Complications of Long-term Dialysis Edwina Brown,Edwina A. Brown,Patrick S. Parfrey,1999 As the dialysis population grows, the number of survivors in the second and even third decade of dialysis also increase. These long term survivors face not only the universal complications of dialysis such as anemia and hyperparathyroidism but also the consequences of these complications such as the long term cardiovascular problems. They are also subjected to many years of accumulation of uremic metabolites resulting in conditions unique to this group of patients, the best example being

dialysis amyloid. This book not only describes the causes of morbidity and mortality during the second decade of dialysis but also how these complications can be prevented or minimised. As you make your bed so you must lie upon it. Survival and quality of life in the second decade and beyond dialysis cannot be divorced from events in the first decade. The longest survival is currently in those patients who have dialysed long hours with tight control of fluid status. Modern dialysis practice and its impact on survival - CAPD, short hour hemodialysis, biocompatible membranes are all discussed in this book.

Core Curriculum for Nephrology Nursing Caroline S. Counts,2008

Core Curriculum for Nephrology Nursing Caroline Counts,Glenda Payne,Tamara Kear,Donna Bednarski,Norma Gomez,2015-04-01 Chapter 1 focuses on professional issues in nephrology nursing and is a new addition to the Core Curriculum. The first chapter places emphasis on nursing leadership and management. All nephrology nurses are managers and leaders, whether or not they maintain a management position. All will face ethical dilemmas; all will be involved in providing a safe clinical environment; all will take part in assessing quality care; and all are expected to perform as a professional with an understanding of what that entails.Chapter 2 concentrates on research and evidence-based practice and what it means to nephrology nurses. It offers information on sites where valuable statistics and further information can be obtained.Chapter 3 explains the political process and the importance for all of us to get involved. It is not as difficult as one might think. Chapter 4 motivates the reader to prepare for emergencies. As too many of us know, emergencies and disasters do happen, and having plans in place prior to the event can help lessen the residual impact.

This edition reflects the latest guidelines of the National Kidney Foundation's Kidney Disease Outcomes Quality Initiative (KDOQI) on hemodialysis and peritoneal dialysis adequacy and on nutrition. New chapters cover chronic kidney disease management in predialysis patients, frequent daily or nocturnal hemodialysis, and hemodiafiltration. Chapters on venous and arteriovenous access have been completely revised. Each chapter provides references to relevant Web sites.

Core Curriculum for Nephrology Nursing Caroline Counts, Helen Williams, 2015-04-01 Acute is described on MedicineNet.com as an illness with an abrupt onset that is often of short duration, rapidly progressive, and in need of urgent care. Once the symptoms appear, they can change or worsen swiftly. Synonyms of acute include severe, critical, drastic, dire, dreadful, terrible, awful, grave, bad, serious, desperate, and dangerous. The nurses who work with patients with acute kidney injury (AKI) know these descriptions are accurate. They also know that there is enough information to warrant a separate module devoted to AKI. The work of Helen Williams, who served as the module's editor, is greatly appreciated. This module offers information on managing an acute care program, causes of AKI, and the nutritional needs of the patient. Hemodialysis, water treatment, peritoneal dialysis, continuous renal replacement therapy (CRRT), slow low-efficiency daily dialysis (SLEDD), and therapeutic apheresis are all topics addressed in this module. There is also a new chapter that nurses in the chronic setting will find useful; it addresses the patient who has a ventricular assist device (VAD). More patients with VADs are requiring dialysis, yet there has been little published on this subject.
