A journalist and word aficionado salutes the 100-year history and pleasures of crossword puzzles Since its debut in The New York World on December 21, 1913, the crossword puzzle has enjoyed a rich and surprisingly lively existence. Alan Connor, a comic writer known for his exploration of all things crossword in The Guardian, covers every twist and turn: from the 1920s, when crosswords were considered a menace to productive society; to World War II, when they were used to recruit code breakers; to their starring role in a 2008 episode of The Simpsons. He also profiles the colorful characters who make up the interesting and bizarre subculture of crossword constructors and competitive solvers,

including Will Shortz, the iconic New York Times puzzle editor who created a crafty crossword that appeared to predict the outcome of a presidential election, and the legions of competitive puzzle solvers who descend on a Connecticut hotel each year in an attempt to be crowned the American puzzle-solving champion. At a time when the printed word is in decline, Connor marvels at the crossword's seamless transition onto Kindles and iPads, keeping the puzzle one of America's favorite pastimes. He also explores the way the human brain processes crosswords versus computers that are largely stumped by clues that require wordplay or a simple grasp of humor. A fascinating examination of our most beloved linguistic amusement—and filled with tantalizing crosswords and clues embedded in the text—*The Crossword Century* is sure to attract the attention of the readers who made *Word Freak* and *Just My Type* bestsellers.

Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading

methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, *The Power of Now* is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

When the first European missionaries arrived on other continents, it was decided that the indigenous languages would be used as the means of christianization. There emerged the need to produce grammars and dictionaries of those languages. The study of this linguistic material has so far not received sufficient attention in the field of linguistic historiography. This volume is the first published collection of papers on missionary linguistics world-wide; it represents the insights of recent research, containing an introduction and papers on methodology, meta-historiography, the historical and cultural background. The book contains studies about early-modern linguistic works written in Spanish, Portuguese, English and French, describing among others indigenous languages from North America and Australia, Maya, Quechua, Xhosa, Japanese, Kapampangan, and Visaya. Topics dealt with include: innovations of individual

missionaries in lexicography, grammatical analysis, phonology, morphology, or syntax; creativity in descriptive techniques; differences and/or similarities of works from different continents, and different religious backgrounds (Catholic or Protestant). The period since 1989 has been marked by the global endorsement of open markets, the free flow of finance capital and liberal ideas of constitutional rule, and the active expansion of human rights. Why, then, in this era of intense globalization, has there been a proliferation of violence, of ethnic cleansing on the one hand and extreme forms of political violence against civilian populations on the other? Fear of Small Numbers is Arjun Appadurai's answer to that question. A leading theorist of globalization, Appadurai turns his attention to the complex dynamics fueling large-scale, culturally motivated violence, from the genocides that racked Eastern Europe, Rwanda, and India in the early 1990s to the contemporary "war on terror." Providing a conceptually innovative framework for understanding sources of global violence, he describes how the nation-state has grown ambivalent about minorities at the same time that minorities, because of global communication technologies and migration flows, increasingly see themselves as parts of powerful global majorities. By exacerbating the inequalities produced by globalization, the volatile, slippery relationship between majorities and minorities

foments the desire to eradicate cultural difference. Appadurai analyzes the darker side of globalization: suicide bombings; anti-Americanism; the surplus of rage manifest in televised beheadings; the clash of global ideologies; and the difficulties that flexible, cellular organizations such as Al-Qaeda present to centralized, "vertebrate" structures such as national governments. Powerful, provocative, and timely, *Fear of Small Numbers* is a thoughtful invitation to rethink what violence is in an age of globalization. The explosion of a jetliner over India triggers an Apocalyptic battle that sweeps across the subcontinent. Reprint.

Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. Winner of the Booker prize and twice winner of the Booker of Bookers, *Midnight's Children* is "one of the most important books to come out of the English-speaking world in this generation" (New York Review of Books). Reissued for the 40th anniversary of the original publication--with a new introduction from the author--Salman Rushdie's widely acclaimed novel is a masterpiece in literature. Saleem Sinai is born at the stroke of midnight on August 15, 1947, the very moment of India's independence. Greeted by fireworks displays, cheering crowds, and Prime Minister Nehru himself, Saleem grows up to learn the ominous consequences of this coincidence. His every act is mirrored and magnified in events that sway the course of national affairs; his health and well-being are inextricably bound to those of his nation; his life is inseparable, at times indistinguishable, from the history of his country. Perhaps most remarkable are the telepathic powers linking him with India's 1,000 other "midnight's children," all born in that initial hour and endowed with magical gifts. This novel is at once a fascinating family saga and an astonishing evocation of a vast land and its people—a brilliant incarnation of the universal human comedy. *Midnight's Children* stands apart as both an epochal work of fiction and a brilliant performance by one of the great literary voices of our time.

Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.

Sixty-four million people do it at least once a week. Nabokov wrote about it. Bill Clinton even did it in the White House. The crossword puzzle has arguably been our national obsession since its birth almost a century ago. Now, in *Crossworld*, writer, translator, and lifelong puzzler Marc Romano goes where no Number 2 pencil has gone before, as he delves into the minds of the world's cleverest crossword creators and puzzlers, and sets out on his own quest to join their ranks. While covering the American Crossword Puzzle Tournament for the *Boston Globe*, Romano was amazed by the skill of the competitors and astonished by the cast of characters he came across—like Will Shortz, beloved editor of the *New York Times* puzzle and the only academically accredited "enigmatologist" (puzzle scholar); Stanley Newman, *Newsday's* puzzle editor and the fastest solver in the world;

and Brendan Emmett Quigley, the wickedly gifted puzzle constructor and the Virgil to Marc's Dante in his travels through the crossword inferno. Chronicling his own journey into the world of puzzling—even providing tips on how to improve crosswording skills—Romano tells the story of crosswords and word puzzles themselves, and of the colorful people who make them, solve them, and occasionally become consumed by them. But saying this is a book about puzzles is to tell only half the story. It is also an explanation into what crosswords tell us about ourselves—about the world we live in, the cultures that nurture us, and the different ways we think and learn. If you're a puzzler, *Crossworld* will enthrall you. If you have no idea why your spouse send so much time filling letters into little white squares, *Crossworld* will tell you – and with luck, save your marriage.

Oceans account for 50% of the anthropogenic CO₂ released into the atmosphere. During the past 15 years an international programme, the Joint Global Ocean Flux Study (JGOFS), has been studying the ocean carbon cycle to quantify and model the biological and physical processes whereby CO₂ is pumped from the ocean's surface to the depths of the ocean, where it can remain for hundreds of years. This project is one of the largest multi-disciplinary studies of the oceans ever carried out and this book synthesises the results. It covers all aspects of the topic ranging from air-sea exchange with CO₂, the role of physical mixing, the uptake of CO₂ by marine algae, the fluxes of carbon and nitrogen through the marine food chain to the subsequent export of carbon to the depths of the ocean. Special emphasis is laid on predicting future climatic change.

This book offers a translation of the seven thousand verses of the second book of the medieval Hindu text, the Ganesa Purana, one of two Puranas dedicated to the important elephant-headed god. In this book the reader is given many narratives about Ganesa's ascent to earth in order to kill demonic figures who threaten to overthrow the correct world order. In addition, these narratives contain myths about Ganesa's birth and family as well as some extended and quite humorous myths about ideal devotees of the god. The translation is preceded by a long introduction offering a geographical and historical context for the Ganesa Purana. Following the translation are very extensive notes which bring our points of philological interest, but focus mainly on the literary structure of the text and the methods used to present the many myths and narratives in a coherent and fully integrated manner.
