Corporate marketing and corporate communications are topics that have grown in scholarly and practical importance in these last decades. Fields such as branding, marketing communications and public relations have all contributed to this boost. Whilst there is a large amount of literature on each of these disciplines, there is little systematic development from the perspective of corporate marketing and corporate communication studies, although these two have the most to contribute to how companies manage their brands, image and corporate identities in the 21st Century. This book seeks to redress this balance and provide insights, via case studies or histories, on issues such as nation branding, managing multiple corporate identities during merger and acquisitions and establishing a company's CSR and green image. Scholars from various disciplines within the fields of public relations, branding, marketing and corporate identity have come together in Contemporary Perspectives on Corporate Marketing to offer the latest approaches and studies in these areas. As such, it will become a platform for developments in the field and serve as a respected reference resource for corporate marketing and corporate communication studies. In consumer and social psychology, salience has been generally treated as an attribute of a stimulus, which allows it to stand out and be noticed. Researchers, however, have only vaguely articulated the theoretical underpinnings of this term, thus impeding a thorough understanding of the perceptual processes behind its use in complex marketing communications. This book presents a theoretical approach for enhancing consumer processing and memory of marketing communication. Using schema theory and an information processing approach, the model introduced here - briefly referred to as the In-salience hypothesis emphasizes the nature of prominence which is intrinsic to any salience construct reviewed in literature. This model is part of wider Dichotic theory of salience, according to which a stimulus is salient either when it is incongruent in a certain context to a perceiver's schema, or when it is congruent in a certain context to a perceiver's goal. According to the four propositions of the model, in-salient stimuli are better recalled, affect both attention and interpretation, and are moderated by the degree of perceivers' comprehension (i.e., activation, accessibility, and availability of schemata), and involvement (i.e., personal relevance of the stimuli). Results of two

empirical studies on print advertisements show that in-salient ad messages have the strongest impact in triggering ad processing which, in turn, leads to consumer awareness. The reading of this book is therefore recommended not only to academic scholars, but also to marketers especially planning ad campaigns and launches of new products.
