This book uses a broadsheet print of the martyrdom of the Carthusians of the London Charterhouse during the reign of Henry VIII as a springboard to investigate several aspects of the Counter Reformation. Through an in-depth investigation of the text and images, Anne Dillon provides a lively account that connects Michelangelo, Cardinal Pole, Mary Tudor and Pope Julius III, and weaves them into a wider discussion of martyrology, polemic and the Catholic community in England and beyond.

How can we read crime scenes through photography? Making use of micro-histories of domestic murder and crime scene photographs made available for the first time, Alexa Neale provides a highly original exploration of what crime scenes can tell us about the significance of expectations of domesticity, class, gender, race, privacy and relationships in twentieth-century Britain. With 10 case studies and 30 black and white images, *Photographing Crime Scenes in 20th-Century London* will take you inside the homes that were murder crime scenes to read their geographical and symbolic meanings in the light of the development of crime scene photography, forensic analysis and psychological testing. In doing so, it reveals how photographs of domestic objects and spaces were often used to recreate a narrative for the murder based on the defendant's perceived identity rather than to prove if they committed the crime at all. Bringing the history of crime, British social and cultural history and the history of forensic photography to the analysis of the crime scene, this study offers fascinating details on the changing public and private lives of Londoners in the 20th century.

As one of the UK's leading forensic scientists, Mike Silverman has helped to identify and convict dozens of murderers, rapists, armed robbers, burglars and muggers, thanks to the evidence they – or their victims – unwittingly left behind at the scenes of their crimes. Mike Silverman started his career in the days when fingerprints were still kept on card files and DNA profiling was just a pipe dream, so *Written in Blood* is more than just a casebook – it is also a definitive history of the development of forensic science over the course of the past thirty-five years. From collecting blood samples at gangland executions to investigating forensic science failings, including in the murders of Rachel Nickell and Damilola Taylor, Mike Silverman's unique career provides a fascinating insight into the ways forensic science is used to help solve real-life crimes. Packed with genuine crime scene photographs and original sketches, *Written in Blood* is the ultimate insider's account of the fascinating world of forensic science.

Contemporary police service delivery and performance are complex phenomena. Law enforcement, particularly at the local level, must therefore face the additional challenges of globalization, cybercrime, counter-terrorism and calls for reform, at a time when extreme budgetary constraints are being implemented. Policing operations encompass multiple critical tasks and responsibilities not routinely measured and evaluated, such as response to incidents involving medical assistance, homelessness, mental illness, community engagement, and neighborhood problem-solving endeavors. This volume aims to provide government, criminal justice and policing administrators, policy makers and criminal justice scholars and researchers with comprehensive analyses of the critical issues impacting the challenges inherent in

providing effectual public safety, security and service, all from a global perspective. It takes into account popular criticism, extreme budgetary constraints, and the relatively novel and overwhelming challenges of terrorism and cybercrime. The book merges study and practice to identify avenues to best serve community interests, ensure organizational success, and enhance public confidence in policing and in rule of law.

Since the 1990s, there has been a growing concern about the resurgence of extremist and radical movements in the Western world. Although a variety of challenges to the liberal democratic order have emerged, the main focus of concern among academics, policy-makers and practitioners within Europe and beyond has been on the growth and activities of Islamists and to a lesser extent the extreme right. However, these forms of extremism are seldom placed alongside each other, and in a manner that is sensitive to both the causes and consequences of extremist mobilization. This book presents new empirical research on the causes of these two "new" (tm) extremisms in 21st Century Britain and the appropriate responses to it by both the state and civil society. Both forms of extremism pose vital questions for those concerned with the development of a more cohesive and stable society. Unlike many studies, this volume adopts a holistic approach, bringing together experts from a variety of disciplines to examine the factors that cause support and the potential policy responses, including key questions such as: What is the current level of support for Islamism and right-wing extremism? Who votes for extreme right parties such as the BNP in modern Britain and, despite its recent gains, why has the extreme right achieved only limited success? What are the steps of recruitment into radical violent takfiri jihadism? How effective are current responses to Islamism and the extreme right, such as those offered by Preventing Violent

Extremism (PVE), wider public policy and policing? What is the potential role of political actors, media and civil society in responding to the extremist challenge? Challenging broad assumptions and bringing together leading scholars in this rapidly developing field, this work is essential reading for all those with an interest in terrorism, fascism, political extremism, social cohesion and the future of race relations.

This book investigates everyday practices of intelligence cooperation in anti-terrorism matters, with a specific focus on the relationship between Europe and Britain. The volume examines the effective involvement of British anti-terrorism efforts in European cooperation arrangements, which until now have been overshadowed by the UK-US 'special relationship' and by political debates that overstate the divide between Britain and continental Europe. In arguing that British intelligence has always had a European dimension, it provides a distinct perspective to the study of intelligence cooperation and the role of British intelligence therein. Mobilizing a 'field theory' approach, the book provides an original contribution to the understanding of intelligence cooperation by investigating everyday bureaucratic practices of 'ground-level' security professionals and police forces, embedded in a European 'field' structured around the exchange of anti-terror intelligence. It also accounts for the drivers behind cooperation by using 'field analysis,' which explains the trajectory and positioning of actors according to their 'capitals' rather than necessities dictated by threats or state decisions. This book will be of much interest to students of Security Studies, International Political Sociology, Intelligence Studies, and International Relations in general.
