Production and manufacturing management since the 1980s has absorbed in rapid succession several new production management concepts: manufacturing strategy, focused factory, just-in-time manufacturing, concurrent engineering, total quality management, supply chain management, flexible manufacturing systems, lean production, mass customization, and more. With the increasing globalization of manufacturing, the field will continue to expand. This encyclopedia's audience includes anyone concerned with manufacturing techniques, methods, and manufacturing decisions.

The ninth edition of Kinney/Raiborn's COST ACCOUNTING: FOUNDATIONS AND EVOLUTIONS provides in-depth coverage of current cost management concepts and procedures in a straightforward and reader-friendly framework. The clean, concise presentation of materials and the updated illustrations reinforce and clarify the topics that readers traditionally struggle with most. In addition, real-world examples and ethical coverage are woven into the text so readers immediately see the relevance of the cost accountant's role in managerial decisions and learn to go beyond the numbers and think critically. Ensure mastery of the procedural and decision-making skills needed for future success with the Comprehensive Review Module, an array of newly improved end of chapter assignments, and the powerful, newly enhanced CengageNOW online learning and teaching system. ? Service firms have high overhead costs which are difficult to assign to individual services. To bring transparency to their value chain, they need costing approaches that help them find their own improvements. Markus B. Baum explores current theory and practice of value chain approaches and cost accounting to develop a costing approach with a suitable instrument for the allocation of fixed and overhead costs for a service firm. He describes the service business costing (SBC) approach. This hybrid-costing model has a hierarchical structure in terms of consolidation and allocates cost and revenues on the lowest hierarchical level possible to ensure that all costs and income are assigned to activities from which they originated.
