In 1900, for every 1,000 babies born in the United States, 100 would die before their first birthday, often due to infectious diseases. Today, vaccines exist for many viral and bacterial diseases. The National Childhood Vaccine Injury Act, passed in 1986, was intended to bolster vaccine research and development through the federal coordination of vaccine initiatives and to provide relief to vaccine manufacturers facing financial burdens. The legislation also intended to address concerns about the safety of vaccines by instituting a compensation program, setting up a passive surveillance system for vaccine adverse events, and by providing information to consumers. A key component of the legislation required the U.S. Department of Health

and Human Services to collaborate with the Institute of Medicine to assess concerns about the safety of vaccines and potential adverse events, especially in children. Adverse Effects of Vaccines reviews the epidemiological, clinical, and biological evidence regarding adverse health events associated with specific vaccines covered by the National Vaccine Injury Compensation Program (VICP), including the varicella zoster vaccine, influenza vaccines, the hepatitis B vaccine, and the human papillomavirus vaccine, among others. For each possible adverse event, the report reviews peer-reviewed primary studies, summarizes their findings, and evaluates the epidemiological, clinical, and biological evidence. It finds that while no vaccine is 100 percent safe, very few adverse events are shown to be caused by vaccines. In addition, the evidence shows that vaccines do not cause several conditions. For example, the MMR vaccine is not associated with autism or childhood diabetes. Also, the DTaP vaccine is not associated with diabetes and the influenza vaccine given as a shot does not exacerbate asthma. Adverse Effects of Vaccines will be of special interest to the National Vaccine Program Office, the VICP, the Centers for Disease Control and Prevention, vaccine safety researchers and manufacturers, parents, caregivers, and health professionals in the private and public sectors. Rush is often referred to as a libertarian rock band, but really what the band is channeling is an Aristotelian individualism, a philosophy that strongly resonates with today's 40-somethings. This helps explain the band's resurgence in popularity, culminating in its 2013 induction in the Rock and Roll Hall of Fame.

The conclusion to the definitive biography of the rock 'n' roll kings of the North. Includes two full-color photo inserts, with unearthed photos of the band. "A must for Rush fans." — Library Journal on Anthem, book one of the Rush Across the Decades trilogy In this conclusion to his trilogy of authoritative books on Canada's most beloved and successful rock band, Martin Popoff takes us through three decades of "life at the top" for Rush's Geddy Lee, Alex Lifeson, and Neil Peart. Though this era begins with the brisk-selling *Roll the Bones* and sees throngs of fans sell out international tours, there is also unimaginable tragedy, with Peart losing his daughter and his wife within the space of ten months and, two decades later, succumbing to cancer himself. In between, however, there is a gorgeous and heartbreaking album of reflection and bereavement, as well as a triumphant trip to Brazil, a Rock and Roll Hall of Fame induction, and — some say surprisingly — the band's first full-blown concept album to close an immense career marked by integrity and idealism.

The much-anticipated definitive account of China's Great Famine An estimated thirty-six million Chinese men, women, and children starved to death during China's Great Leap Forward in the late 1950s and early '60s. One of the greatest tragedies of the twentieth century, the famine is poorly understood, and in China is still euphemistically referred to as "the three years of natural disaster." As a journalist with privileged access to official and unofficial sources, Yang Jisheng spent twenty years piecing together the events that led to mass nationwide starvation, including the death of his own father. Finding no natural causes, Yang attributes responsibility for the deaths to China's totalitarian system and the refusal of officials at every level to value human life over ideology and self-interest. *Tombstone* is a testament to inhumanity and occasional heroism that pits collective memory against the historical amnesia imposed by those in power. Stunning in scale and arresting in its detailed account of the staggering human cost of this tragedy, *Tombstone* is written both as a memorial to the lives lost—an enduring tombstone in memory of the dead—and in hopeful anticipation of the final demise of the totalitarian system. Ian Johnson, writing in *The New York Review of Books*, called the Chinese edition of *Tombstone* "groundbreaking . . . One of the most important books to come out of China in recent years." America, regional cooperation has been stagnating. Studying Europe and Latin America within a broader comparative perspective, this volume provides an analytical framework to assess stress factors facing regionalism. The contributors explore how economic and financial crises, security challenges, identity questions raised by immigration and refugee flows, the rise of populism, and shifting regional and global power dynamics have had an impact on regionalism; whether the EU crisis has had repercussions for regionalisms in other parts of the world; and to what extent the impact of stress factors is mediated by characteristics of the region that may provide elements of resilience. Written by specialists from Europe and Latin America with a shared interest in the new field of comparative regionalism, this book will be an invaluable resource for students, scholars and policy specialists in regional integration, European politics, EU studies, Latin American studies, and international relations and international law more generally.

need to stay curious enough about the world to actually change it. I've never felt so hopeful about what I don't know." —Brené Brown, Ph.D., #1 New York Times bestselling author of *Dare to Lead* The bestselling author of *Give and Take* and *Originals* examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of *Originals* and *Give and Take*, he makes it one of his guiding principles

to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. *Think Again* reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.
