If we can acknowledge that our fate is connected with the fate of others and that of the collective world, then we must ask ourselves how we can improve the world within our capacity. How do we progress while ensuring the socio-economic and emotional wellbeing of others? One of the answers is through Crowdfunding. 'Crowdfunding: The Story Of People' uses a data-driven storytelling approach to capture the impact and potential of crowdfunding in a world governed by inequality. It does so while maintaining a constant grip on both the micro and macro perspectives of collective giving, social collaboration, and financial inclusion. As people, we see life from a shared prism, but how we interpret it often varies. All of us have a unique way of deriving meaning from the stories around us. We all share an inherent tendency to look at something small and connect it with larger patterns. It is how we make sense of our world: through connections, patterns, and shared interpretations. By stitching together stories and data from around the world, the authors have successfully mapped the crowdfunding universe in a lucid and riveting manner. The authors flip through the pages of history to shed light on people's collective efforts and diverse fundraising techniques that have evolved into modern-day crowdfunding. They explore the current industry trends of crowdfunding, the challenges it faces, and piece together the potential solutions to those problems.

More Than Money Jamey Stegmaier knows crowdfunding. He's a veteran of seven successful Kickstarter campaigns (and counting) that have raised over \$1.4 million, and he's the proprietor of the widely read Kickstarter Lessons blog. In this book he offers a comprehensive guide to crowdfunding, demonstrating that it can be a powerful way for entrepreneurs to grow their businesses by building community and putting their customers first. This book includes over forty stories of inspiring successes and sobering disasters. Stegmaier uses these examples to demonstrate how to (and how not to) prepare for a campaign, grow a fan base, structure a pitch, find new backers, and execute many other crucially important "nuts and bolts" elements of a successful crowdfunding project. But Stegmaier emphasizes that the benefits of crowdfunding are much more about the "crowd" than the "funding." He shows that if you treat your backers as people, not pocketbooks—communicate regularly and transparently with them, ask their opinions, attend to their needs—they'll become advocates as well as funders, exponentially increasing your project's chances of succeeding.

When Facebook went public on the Nasdaq in 2012, many of Facebook's 3,000 employees became millionaires, and many more were handsomely rewarded for their dedication, commitment, and appetite for risk. The same is true of countless IPOs throughout history from Google to Microsoft. The investors, employees, and partners that "got in early" reached a height of financial abundance that many ordinary folk only dream of. Until recently, these types of startup investments were only accessible by the ultra-wealthy. They were hidden from ordinary investors, like you and me. Put simply, the government prohibited you from investing in early-stage startup companies. You couldn't just log onto an online marketplace and buy shares in the next hot startup, that is, until everyone already knew about it. For a while, investors found these traditional regulations to be satisfactory. It helped protect them from risky companies with experimental prototypes. But, as time went on, that assent turned into outrage. The world watched as companies, like Oculus, created the next generation of virtual reality technology and then got acquired by Facebook for \$3 billion dollars. It might sound like a big win, but in reality, none of the 9,522 backers that pledged a total of \$2.4 million to the Oculus Kickstarter campaign actually had any equity stake from the transaction. They were pledging or donating money, not investing it. They didn't really get a piece of the action. There's no doubt that the world that we live in has been transformed by companies like Facebook, Uber, Tesla, Google, Amazon, and many more. Now, for the first time in history, you can not only be a part of that change, but you can also profit from it. You can become the next stakeholder in a fast-growing startup company that's on the path for an IPO or major acquisition. This book is your passport into the new world of equity crowdfunding, where startups are raising money online from investors all over the world. You'll quickly learn about all the major platforms, what goes into an offering, tips for investors, and finally, you'll get a simple easy-to-understand breakdown of all of those confusing regulations.

Yes, it's true, crowdfunding is a NEW way to help pay for personal expenses. These could include medical bills, emergency costs, and memorial funds. Crowdfunding can also be used to help pay for your education expenses or volunteer efforts. But, that's not all. Crowdfunding isn't just for charity or personal cause campaigns. Believe it or not, more and more newlyweds are turning to crowdfunding to pay for their honeymoon! Some are even using it to pay for travel expenses! I've been writing about crowdfunding since 2012 and have seen more campaigns that you can imagine. Last year alone, I helped nearly 400,000 individuals raise money from the crowd through my website, podcast, newsletter, and forum. Even though crowdfunding is an amazing tool, there's a right and a wrong way to raise funds online. That's where I come in. I'm going to guide you through the murky waters and share with you the best techniques, strategies, and give you the inside scoop on some of the crowdfunding platforms or websites out there. I'll also give you a heads up on costly MISTAKES TO AVOID when launching your first campaign. Believe me, you don't want to make a fool of yourself or learn the hard way. I'm going to make it dead simple and give you the step-by-step guide for raising money online. All you'll have to do is copy it!

This book aims to take stock and systemize existing knowledge on crowdfunding while providing overview of the industry, its regulatory environment and advancing the insight into the role of crowdfunding in the startup lifecycle. It is adopting an exploratory and phenomenon-based approach which is deemed appropriate when investigating rather new phenomena. Furthermore, the research combines survey and interview methodologies to assess the opinion and real-world behavior of different stakeholders in crowdfunding marketplace and identify gaps requiring further academic consideration. Empirical data was gathered using multiple interactive web-based questionnaires distributed to different stakeholders and "informed general public" mainly through the social networks (Linkedin, Facebook and Twitter) and direct solicitation of entrepreneurial associations, networks and online communities. The study conducted relies on both qualitative and quantitative analysis in attempt to find data patterns useful in future research and establish some managerial and policymaker recommendations based on limited evidence collected. The work adds value to this field through a 3-fold contribution: Taking a look at crowdfunding through the prism of SWOT analysis of the practice itself and Porter's 5 forces analysis of crowdfunding platforms industry. Providing evidence in favor of implementing various degrees of regulation based on different crowdfunding categories, using the Italian case of equity-based crowdfunding regulation as a model. Finally, it yields some interesting findings on relevance of crowdfunding in the venture startup while pointing out key motivators which make entrepreneurs consider this fundraising option. In addition, related policymaker/managerial implications are exposed and academic literature updated with reference to contemporary developments in this dynamic field.

The easy way to get started in crowdfund investing Crowdfund investing (CFI) is going to be the next big thing on Wall Street. U.S. investment banks, brokerage houses, and law firms are gearing up for the creation and regulation of new financial products that will be available to the general public starting in early 2013. The introduction of these products will revolutionize the financing of small businesses and startups for these key reasons: Entrepreneurs and small business owners, who have had difficulty obtaining capital through traditional means (such as bank loans and angel investors) in recent years, will have access to investors around the world through social media. For the first time, investors (so-called unqualified investors) will be able to purchase an equity stake in a business or new investment vehicle. The Securities and Exchange Commission (SEC) is overseeing the creation of online portals that will allow entrepreneurs and small investors to connect. When these portals go live in 2013, Crowdfund Investing For Dummies will be on the front line to educate business owners, other entrepreneurs, and investors alike. Crowdfund Investing For Dummies will walk entrepreneurs and investors, like yourself, through this new investing experience, beginning with explaining how and why CFI developed and what the 2012 JOBS says about CFI.
