This book offers a critical biography of John of Moravia, illegitimate member of the Luxembourg dynasty, provost of Vyšehrad, bishop of Litomyšl and eventually patriarch of Aquileia († 1394), in the wider context of the Czech and Italian history.

Giocattoli, abbigliamento, cartelle, astucci e materiale scolastico, corsi di sport, playstation e telefonini, feste e regali di compleanno per amici e compagni... Quante e quali spese siamo chiamati a sostenere negli anni dell'infanzia? D'altronde, nessuno di noi vorrebbe far mancare qualcosa ai propri figli. Per un figlio solo il meglio. Ma cos'è il meglio per un bambino? Torna la domanda che è stata il punto di partenza del best seller *Bebè a costo zero* – la guida al consumo critico per futuri e neogenitori che ha aiutato migliaia di famiglie ad evitare spese inutili, senza far mancare assolutamente nulla ai propri piccini. Anzi... Ora l'attenzione si sposta sui bambini più grandi, a partire dai 2 anni di età, fino alle soglie dell'adolescenza, perché se accogliere un bimbo a costo pressoché zero è possibile, vedremo che è possibile anche crescerlo serenamente senza affrontare continue spese. *Bebè a costo zero* crescerà vi aiuterà a comprendere e soddisfare le esigenze del vostro bambino, garantendogli gli strumenti necessari per crescere felice ed equilibrato. Con tanti suggerimenti per giocare, cucinare, divertirsi e far festa a costo zero! Le testimonianze dei genitori e gli approfondimenti degli esperti (pediatri, psicologi, pedagogisti) confermano che "fare meglio con meno" è possibile, e può essere la via per trovare una nuova dimensione, più umana e familiare, per assaporare gli anni dell'infanzia insieme ai propri bambini con meno oggetti... e più affetti!

"*Mucuna pruriens*" is a bean that grows in the tropics. It is very rich in natural levodopa that is better tolerated and more potent than the synthetic levodopa in Sinemet or Stalevo. Two prestigious neurologists have patented extracts of mucuna seeds as a treatment for Parkinson's. Meanwhile, patients have recorded their positive experiences with mucuna; they buy it online (no prescription needed) and use it in secrecy without consulting their neurologist. Neither the patients nor the doctors (most of them) have clear ideas about this plant, its ingredients (not only levodopa), the proportions in which it is absorbed, or how to manage it. "*Mucuna versus Parkinson: Natural Levodopa Treatment*" is so far the most complete and up-to-date monograph on the subject, it describes the theoretical and practical approaches to the use of this plant as a treatment option for Parkinson's disease. Also included are more than one hundred of references.

An examination of the diverse roles exotic animals, both living species and depicted as motifs in art, played in the fashioning of the Medici's courtly identity.

Protected areas and conservation policies are usually established with only local nature and wildlife in mind. Yet they can have far reaching consequences for local populations, often undermining their access to resources and their livelihoods. This book is the first comprehensive discussion of the social consequences of protected area schemes and conservation policies. Drawing on case studies from North America, Europe, Asia, Central America and Africa, it critically reviews current trends in protected area management, and shows how local people have been affected in terms of their customary rights, livelihoods, wellbeing and social cohesion. The loss of secure livelihoods ultimately threatens conservation, as poverty and environmental degradation intensify in and around protected areas. The leading authorities who have contributed to this ground breaking volume argue for a thorough overhaul of conservation thinking and practice.

Includes entries for maps and atlases.

Paris may be the capital of haute cuisine, but expat Marc Grossman craves the food he grew up with in New York and Brooklyn. So he has lovingly recreated those iconic recipes, from blintzes, bialys, and black & white cookies to pork buns, matzo ball soup, and everything in between. Grossman zooms in on particular neighborhoods and their special fare, even including addresses of his favorite restaurants.

