The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Unique in its structure, *Federal Income Taxation, 4E*, presents core materials that cover the basics of tax law and then offers "cells" at the end of the book that are self-contained units with more in-depth discussion of certain topics. This flexible structure allows professors to customize their tax course by selecting only the additional in-depth materials they want to use. The stellar author team, with years of scholarship and teaching experience, feature notes and questions that provide background information and place the cases and statutes in context. More than 150 problems are interspersed throughout the core text and the cells that challenge students to apply theory to specific situations. Key Features: Thoroughly updated with the latest tax legislation Updated rate brackets, personal exemptions, standard deductions, earned income phase-outs, and eligibility for various credits and deductions, based on the IRS revenue procedure

Rising inequality is the defining feature of our age. With the lion's share of wealth growth going to the top, for a growing

percentage of society a middle-class existence is out of reach. What exactly are the economic shifts that have driven the social transformations taking place in Anglo-capitalist societies? In this timely book, Lisa Adkins, Melinda Cooper and Martijn Konings argue that the rise of the asset economy has produced a new logic of inequality. Several decades of property inflation have seen asset ownership overshadow employment as a determinant of class position. Exploring the impact of generational dynamics in this new class landscape, the book advances an original perspective on a range of phenomena that are widely debated but poorly understood – including the growth of wealth inequalities and precarity, the dynamics of urban property inflation, changes in fiscal and monetary policy and the predicament of the “millennial” generation. Despite widespread awareness of the harmful effects of Quantitative Easing and similar asset-supporting measures, we appear to have entered an era of policy “lock-in” that is responsible for a growing disconnect between popular expectations and institutional priorities. The resulting polarization underlies many of the volatile dynamics and rapidly shifting alliances that dominate today’s headlines.

*Work Want Work* considers in captivating detail how a logic of work has become integral to everything we do, even as the place of formal work has become increasingly precarious. With reference to sociological data, philosophy, political theory, legislation, the testimonies of workers and an eclectic mix of cultural texts – from Lucian Freud to Google, Anthony Giddens to selfies, Jean-Luc Nancy to Amy Winehouse – Pfannebecker and Smith lay out how the capitalism of globalized technologies has put our time, our subjectivities, our experiences and our desires to work in unprecedented ways. As every part of life is colonized by work without securing our livelihoods, new questions need to be asked: whether a nostalgia for work can save us, how ideas of work change conceptions of political community, how employment and unemployment alike have become malemployment, and whether the work of our desire online can be disentangled from capitalist exploitation. The biggest question, at a time when the end of work and a fully automated future are proclaimed by Silicon Valley idealists as well as by social democratic politicians and left-wing theorists, is this: how can we propose a post-work society and culture that we will actually want?

In *Crunch Time*, Aliya Hamid Rao gets up close and personal with college-educated, unemployed men, women, and spouses to explain how comparable men and women have starkly different experiences of unemployment. Traditionally gendered understandings of work—that it's a requirement for men and optional for women—loom large in this process, even for marriages that had been not organized in gender-traditional ways. These beliefs serve to make men's unemployment an urgent problem, while women's unemployment—cocooned within a narrative of staying at home—is almost a non-issue. *Crunch Time* reveals the minutiae of how gendered norms and behaviors are actively maintained by spouses at a time when they could be dismantled, and how gender is central to the ways couples react to and make sense of unemployment.

This insider's view to the NFL reveals the stories of the men behind the helmets and is the perfect gift for any armchair quarterback.

A New York Times Bestseller The leading thinker and most visible public advocate of modern monetary theory -- the freshest and most important idea about economics in decades -- delivers a radically different, bold, new understanding for how to build a just and prosperous society. Stephanie Kelton's brilliant exploration of modern monetary theory (MMT) dramatically changes our understanding of how we can best deal with crucial issues ranging from poverty and inequality to creating jobs, expanding health care coverage, climate change, and building resilient infrastructure. Any ambitious proposal, however, inevitably runs into the buzz saw of how to find the money to pay for it, rooted in myths about deficits that are hobbling us as a country. Kelton busts through the myths that prevent us from taking action: that the federal government should budget like a household, that deficits will harm the next generation, crowd out private investment, and undermine long-term growth, and that entitlements are propelling us toward a grave fiscal crisis. MMT, as Kelton shows, shifts the terrain from narrow budgetary questions to one of broader economic and social benefits. With its important new ways of understanding money, taxes, and the

critical role of deficit spending, MMT redefines how to responsibly use our resources so that we can maximize our potential as a society. MMT gives us the power to imagine a new politics and a new economy and move from a narrative of scarcity to one of opportunity.

