Blindsight is the Hugo Award–nominated novel by Peter Watts, "a hard science fiction writer through and through and one of the very best alive" (The Globe and Mail). Two months have past since a myriad of alien objects clenched about the Earth, screaming as they burned. The heavens have been silent since—until a derelict space probe hears whispers from a distant comet. Something talks out there: but not to us. Who should we send to meet the alien, when the alien doesn't want to meet? Send a linguist with multiple-personality disorder and a biologist so spliced with machinery that he can't feel his own flesh. Send a pacifist warrior and a vampire recalled from the grave by the voodoo of paleogenetics. Send a man with half his mind gone since childhood. Send them to the edge of the solar system, praying you can trust such freaks and monsters with the fate of a world. You fear they may be more alien than the thing they've been sent to find—but you'd give anything for that to be true, if you knew what was waiting for them. . . . Author of the international bestsellers *The Diabetes Code* and *The Obesity Code* Dr. Jason Fung returns with an eye-opening biography of cancer in which he offers a radical new paradigm for understanding cancer—and issues a call to action for reducing risk moving

forward. Our understanding of cancer is slowly undergoing a revolution, allowing for the development of more effective treatments. For the first time ever, the death rate from cancer is showing a steady decline . . . but the “War on Cancer” has hardly been won. In *The Cancer Code*, Dr. Jason Fung offers a revolutionary new understanding of this invasive, often fatal disease—what it is, how it manifests, and why it is so challenging to treat. In this rousing narrative, Dr. Fung identifies the medical community’s many missteps in cancer research—in particular, its focus on genetics, or what he terms the “seed” of cancer, at the expense of examining the “soil,” or the conditions under which cancer flourishes. Dr. Fung—whose groundbreaking work in the treatment of obesity and diabetes has won him international acclaim—suggests that the primary disease pathway of cancer is caused by the dysregulation of insulin. In fact, obesity and type 2 diabetes significantly increase an individual’s risk of cancer. In this accessible read, Dr. Fung provides a new paradigm for dealing with cancer, with recommendations for what we can do to create a hostile soil for this dangerous seed. One such strategy is intermittent fasting, which reduces blood glucose, lowering insulin levels. Another, eliminating intake of insulin-stimulating foods, such as sugar and refined carbohydrates. For hundreds of years, cancer has been portrayed as a foreign invader we’ve been powerless to stop. By reshaping our view of cancer as an internal uprising of our own healthy cells, we can begin to take back control. The seed of cancer may exist in all of us, but the power to change the soil is in our hands.

NY Times best-selling author Dr. Michael Roizen reveals how the food choices you make each day--and when you make them--can affect your health, your energy, your sex life, your waistline, your attitude, and the way you age. What if eating two cups of blueberries a day could prevent cancer? If drinking a kale-infused smoothie could counteract missing an hour's worth of sleep? When is the right time of day to eat that chocolate chip cookie? And would you actually drink that glass of water if it meant skipping the gym? This revolutionary guide reveals how to use food to enhance our personal and professional lives--and increase longevity to boot. *What to Eat When* is not a diet book. Instead, acclaimed internist Michael Roizen and preventive medicine specialist Michael Crupain offer readers choices that benefit them the most--whether it's meals to help them look and feel younger or snacks that prevent diseases--based on the science that governs them.

In *The Genome Odyssey*, Dr. Euan Ashley, Stanford professor of medicine and genetics, brings the breakthroughs of precision medicine to vivid life through the real diagnostic journeys of his patients and the tireless efforts of his fellow doctors and scientists as they hunt to prevent, predict, and beat disease. Since the Human Genome Project was completed in 2003, the price of genome sequencing has dropped at a staggering rate. It's as if the price of a Ferrari went from \$350,000 to a mere forty cents. Through breakthroughs made by Dr. Ashley's team at Stanford and other dedicated groups around the world, analyzing the human genome has decreased from a heroic multibillion dollar effort to a single clinical test costing less than \$1,000. For the first time we have within our grasp the ability to predict our genetic future, to diagnose and prevent disease before it begins, and to decode what it really means to be human. In *The Genome Odyssey*, Dr. Ashley details the medicine behind genome sequencing with clarity and accessibility. More than that, with passion for his subject and compassion for his patients, he introduces readers to the dynamic group of researchers and doctor detectives who hunt for answers, and to the pioneering patients who open up their lives to the medical community during their search for diagnoses and cures. He describes how he led the team that was the first to analyze and interpret a complete human genome, how they broke genome speed records to diagnose and treat a newborn baby girl whose heart stopped five times on the first day of her life, and how they found a boy with tumors growing inside his heart and traced the cause to a missing

piece of his genome. These patients inspire Dr. Ashley and his team as they work to expand the boundaries of our medical capabilities and to envision a future where genome sequencing is available for all, where medicine can be tailored to treat specific diseases and to decode pathogens like viruses at the genomic level, and where our medical system as we know it has been completely revolutionized.

