Leenaert, Tobias

Cowspiracy. Il segreto della sostenibilità. Ripensare la nostra dieta per trasformare il mondo Kip Andersen, Keegan Kuhn, 2016

Cowspiracy Keegan Kuhn, Kip Andersen, 2016-12-23 Cowspiracy è considerato l'erede spirituale di film come Fast Food Nation e Food, Inc., che hanno puntato i riflettori sul business delle industrie della carne, delle uova e dei latticini. Kip Andersen e Keegan Kuhn partono da una domanda molto semplice: se ogni anno la zootecnia produce più emissioni di gas serra di tutti i trasporti messi insieme, inquinando o distruggendo gli habitat, per non parlare della crudeltà che infligge a 70 miliardi di esseri senzienti, perché le principali associazioni ambientaliste di tutto il mondo (da Greenpeace a Oceana) non ne parlano? In questo libro, i due registi hanno raccolto tutto ciò che non sono riusciti a catturare con le videocamere o tralasciato dal montaggio finale: le testimonianze complete dei personaggi intervistati (Lisa Agabian, di Sea Shepherd; gli scrittori Michael Pollan e Will Tuttle); dati aggiornati; tutto ciò che si nasconde dietro al business dell'allevamento animale e dell'industria della carne e di quella casearia; consigli per adottare uno stile di vita realmente sostenibile e per ridurre la propria impronta ecologica sul pianeta.

In viaggio per Veganville Leenaert Tobias, 2021-11-02 Veganville è una città ideale costruita sulla cima di una montagna, che accoglie chiunque voglia dare il proprio contributo per rendere il mondo un posto migliore. Un passo alla volta. Con chiarezza, pragmatismo e un pizzico di provocazione, Tobias Leenaert propone un nuovo modo di pensare all'attivismo animalista, più inclusivo e flessibile, che coinvolga tutti, vegani di lunga data, vegetariani, onnivori, singoli individui, organizzazioni e aziende. Solo collaborando e confrontandoci senza dogmatismo, possiamo unire le forze, aiutare gli animali e fare del bene al pianeta. Ricco di informazioni, consigli, esempi e riflessioni, *In viaggio per Veganville* è una vera e propria chiamata all'azione collettiva. Cowspiracy Keegan Kuhn,Kip Andersen,2016-10-04 Discover the biggest issue in conservation today. This companion to the documentary Cowspiracy explores the impacts of the most environmentally destructive industry on the planet: animal agriculture. The award-winning documentary Cowspiracy presents alarming truths about the effects of animal agriculture on the planet. One of the leading causes of deforestation, greenhouse gas production, water use, species extinction, ocean dead-zones, and a host of other ills, animal agriculture is a major threat to the future of all species, and one of the environmental industry’s best-kept secrets. The Sustainability Secret expands upon Cowspiracy in every way. Journey with authors Kip Andersen and Keegan Kuhn as they discover one shocking statistic after another and interview leading businesses, environmental organizations, and political groups about the subject of animal agriculture and its disastrous effects. Extended transcripts, updated statistics, tips on becoming vegan, and comprehensive reading lists provide an in-depth overview of this planetary crisis and demonstrate effective ways to offset the damage through personal dietary choices. Firmly rooted in science and supporting research, The Sustainability Secret reveals the absolutely devastating environmental impact of the meat and dairy industry and offers a path to global sustainability for a growing population

The China Study: Revised and Expanded Edition T. Colin Campbell,Thomas M. Campbell, II,2016-12-27 The revised and expanded edition of the bestseller that changed millions of lives The science is clear. The results are unmistakable. You can dramatically reduce your risk of cancer, heart disease, and diabetes just by changing your diet. More than 30 years ago, nutrition researcher T. Colin Campbell and his team at Cornell, in partnership with teams in China and England, embarked upon the China Study, the most comprehensive study ever undertaken of the relationship between diet and the risk of developing disease. What they found when combined with findings in Colin's laboratory, opened their eyes to the dangers of a diet high in animal protein and the unparalleled health benefits of a whole foods, plant-based diet. In 2005, Colin and his son Tom, now a physician, shared those findings with the world in *The China Study*, hailed as one of the most important books about diet and health ever written. Featuring brand new content, this heavily expanded edition of Colin and Tom's groundbreaking book includes the latest undeniable evidence of the power of a plant-based diet, plus updated information

about the changing medical system and how patients stand to benefit from a surging interest in plant-based nutrition. The China Study—Revised and Expanded Edition presents a clear and concise message of hope as it dispels a multitude of health myths and misinformation. The basic message is clear. The key to a long, healthy life lies in three things: breakfast, lunch, and dinner.

