On February 27, 2010, Chile was rocked by a violent earthquake five hundred times more powerful than the one that hit Haiti just six weeks prior. The Chilean earthquake devastated schools, hospitals, roads, and homes, paralyzing the country for weeks and causing economic damage that was equal to 18 percent of Chile's GDP. This calamity hit just as an incumbent political regime was packing its bags and a new administration was preparing to take office. For most countries, it would have taken years, if not decades, to recover from such an event. Yet, only one year later, Chile's economy had reached a six percent annual growth rate. In *Leadership Dispatches*, Michael Useem, Howard Kunreuther, and Erwann Michel-Kerjan look at how the nation's leaders—in government, business, religion, academia, and beyond—facilitated Chile's recovery. They attribute Chile's remarkable comeback to a two-part formula consisting of strong national leadership on the one hand, and deeply rooted institutional practices on the other. Coupled with strategic, deliberative thinking, these levers enabled Chile to bounce back quickly and exceed its prior national performance. The authors make the case that the Chilean story contains lessons for a broad range of organizations and governments the world over. Large-scale catastrophes of many kinds—from technological meltdowns to disease pandemics—have been on the rise in recent years. Now is the time to seek ideas and guidance from other leaders who have triumphed in the wake of a disaster. In this vein, *Leadership Dispatches* is both a remarkable story of resilience and an instructive look at how those with the greatest responsibility for a country, company, or community should lead.

Relations between the superpowers and the nations of Eastern and Western Europe are especially tenuous as the midpoint of the 1980s approaches. The contributors to this volume assess the current political, economic, and military dimensions of Europe's international relations and consider the prospects for change, focusing on the role of the rival alliance systems (NATO and the Warsaw Pact), Soviet conceptions of the future of Europe, U.S. goals concerning the maintenance of NATO, and Europe's assessment of its own interests and objectives. The book concludes by addressing the impact of Soviet and East European domestic developments on present and future East-West relations.

Crises aren't real objective events. Instead, Spector demonstrates they are claims of urgency imposed by leaders to assert power and exert control.

Why do some managers shine during a high-level crisis while others stumble? Reflections on Groups and Organizations is the third and final book in the *On the Couch with Manfred Kets de Vries* series. Broadening the Kets De Vries canvas, this book examines concepts of organizational health, performance, and change. Material ranges from studies of high performance teams – based on time the author spent with the pygmies of central Africa – to the study of organizational stars, to the use of coaching interventions to improve personal and organizational functioning. Kets de Vries looks at the interpersonal and group processes that determine how organizations work within specific contexts, including family firms. He studies dysfunctional leader-follower relationships, downsizing, and organizational transformation. Kets de Vries also introduces his concept of the "authentizotic" organization – a pleasant, healthy, well-functioning workplace.

This book examines a relatively unexplored area of leadership research – personal aspects of leadership – by considering the impact of leaders navigating their own personal crises on their relationships with teams, peers, and supervisors. Through original research as well as an integrative review of the literature, Hickman and Knouse focus on the "leader-as-person in crisis," including the real-life personal crises and experiences of leaders. This important volume offers a detailed and thoughtful description of intersecting factors that contribute to the ways in which leaders experience and cope with personal crises to spur additional research attention to this neglected area. This book also offers current and prospective leaders advice and direction on effectively navigating personal crises.

Published in 1999. On the basis of leading theoretical work on civil-military relations, the authors elaborate their own model, emphasizing the continuum between military autonomy (which has traditionally

characterised the military sector in Russia) and integration with civil society (which one might expect would be the result of the political changes having taken place in Russia over the past decade). Three Indicators of this relation are selected; the participation of military personnel in civilian life, and its particular politics; the status of closed cities; conversion of military industry to civilian production. These indicators are investigated at the federal level and at the regional level pertaining to Murmansk oblast' (the Kola Peninsula), which is one of the most heavily militarised areas of the world. The study is based on intensive 'on-the-spot' data gathering in Murmansk, including interviews with officers, redundant officers and inhabitants of such closed cities.

Crisis Leadership Now: A Real-World Guide to Preparing for Threats, Disaster, Sabotage, and Scandal McGraw-Hill Education

Leadership has never been more important – and divisive – than it is today. The idea and discourse of the leader remains a critical factor in organizational and societal performance, but there is evident tension between the persistent focus on the critical importance of individual leaders and the increasing emphasis on collective leadership. The Routledge Companion to Leadership provides a survey of the contentious and dynamic discipline of leadership. This collection covers key themes in the field, including advances in leadership theory, leadership in a range of contexts and geographies, leadership failure, leadership process, and leadership development. Topics range from micro studies to wider political analyses of leadership, taking in unusual but important aspects such as portrayals of leadership in architecture, media, and science fiction. Contributions from 61 internationally renowned authors from 16 countries make available the full range of perspectives, approaches, and insights on the idea of leadership. Providing both a social sciences and a psychological approach, these go beyond common themes to offer diverse perspectives on such topics as emotion and leadership, portrayals of leadership. This volume situates leadership debates and evidence within contemporary leadership crises, while ensuring that the explorations of the issues are of enduring relevance. With wide and critical coverage of the key topics and potent contextualization of themes in current events, The Routledge Companion to Leadership is the ideal resource for graduate study in leadership.

Modern organizational crises are complex, diverse, and frequent. Ineffective crisis management can result in catastrophic loss. Crisis Management: Resilience and Change introduces students to best practices for preventing, containing, and learning from crises in our global, media-driven society. Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.