“Atkinson and Jewell invite each of us to reimagine one’s connection to the land while cultivating nature close to home. A must-read for anyone searching for inspired solutions for designing or refining a garden.” —Emily Murphy, founder of Pass the Pistil From windswept deserts to misty seaside hills and verdant valleys, the natural landscapes of the American West offer an astounding variety of climates for gardens. Under Western Skies reveals thirty-six of the most innovative designs—all embracing and celebrating the very soul of the land on which they grow. For the gardeners featured here, nature is the ultimate inspiration rather than something to be dominated, and Under Western Skies shows the strong connection each garden has with its place. Packed with Atkinson’s stunning photographs and illuminated by Jewell’s deep interest in the relationships between people and the spaces they inhabit, Under Western Skies offers page after page of encouraging ingenuity and inventive design for passionate gardeners who call the West home.

Inequality is the crisis of our time. The growing gap between a few at the top and the rest of society damages us all. No longer able to deny the crisis, every government in the world is now pledged to fix it – and yet it keeps on getting worse. In this book, international anti-inequality campaigner Ben Phillips shows why winning the debate is not enough: we have to win the fight. Drawing on his insider experience, and his personal exchanges with the real-life heroes of successful movements, he shows how the battle against inequality has been won before, and he shares a practical plan for defeating inequality again. He sets a route map for us to overcome deference, build our collective power, and create a new story. Most books on inequality are about what other people ought to do about it – this book is about why winning the fight needs you. Tired of feeling helpless in the face of spiralling inequality? Want to know what you can do about it? This is the book for you.

Everything you ever need to know about making it as a scientist. Despite your graduate education, brainpower, and technical prowess, your career in scientific research is far from assured. Permanent positions are scarce, science survival is rarely part of formal graduate training, and a good mentor is hard to find. In *A Ph.D. Is Not Enough!*, physicist Peter J. Feibelman lays out a rational path to a fulfilling long-term research career. He offers sound advice on selecting a thesis or postdoctoral adviser; choosing among research jobs in academia, government laboratories, and industry; preparing for an employment interview; and defining a research program. The guidance offered in *A Ph.D. Is Not Enough!* will help you make your oral presentations more effective, your journal articles more compelling, and your grant proposals more successful. A classic guide for recent and soon-to-be graduates, *A Ph.D. Is Not Enough!* remains required reading for anyone on the threshold of a career in science. This new edition includes two new chapters and is revised and updated throughout to reflect how the revolution in electronic communication has transformed the field.

The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah

Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

Americans revere their Constitution. However, most of us are unaware how tumultuous and improbable the drafting and ratification processes were. As Benjamin Franklin keenly observed, any assembly of men bring with them "all their prejudices, their passions, their errors of opinion, their local interests and their selfish views." One need not deny that the Framers had good intentions in order to believe that they also had interests. Based on prodigious research and told largely through the voices of the participants, Michael Klarman's *The Framers' Coup* narrates how the Framers' clashing interests shaped the Constitution--and American history itself. The Philadelphia convention could easily have been a failure, and the risk of collapse was always present. Had the convention dissolved, any number of adverse outcomes could have resulted, including civil war or a reversion to monarchy. Not only does Klarman capture the knife's-edge atmosphere of the convention, he populates his narrative with riveting and colorful stories: the rebellion of debtor farmers in Massachusetts; George Washington's uncertainty about whether to attend; Gunning Bedford's threat to turn to a European prince if the small states were denied equal representation in the Senate; slave states' threats to take their marbles and go home if denied representation for their slaves; Hamilton's quasi-monarchist speech to the convention; and Patrick Henry's herculean efforts to defeat the Constitution in Virginia through demagoguery and conspiracy theories. *The Framers' Coup* is more than a compendium of great stories, however, and the powerful arguments that feature throughout will reshape our understanding of the nation's founding. Simply put, the Constitutional Convention almost didn't happen, and once it happened, it almost failed. And, even after the convention succeeded, the Constitution it produced almost failed to be ratified. Just as importantly, the Constitution was hardly the product of philosophical reflections by brilliant, disinterested statesmen, but rather ordinary interest group politics. Multiple conflicting interests had a say, from creditors and debtors to city dwellers and backwoodsmen. The upper class overwhelmingly supported the Constitution; many working class colonists were more dubious. Slave states and nonslave states had different perspectives on how well the Constitution served