What does writing Greek books mean at the height of the Cinquecento in Venice? The present volume provides fascinating insights into Greek-language book production at a time when printed books were already at a rather advanced stage of development with regards to requests, purchases and exchanges of books; copying and borrowing practices; relations among intellectuals and with institutions, and much more. Based on the investigation into selected institutional and private libraries – in particular the book collection of Gabriel Severos, guide of the Greek Confraternity in Venice – the authors present new pertinent evidence from Renaissance books and documents, discuss methodological questions, and propose innovative research perspectives for a sociocultural approach to book histories.

Pompei, anno 62 dopo Cristo. Poche settimane prima del terremoto che danneggerà gravemente la città e diciassette anni prima dell'eruzione del Vesuvio che la seppellirà per sempre, nel termopolio di Asellina, la locanda più conosciuta del decumano massimo, giunge una nuova schiava dalla provincia romana di Smirne. Una schiava esile e docile, così docile che finirà per travolgere le vite delle sue compagne, Aegle la greca e Màriam la giudea. E della loro stessa padrona, Asellina. E mentre il finto mercante Rufus e il suo compagno Théophilòs, si preparano ad accogliere un messaggero in viaggio verso Roma, si scoprirà che a Pompei non tutto è come sembra. Che la città vive non solo di negotium e di sesterzi ma che esiste una comunità palpitante e nascosta, desiderosa di parole nuove. Di parole d'amore. La stessa comunità che scruta ansiosa sul molo di Pozzuoli la nave che porterà tra loro il messaggero in viaggio dall'Oriente, Saulo, detto Paolo.

"Stare in equilibrio su una tavola da surf o su un tappetino da yoga, scendere in grotte piene di pipistrelli o salire in cima a vette vulcaniche, immerse nella nebbia, compiere escursioni a piedi o in bicicletta o fare zip-line: l'unico limite è la data del ritorno".

Universities were driving forces of change in late Renaissance Italy. The Gonzaga, the ruling family of Mantua, had long supported scholarship and dreamed of founding an institution of higher learning within the city. In the early seventeenth century they joined forces with the Jesuits, a powerful intellectual and religious force, to found one of the most innovative universities of the time. Paul F. Grendler provides the first book in any language about the Peaceful University of Mantua, its official name. He traces the efforts of Duke Ferdinando Gonzaga, a prince savant who debated Galileo, as he made his family's dream a reality. Ferdinando negotiated with the Jesuits, recruited professors, and financed the school. Grendler examines the motivations of the Gonzaga and the Jesuits in the establishment of a joint civic and Jesuit university. The University of Mantua lasted only six years, lost during the brutal sack of the city by German troops in 1630. Despite its short life, the university offered original scholarship and teaching. It had the first professorship of chemistry more than 100 years before any other Italian university. The leading professor of medicine identified the symptoms of angina pectoris 140 years before an English scholar named the disease. The star law professor advanced new legal theories while secretly spying for James I of England. The Jesuits taught humanities, philosophy, and theology in ways both similar to and different from lay professors. A superlative study of education, politics, and culture in seventeenth-century Italy, this book reconsiders a period in Italy's history often characterized as one of feckless rulers and stagnant learning. Thanks to extensive archival research and a thorough examination of the published works of the university's professors, Grendler's history tells a new story. -- Kathleen Comerford, Georgia Southern University

This open access book presents theoretical and practical research relating to the vast, publicly financed program for the construction of new schools and the reorganization of existing educational buildings in Italy. This transformative process aims to give old buildings a fresh identity, to ensure that facilities are compliant with the new educational and teaching models, and to improve both energy efficiency and structural safety with respect to seismic activity. The book is divided into three sections, the first of which focuses on the social role of the school as a civic building that can serve the needs of the community. Innovations in both design and construction processes are then analyzed, paying special attention to the Building Information Modeling (BIM) strategy as a tool for the integration of different disciplines. The final section is devoted to the built heritage and tools, technologies, and approaches for the upgrading of existing buildings so that they meet the new regulations on building performance. The book will be of interest to all who wish to learn about the latest insights into the challenges posed by, and the opportunities afforded by, a comprehensive school building and renovation program.