The Men With the Pink Triangle Heinz Heger, 2023-03-07 For decades, history ignored the Nazi persecution of gay people. Only with the rise of the gay movement in the 1970s did historians finally recognize that gay people, like Jews and others deemed “undesirable,” suffered enormously at the hands of the Nazi regime. Of the few who survived the concentration camps, even fewer ever came forward to tell their stories. This heart wrenchingly vivid account of one man's arrest and imprisonment by the Nazis for the crime of homosexuality, now with a new preface by Sarah Schulman, remains an essential contribution to gay history and our understanding of historical fascism, as well as a remarkable and complex story of survival and identity.

Hidden: Animals in the Anthropocene Jo-Anne McArthur, Keith Wilson, 2020-11-17 A collection of stunning images from some of the world's leading photographers of animals in the human environment. HIDDEN: Animals in the Anthropocene is an unflinching book of photography about our conflict with non-human animals around the globe. Through the lenses of thirty award-winning photojournalists, HIDDEN shines a light on the invisible animals in our lives: those with whom we have a close relationship and yet fail to see. The animals we eat and wear; the animals we use for research, work, and for entertainment; the animals we sacrifice in the name of tradition and religion. HIDDEN is a historical document, a memorial, and an indictment of what is and should never again be. Showcased by award-winning designer David Griffin, HIDDEN represents the work of thirty photojournalists who have documented--and continue to document--animal stories. Their exhaustive and in-depth work has resulted in some of the most compelling and historic images of animals ever seen. Among them are (in alphabetical order): Aaron Gekoski, Aitor Garmendia, Amy Jones, Andrew Skowron, Britta Jaschinski, Daniel Beltrá, Djurattsalliansen, Francesco Pistilli, Jan van Ijken, Joan de la Malla, Jo-Anne McArthur, Jose Valle, Kelly Guerin, Kristo Muurimaa, Konrad Lozinski, Louise Jorgensen, Luis Tato, Murdo MacLeod, Paul Hilton, Sabine Grootendorst, Selene Magnolia, Stefano Belacchi, Tamara Kenneally, and Timo Stammberger. The photojournalists featured in Hidden have entered some of the darkest, most unsettling places in the world. The images they have captured are a searing reminder of our unpardonable behavior towards animals and will serve as beacons of change for years to come.--Joaquin Phoenix, actor I am, quite simply, in awe of these photographers. In a way, they are like war photographers, except witness to a war that so many people choose to suppress that exists. This takes enormous inner strength and bloody-minded determination, because they cannot save any of the animals that they photograph; they can only hope that their photos will help illuminate the mass

extermination that unfolds every second of every day across the planet. To me, they are heroes. Not just for one day, but over and over and over again.--Nick Brandt, photographer

Beyond Beef Jeremy Rifkin, 1994 In the first three parts of this book an exploration of the historical role of cattle in Western civilization is given. Part four examines the human impact of the modern cattle complex and the world beef culture. The range of environmental threats that have been created, in part, by the modern cattle complex is described in part five. Part six examines the psychology of cattle complexes and the politics of beef eating in Western society. The author hopes that this book will contribute to moving our society beyond beef

Consumer Culture Roberta Sassatelli, 2007-05-17 'Roberta Sassatelli has written a thorough and wide-ranging synthetic account of social scientific research on consumption which will set the standard for the second generation of textbooks on cultures of consumption. Consumer Culture is an appealing and lucid introduction to the major themes - historical and contemporary, theoretical and empirical - surrounding the growth, nature and consequences of consumer culture. It will be of professional interest as well as serving a student audience' - Alan Warde, University of Manchester Showing the cultural and institutional processes that have brought the notion of the 'consumer' to life, this book guides the reader on a comprehensive journey through the history of how we have come to understand ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within. While rooted in sociology, Sassatelli draws on the traditions of history, anthropology, geography and economics to give: - A history of the rise of consumer culture around the world; - A richly illustrated analysis of theory from neo-classical economics, to critical theory, to theories of practice and ritual de-commodification; and - A compelling discussion of the politics underlying our consumption practices. An exemplary introduction to the history and theory of consumer culture, this book provides nuanced answers to some of the most central questions of our time.

