing, a reminder that love is worth striving for, and that the very best things in life will come to those who wait. Plus, this is the fixed format version, which looks almost identical to the print edition.

It gives practical guidance for how to conduct a psychoeducation group, using sessions and cases drawn from the Barcelona Psychoeducation Program. Moreover, it provides the reader with a great amount of practical tips and tricks and specific techniques to maximize the benefits of bipolar psychoeducation. The authors formed the first group to show the efficacy of psychoeducation as a maintenance treatment and have a long history of performing bipolar psychoeducation.

"... a work that builds a substantial bridge between Freudian psychoanalysis and radical feminist thought, particularly on the subject of lesbianism.... Presenting a complex argument about an issue vital to the psychoanalytic endeavor as well as to feminist theory, *The Practice of Love* should stimulate a reconsideration of 'perversion' and the construction of sexual fantasy. The illumination of the fantasies that make lesbian desire distinctive will necessarily open up our understanding of all sexuality." —Jessica Benjamin, *New York Times Book Review* "Teresa de Lauretis has entwined three books into one: a critical history of psychoanalytic theories of female homosexuality; a bold study of how lesbians keep disappearing from popular culture, especially film; and an original speculation on the dynamics of lesbian desire." —Elisabeth Young-Bruehl "An

important and original contribution not only to lesbian and gay studies, but also to psychoanalytic theory and film criticism. De Lauretis brings a unique and valuable perspective to issues of great importance today in all these areas." —Leo Bersani "De Lauretis's influential theory gets top marks from sapphic scholars who know best." —Out In an eccentric reading of Freud through Laplanche and the Lacanian and feminist revisions, Teresa de Lauretis delineates a model of "perverse" desire and a theory of lesbian sexuality. *The Practice of Love* discusses classic psychoanalytic narratives of female homosexuality, contemporary feminist writings on female sexuality, and the evolution of the original fantasies into cultural myths or public fantasies.

As the summer ends, six-year-old Garmann's three ancient aunts visit and they all talk about the things that scare them, in an award-winning story that ponders fear and courage, life and death, beginnings and endings.

After Words investigates how the suicide of an author informs critical interpretations of the author's works. Suicide itself is a form of authorship as well as a revision, both on the part of the author, who has written his or her final scene and revised the 'natural' course of his or her life, and on the part of the reader, who must make sense of this final act of writing. Elizabeth Leake focuses on twentieth-

century Italian writers Guido Mor-selli, Amelia Rosselli, Cesare Pavese, and Primo Levi, examining personal correspondence, diaries, and obituaries along with popular and academic commemorative writings to elucidate the ramifications of the authors' suicides for their readership. She argues that authorial suicide points to the limitations of those critical stances that exclude the author from the practice of reading. In this innovative and accessible assessment of some of the key issues of authorship, Leake shows that in the aftermath of suicide, an author's life and death themselves become texts to be read.

Since the 1840s, when Victorian England emerged into the modern era and industrial cities became the new cultural centers, regionalist literature has posited itself as an aesthetic alternative to nationalist culture. Yet what differentiates regionalism's claims of authenticity, derived from blood and soil, from those of nationalism? Through close readings and theoretical elaborations, Roberto M. Dainotto reveals the degree to which regionalism mimics nationalism in valorizing ethnic purity. He interprets regionalism not as a genre in the pastoral tradition but as a rhetorical trope, a way of reading in which regionalism figures as the "other" against a historical process that disrupts the organic wholeness of place. Dainotto traces the genealogy of the idea of place in literature, examining European texts from

Victorian England to Fascist Italy. He finds, for example, in Thomas Hardy's *The Return of the Native* a virtual thesaurus of regionalist commonplaces. Elizabeth Gaskell's *North and South* mediates between Madame de Stal's privileging of the sophisticated north and Jean-Jacques Rousseau's nostalgia for the naive south. The regionalism of the Sicilian philosopher Giovanni Gentile exhibits a deep longing for the humanities as they define Italy and Western culture. Dainotto concludes with a close look at the rhetoric of Nazism and Fascism, dramatizing the convergence of regionalist aesthetics and nationalist ideology in Italy and Germany between the two World Wars.
