The Myth of Continents Martin W. Lewis,Kären Wigen,1997 Despite the recent surge of interest in geographical concepts and ideas, most social, cultural, and political studies are riddled with unexamined spatial assumptions. The Myth of Continents initiates a much-needed consideration of this state of affairs. Through a wide-ranging analysis of such metageographical constructs as East, West, Europe, and Asia, Lewis and Wigen provide provocative insights into the nature and significance of the ways we usually divide up the world. Moreover, they do so in an engaging and highly readable style. Readers of The Myth of Continents will never again see the world regions in quite the same way.--Alexander B. Murphy, author of The Regional Dynamics of Language Differentiation in Belgium An exciting, thoughtful, engaging, innovative book that demonstrates the need to reexamine commonly held assumptions about the world's division into continents, East/West, First/Second/Third World, etc. Readers will be drawn to its 'big-think' quality of shattering commonly held assumptions and to its up-to-the-minute contemporary feel.--Benjamin Orlove, coeditor of State, Capital, and Rural Society: Anthropological Perspectives on Political Economy in Mexico and the Andes An important and long overdue housecleaning of old geographical concepts, based upon an impressively wide reading of regional literatures.--Edmund Burke III, editor of Struggle and Survival in the Modern Middle East

China's Second Continent Howard W. French,2015-02-03 A New York Times Notable Book Chinese immigrants of the recent past and unfolding twenty-first century are in search of the African dream. So explains indefatigable traveler Howard

W. French, prize-winning investigative journalist and former New York Times bureau chief in Africa and China, in the definitive account of this seismic geopolitical development. China's burgeoning presence in Africa is already shaping, and reshaping, the future of millions of people. From Liberia to Senegal to Mozambique, in creaky trucks and by back roads, French introduces us to the characters who make up China's dogged emigrant population: entrepreneurs singlehandedly reshaping African infrastructure, and less-lucky migrants barely scraping by but still convinced of Africa's opportunities. French's acute observations offer illuminating insight into the most pressing unknowns of modern Sino-African relations: Why China is making these cultural and economic incursions into the continent; what Africa's role is in this equation; and what the ramifications for both parties and their people—and the watching world—will be in the foreseeable future. The Continent Keira Drake, 2018-03-27 "Have we really come so far, when a tour of the Continent is so desirable a thing? We've traded our swords for treaties, our daggers for promises—but our thirst for violence has never been quelled. And that's the crux of it—it can't be quelled. It's human nature." For her sixteenth birthday, Vaela Sun receives the most coveted gift in all the Spire—a trip to the Continent. It seems an unlikely destination for a holiday: a cold, desolate land where two nations remain perpetually locked in combat. Most citizens lucky enough to tour the Continent do so to observe the spectacle and violence of battle, a thing long vanished in the peaceful realm of the Spire. For Vaela, the war holds little interest. As a talented apprentice cartographer and a descendant of the Continent herself, she sees the journey as a dream come true: a once-in-a-lifetime opportunity to improve upon the maps she's drawn of this vast, frozen land. But Vaela's dream all too quickly turns to nightmare as the journey brings her face-to-face with the brutal reality of a war she's only read about. Observing from the safety of a heli-plane, Vaela is forever changed by the sight of the bloody battle being waged far beneath her. And when a tragic accident leaves her stranded on the Continent, Vaela finds herself much closer to danger than she'd ever imagined—and with an entirely new perspective as to what war truly means. Starving, alone and lost in the middle of a war zone, Vaela must try to find a way home—but first, she must survive.

Africa Is a Continent Not a Country Sylvester I. Okoro, Sylvester I. Okoro Mba, 2012-11 Is Africa a continent or country? This book helps to answer this seemingly question. Africa Is A Continent, Not A Country book is designed to get readers thinking about their knowledge of Africa. It is a quick read. You can finish the book in less time. Africa is the 2nd largest continent besides Asia. Many readers would agree with me that they know little about Africa except what the elite western media principally focus on developmental challenges and crisis in some African countries. Not only that, many of these western media including some politicians collectively use Africa as if it is just one country. Consequently, this book is aimed at letting its readers know that Africa is a 54 countries continent. Each country has its successes and challenges like any other country. After reading this book, you will be able to know: - Names of 54 different African countries and when they

became politically independent. - Names of some notable pre and post-independence African Leaders. - Map of Africa with each country. - Some causes of arm conflict in Africa. - Africa hosted World soccer (football) Championship in South Africa in 2010. - That the world's largest desert is Africa's Sahara. - Africa is the second largest continent, next to Asia. - Africa's longest river Nile is the world's longest river.

List of Countries Arranged by Continents and Regions L. P. D. Gertenbach,1966

The Bright Continent Dayo Olopade,2014-03-04 “For anyone who wants to understand how the African economy really works, The Bright Continent is a good place to start” (Reuters). Dayo Olopade knew from personal experience that Western news reports on conflict, disease, and poverty obscure the true story of modern Africa. And so she crossed sub-Saharan Africa to document how ordinary people deal with their daily challenges. She found what cable news ignores: a continent of ambitious reformers and young social entrepreneurs driven by kanju—creativity born of African difficulty. It’s a trait found in pioneers like Kenneth Nnebue, who turned cheap VHS tapes into the multimillion-dollar film industry Nollywood. Or

Ushahidi, a technology collective that crowdsources citizen activism and disaster relief. A shining counterpoint to conventional wisdom, *The Bright Continent* rewrites Africa's challenges as opportunities to innovate, and celebrates a history of doing more with less as a powerful model for the rest of the world. "[An] upbeat study of development in Africa . . . The book is written more in wonder at African ingenuity than in anger at foreign incomprehension." —The New Yorker "A hopeful narrative about a continent on the rise." —The New York Times Book Review

Our Continent, Our Future P. Thandika Mkandawire, Charles Chukwuma Soludo, 2014-05-14 *Our Continent, Our Future* presents the emerging African perspective on this complex issue. The authors use as background their own extensive experience and a collection of 30 individual studies, 25 of which were from African economists, to summarize this African perspective and articulate a path for the future. They underscore the need to be sensitive to each country's unique history and current condition. They argue for a broader policy agenda and for a much more active role for the state within what is largely a market economy. Finally, they stress that Africa must, and can, compete in an increasingly globalized world and, perhaps most importantly, that Africans must assume the leading role in defining the continent's development agenda.