The End of Ice Dahr Jamail, 2020-03-10 Finalist for the 2020 PEN / E.O. Wilson Literary Science Writing Award Acclaimed on its hardcover publication, a global journey that reminds us of how magical the planet we're about to lose really is (Bill McKibben) With a new epilogue by the author After nearly a decade overseas as a war reporter, the acclaimed journalist Dahr Jamail returned to America to renew his passion for mountaineering, only to find that the slopes he had once climbed have been irrevocably changed by climate disruption. In response, Jamail embarks on a journey to the geographical front lines of this crisis—from Alaska to Australia's Great Barrier Reef, via the Amazon rainforest—in order to discover the consequences to nature and to humans of the loss of ice. In *The End of Ice*, we follow Jamail as he scales Denali, the highest peak in North America, dives in the warm crystal waters of the Pacific only to find ghostly coral reefs, and explores the tundra of St. Paul Island where he meets the last subsistence seal hunters of the Bering Sea and witnesses its melting glaciers. Accompanied by climate scientists and people whose families have fished, farmed, and lived in the areas he visits for

centuries, Jamail begins to accept the fact that Earth, most likely, is in a hospice situation. Ironically, this allows him to renew his passion for the planet's wild places, cherishing Earth in a way he has never been able to before. Like no other book, *The End of Ice* offers a firsthand chronicle—including photographs throughout of Jamail on his journey across the world—of the catastrophic reality of our situation and the incalculable necessity of relishing this vulnerable, fragile planet while we still can.

Authenticity James H. Gilmore, B. Joseph Pine II, 2007-10-18 Contrived. Disingenuous. Phony. Inauthentic. Do your customers use any of these words to describe what you sell—or how you sell it? If so, welcome to the club. Inundated by fakes and sophisticated counterfeits, people increasingly see the world in terms of real or fake. They would rather buy something real from someone genuine rather than something fake from some phony. When deciding to buy, consumers judge an offering's (and a company's) authenticity as much as—if not more than—price, quality, and availability. In *Authenticity*, James H. Gilmore and B. Joseph Pine II argue that to trounce rivals companies must grasp, manage, and excel at rendering authenticity. Through examples from a wide array of industries as well as government, nonprofit, education, and religious sectors, the authors show how to manage customers' perception of authenticity by: recognizing how businesses fake it; appealing to the five different genres of authenticity; charting how to be true to self and what you say you are; and crafting and implementing business strategies for rendering authenticity. The first to explore what authenticity really means for businesses and how companies can approach it both thoughtfully and thoroughly, this book is a must-read for any organization seeking to fulfill consumers' intensifying demand for the real deal.

Fair Trade Coffee Gavin Fridell, 2007-01-01 Using case studies from Mexico and Canada, this book examines the fair trade coffee movement at both the global and local level, assessing its effectiveness and locating it within political and development theory. It provides an analysis of fair trade coffee in the context of global trade.

Merchants of Doubt Naomi Oreskes, Erik M. Conway, 2011-10-03 The U.S. scientific community has long led the world in research on such areas as public health, environmental science, and issues affecting quality of life. These scientists have produced landmark studies on the dangers of DDT, tobacco smoke, acid rain, and global warming. But at the same time, a small yet potent subset of this community leads the world in vehement denial of these dangers. *Merchants of Doubt* tells the story of how a loose-knit group of high-level scientists and scientific advisers, with deep connections in politics and industry, ran effective campaigns to mislead the public and deny well-established scientific knowledge over four decades. Remarkably, the same individuals surface repeatedly—some of the same figures who have claimed that the science of global warming is not settled denied the truth of studies linking smoking to lung cancer, coal smoke to acid rain, and CFCs to the ozone hole. Doubt is our product, wrote one tobacco executive. These experts supplied it. Naomi Oreskes and Erik M. Conway, historians of science, roll back the rug on this dark corner of the American scientific community, showing how ideology and corporate

interests, aided by a too-compliant media, have skewed public understanding of some of the most pressing issues of our era.

