This volume captures the spirit of collaboration and innovation that its authors bring into the classroom, as well as to groundbreaking undergraduate programs and initiatives. Coming from diverse points of view and twenty different disciplines, the contributors illuminate the often perplexing debates about what matters most in higher education today. Each chapter tells a unique story about creating vital pedagogical arenas that have the potential to transform teaching and learning for both faculty and students. These exploratory spaces include courses under construction, cross-college and interdisciplinary collaborations, general education reform initiatives, and fresh perspectives on student support services, faculty development, freshman learning communities, writing across the curriculum, on-line degree initiatives, and teaching and learning centers. All these spaces lend shape to an over-arching, system-wide project bringing together the often disconnected silos of undergraduate education at The City University of New York (CUNY), America's largest urban public university system. Since 2003, the University's Office of Undergraduate Education has sponsored coordinated efforts to study and improve teaching and learning for the system's 260,000 undergraduates enrolled at 18 distinct colleges. The contributors to this volume present a broad spectrum of administrative and faculty perspectives that have informed the process of transforming the undergraduate experience. Combined, the voices in these chapters create a much-needed exploratory space for the interplay of ideas about how teaching and learning need to matter in evolving notions of higher education in the twenty-first century. In addition, the text has wider social relevance as an in-depth exploration of change and reform in a large public institution.

This text includes a rich array of exercises, cases, and applied materials such as the Kouzes and Posner Leadership Practices Inventory and Pfeiffer Annual Edition exercises. This exciting new introductory text offers a new perspective on teaching organizational behavior by framing the organization as the vehicle for implementing strategic management processes, while also breaking down how the different components of an organization are designed to work together. Unlike traditional OB texts, Organizational Behavior Today emphasizes a "big picture" examination of how organizations function in a Darwinian world, in which the primary goal of an organization is survival. The book introduces readers to the three stages of the strategic management process: strategy formulation, strategy implementation and strategic control, thereby linking the organization to its mission, vision and strategic goals. Essential OB concepts such as work processes, policy, worker behavior, reward system, change management and leadership development are covered, and the book also highlights the impact of technology on organizations. To support student comprehension and bring the study of OB to life, the book includes vignettes highlighting real organizations who have implemented OB processes, either successfully or unsuccessfully. End-of-chapter questions ensure that students can apply the information learned effectively. Accompanying online resources for this text, available at [www.routledge.com/9780367695095](http://www.routledge.com/9780367695095), include a curated list of relevant video content.