Drop Addictive Sweets and Starches--and Stop Weight Gain--in 24 Hours Featuring a 5-part questionnaire to help you identify your personal craving profile Julia Ross, best-selling author and expert in nutrition and overeating, exposes the real reason so many of us can't stick to a healthy diet: our favorite foods are engineered to be addictive. At her clinic in California, Ross and her colleagues treat food addiction where it starts--in the brain--by triggering our natural appetite-regulating neurotransmitters with nutrients called amino acids. It turns out that these protein concentrates boost our neurotransmitters, which broadcast sensations of satisfaction that no food, including chocolate, can override. Thousands of Ross' clients have abolished their cravings for high-calorie confections using this simple nutritional strategy. With *The Craving Cure*, Ross grants all of us access to this revolutionary approach. The process begins with a five-part questionnaire that helps you identify your unique craving profile and specifies the amino acid supplements you need to curb your specific cravings. Ross' clear explanations of why and how to use the aminos empower you to reclaim your natural appetite control, and her anti-craving eating guidelines will permanently strengthen your dietary defenses. A well-researched and clinically-tested rejection of low-calorie, low-saturated fat, and low-protein diets, *The Craving Cure* reveals how we can effortlessly and permanently eradicate our cravings to lose weight, rediscover our nutritional heritage, and regain optimal mood, energy, and health.

"Redefines 'unputdownable.'" —Amie Kaufman, New York Times bestselling author of *Illuminae* "I was thrilled. I was shocked." —NPR "Stunning twists and turns." —BCCB (starred review) In this gripping debut novel, seventeen-year-old Cat must use her gene-hacking skills to decode her late father's message concealing a vaccine to a horrifying plague. Catarina Agatta is a hacker. She can cripple mainframes and crash through firewalls, but that's not what makes her special. In Cat's world, people are implanted with technology to recode their DNA, allowing them to change their bodies in any way they want. And Cat happens to be a gene-hacking genius. That's no surprise, since Cat's father is Dr. Lachlan Agatta, a legendary geneticist who may be the last hope for defeating a plague that has brought humanity to the brink of extinction. But during the outbreak, Lachlan was kidnapped by a shadowy organization called Cartaxus, leaving Cat to survive the last two years on her own. When a Cartaxus soldier, Cole, arrives with news that her father has been killed, Cat's instincts tell her it's just another Cartaxus lie. But Cole also brings a message: before Lachlan died, he managed to create a vaccine, and Cole needs Cat's help to release it and save the human race. Now Cat must decide who she can trust: The soldier with secrets of his own? The father who made her promise to hide from Cartaxus at all costs? In a world where nature itself can be rewritten, how much can she even trust herself?

After three family members were stricken with aggressive cancer, I realized I had to get up to speed on the jargon of cancer research, and devise my own cancer toolkit of repurposed drugs and supplements if I wanted my loved ones to survive. This book is a record of that journey as we explore "Cancer as a Metabolic Disease" and the

repurposed drugs and supplements targeting metabolic pathways for eradication of cancer stem cells. The problem is not about finding the one elusive anti-cancer drug or botanical substance. The problem is that we have too many anti-cancer substances to choose from. How do we narrow down the list and use them in an effective combination? Hopefully, this book will give you the information needed to select a few key repurposed drugs and supplements to target Cancer Stem Cells and the important metabolic pathways in a synergistic manner, resulting in the desired curative efficacy.

-Jeffrey Dach, MD Excerpt from Foreword by Carol Petersen, RPh, CNP: Dr. Jeffrey Dach found himself face to face with serious cancer challenges to family members. His training in radiology gave him a platform to launch his investigation and he worked tirelessly to find information that could change a deadly outcome. His searches cover 5 years of study. He investigated practitioners and scientists who might have insights. In the end, his family members had successful outcomes. He has decided to share the information he accumulated. "Cracking Cancer Toolbox" is not a protocol nor recipe for success for any particular cancer. It is however, a gateway to learning much more about cancer than the average oncologist will relate to their patients. Knowledge is power. Reading this book and keeping it as a reference will open doors to learning new theories and potential therapies. Many therapies already exist but have been unused because of strict adherence to the narrative. Dr. Dach presents us with the gift of translation. His writing is clear and understandable. We don't have to have a PhD or medical degree to grasp concepts that come cloaked in medical jargon. This compilation of cancer information is a great work. He sends it into the world so many more can benefit. - Carol Petersen, RPh, CNP Excerpt from Foreword by Akbar Khan, MD: And now we have Dr. Jeffrey Dach's book, Cracking Cancer Toolkit, which explains the metabolic theory of cancer and other novel theories in a comprehensible writing style, understandable to the non-medical reader. Given how common cancer is today, this book is a valuable addition to any home library. Indeed, the knowledge you gain may save your life, or the life of a friend or family member. - Akbar Khan, MD About the Author: Jeffrey Dach, MD is a practicing physician, originally board certified in Diagnostic and Interventional Radiology. In 2005, Dr Dach retired from radiology and resumed outpatient clinical medicine in a small office in Davie, Florida. He is the author of Heart Book, Bioidentical Hormones 101 and Natural Medicine 101. He is co-author of Stop the Thyroid Madness Vol.2. Dr. Dach lives in Hollywood, Florida, and is married, with three adult married children, and three grandchildren. His web sites are www.jeffreydachmd.com and www.crackingcancertoolkit.com.

From acclaimed author Dr. Jason Fung, a revolutionary guide to reversing diabetes. Dr. Jason Fung forever changed the way we think about obesity with his best-selling book, The Obesity Code. Now he has set out to do the same for type 2 diabetes. Today, most doctors, dietitians, and even diabetes specialists consider type 2 diabetes to be a chronic and progressive disease—a life sentence with no possibility of parole. But the truth, as Dr. Fung reveals in this paradigm-shifting book, is that type 2 diabetes is reversible. Writing with clear, persuasive language, he explains why conventional treatments that rely on insulin or other blood-glucose-lowering drugs can actually exacerbate the problem, leading to significant weight gain and even heart disease. The only way to treat type 2 diabetes effectively, he argues, is proper dieting and intermittent fasting—not medication. Dr. Jason Fung forever changed the way we think