Javatrekker Dean Cycon, 2007-10-17 In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. In *Javatrekker: Dispatches from the World of Fair Trade Coffee*, a unique hybrid of Fair Trade business, adventure travel, and cultural anthropology, author Dean Cycon brings readers face-to-face with the real people who make our morning coffee ritual possible. Second only to oil in terms of its value, the coffee trade is complex with several levels of middlemen removing the 28 million growers in fifty distant countries far from you and your morning cup. And, according to Cycon, 99 percent of the people involved in the coffee economy have never been to a coffee village. They let advertising and images from the major coffee companies create their worldview. Cycon changes that in this compelling book, taking the reader on a tour of ten countries in nine chapters through his passionate eye and unique perspective. Cycon, who is himself an amalgam-equal parts entrepreneur, activist, and mischievous explorer-has traveled extensively throughout the world's tropical coffeelands, and shows readers places and people that few if any outsiders have ever seen. Along the way, readers come to realize the promise and hope offered by sustainable business principles and the products derived from cooperation, fair pricing, and profit sharing. Cycon introduces us to the Mamos of Colombia-holy men who believe they are literally holding the world together-despite the severe effects of climate change caused by us, their younger brothers. He takes us on a trip through an ancient forest in Ethiopia where many believe that coffee was first discovered 1,500 years ago by the goatherd Kaldi and his animals. And readers learn of Mexico's infamous Death Train, which transported countless immigrants from Central America northward to the U.S. border, but took a horrifying toll in lost lives and limbs. Rich with stories of people, landscapes, and customs, *Javatrekker* offers a deep appreciation and understanding of the global trade and culture of coffee. In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. What is Fair Trade Coffee? Coffee prices paid to the farmer are based on the international commodity price for coffee (the C price) and the quality premium each farmer negotiates. Fair Trade provides an internationally determined minimum floor price when the C plus premium sinks below \$1.26 per pound for conventional and \$1.41 for organics (that's us!). As important as price, Fair Trade works with small farmers to create democratic cooperatives that insure fair dealing, accountability and transparency in trade transactions. In an industry where the farmer is traditionally ripped off by a host of middlemen, this is tremendously important. Cooperatives are examined by the Fairtrade Labeling Organization (FLO), or the International Fair Trade Association (IFAT), European NGOs, for democratic process and transparency. Those that pass are listed on the FLO Registry or become IFAT members. Cooperatives provide important resources and organization to small farmers in the form of technical assistance for crop and harvest improvement, efficiencies in processing and shipping,

strength in negotiation and an array of needed social services, such as health care and credit. Fair Trade also requires pre-financing of up to sixty percent of the value of the contract, if the farmers ask for it. Several groups, such as Ecologic and Green Development Fund have created funds for pre-finance lending.

Six Degrees Mark Lynas,2008 In astonishing and unflinching detail, a noted science journalist explains how Earth's climate will be impacted with every degree of increase in global warming--and what can be done about it now.

Science | Environment | Health Albert Zeyer,Regula Kyburz-Graber,2014-06-12 Health and the environment are important learning areas in science education and their significance is growing. Not only do they have high social relevance, but they are also close to students' interests and needs. They provide many opportunities to unlock science with questions that are personally relevant to boys and girls and that inspire them to engage in science. This book contains a selection of papers from prominent professionals in science, health and environmental education, who reflect on science education, each from their specific point of view. The core idea is to present well-founded perspectives on how science education may benefit from challenges stemming from both health and environmental education. Specific reasons are discussed as to why these two areas are particularly legitimized to challenge science education, and their potential impact on a revision of science education is evaluated. A new pedagogy for science|environment|health that yields interesting and relevant science education for students and teachers, and addresses the grand challenges of this century: what an attractive and rewarding project! The book will motivate teachers, teacher educators and science education researchers to take part in this on-going project.

Terra Madre Carlo Petrini,2009 More than twenty years ago, when Italian Carlo Petrini learned that McDonald's wanted to erect its golden arches next to the Spanish Steps in Rome, he developed an impassioned response: he helped found the Slow Food movement. Since then, Slow Food has become a worldwide phenomenon, inspiring the likes of Alice Waters and Michael Pollan. Now, it's time to take the work of changing the way people grow, distribute, and consume food to a new level. In Terra Madre, Petrini shows us a solution in the thousands of newly formed local alliances between food producers and food consumers. And he proposes expanding these alliances-connecting regional food communities around the world to promote good, clean, and fair food. The end goal is a world in which communities are entitled to food sovereignty-allowed to choose not only what they want to grow and eat, but also how they produce and distribute it.
