layout) addressing topics such as The Function of Design, Inspiration, The Design Process, Intuition, Structure and Organization, The Interaction of Visual Elements, Typography, and Design Analysis. The book offers inspirational quotations and a unique, progressive design that truly reflects its content.

The first step-by-step guidebook for successful innovation planning Unlike other books on the subject, *101 Design Methods* approaches the practice of creating new products, services, and customer experiences as a science, rather than an art, providing a practical set of collaborative tools and methods for planning and defining successful new offerings. Strategists, managers, designers, and researchers who undertake the challenge of innovation, despite a lack of established procedures and a high risk of failure, will find this an invaluable resource. Novices can learn from it; managers can plan with it; and practitioners of innovation can improve the quality of their work by referring to it.

Part manifesto, part handbook, *THE DESIGNFUL COMPANY* provides a lively overview of a growing trend in management—design thinking as a business competence. According to the author, traditional managers have relied on a two-step process to make decisions, which he calls “knowing” and “doing.” Yet in today’s innovation-driven marketplace, managers need to insert a middle step, called “making.” Making is a phase in which assumptions are questioned, futures are imagined, and prototypes are tested, producing a wide range of options that didn’t exist before. The reader is challenged to consider the author’s bold assertion:

From the back cover: The complex business problems we face today can't be solved with the same thinking that created them. Instead, we need to start from a place outside traditional management. Today we have to "design" the way forward—or risk ending up in the fossil layers of history. Marty Neumeier, author of *THE BRAND GAP* and *ZAG*, presents the new management engine that can transform your company into a powerhouse of nonstop innovation.

**#1 NEW YORK TIMES BESTSELLER** When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent “grand design” of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the “multiverse”—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a “theory of everything”: the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.