their interests. Ultimately, both the Constitution's content and its ratification process raise troubling questions about democratic legitimacy. The Federalists were eager to avoid full-fledged democratic deliberation over the Constitution, and the document that was ratified was stacked in favor of their preferences. And in terms of substance, the Constitution was a significant departure from the more democratic state constitutions of the 1770s. Definitive and authoritative, *The Framers' Coup* explains why the Framers preferred such a constitution and how they managed to persuade the country to adopt it. We have lived with the consequences, both positive and negative, ever since.

Our political system in America is broken, right? Wrong. The truth is, the American political system is working exactly how it is designed to work, and it isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of delivering solutions to America's key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In *The Politics Industry*, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we make our laws. Their bracing assessment and practical recommendations cut through the endless debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. *The Politics Industry* is an original and completely nonpartisan guide that will open your eyes to the true dynamics and profound challenges of the American political system and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute for Political Innovation.

The history of how a deceptively ordinary piece of office furniture transformed our relationship with information The ubiquity of the filing cabinet in the twentieth-century office space, along with its noticeable absence of style, has obscured its transformative role in the histories of both information technology and work. In the first in-depth history of this neglected artifact, Craig Robertson explores how the filing cabinet profoundly shaped the way that information and data have been sorted, stored, retrieved, and used. Invented in the 1890s, the filing cabinet was a result of the nineteenth-century faith in efficiency. Previously, paper records were arranged haphazardly: bound into books, stacked in piles, curled into slots, or impaled on spindles. The filing cabinet organized loose papers in tabbed folders that could be sorted alphanumerically, radically changing how people accessed, circulated, and structured information. Robertson's unconventional history of the origins of the information age posits the filing cabinet as an information storage container, an "automatic memory" machine that contributed to a new type of information labor privileging

manual dexterity over mental deliberation. Gendered assumptions about women's nimble fingers helped to naturalize the changes that brought women into the workforce as low-level clerical workers. The filing cabinet emerges from this unexpected account as a sophisticated piece of information technology and a site of gendered labor that with its folders, files, and tabs continues to shape how we interact with information and data in today's digital world.

Leo, Max, Jane, and Daisy don't have much in common. But when they all blow off their SAT prep in favor of forming their own study group, they actually begin to bond -- over why there's so much competition over a stupid test. And what it really measures, anyway. Then it's revealed that someone has cheated on the SATs, and all eyes point to the study group. Everyone knows that Leo can't stand to lose. That Max is convinced he's a loser. That Jane couldn't care less about the whole thing. And that if Daisy doesn't clinch the right score, forget it -- she can't afford to go to college. The pressure is on for the cheater to come forward. Who will fess up?

A radical new approach to economic policy that addresses the symptoms and causes of inequality in Western society today Fueled by populism and the frustrations of the disenfranchised, the past few years have witnessed the widespread rejection of the economic and political order that Western countries built up after 1945. Political debates have turned into violent clashes between those who want to "take their country back" and those viewed as defending an elitist, broken, and unpatriotic social contract. There seems to be an increasing polarization of values. The Economics of Belonging argues that we should step back and take a fresh look at the root causes of our current challenges. In this original, engaging book, Martin Sandbu argues that economics remains at the heart of our widening inequality and it is only by focusing on the right policies that we can address it. He proposes a detailed, radical plan for creating a just economy where everyone can belong. Sandbu demonstrates that the rising numbers of the left behind are not due to globalization gone too far. Rather, technological change and flawed but avoidable domestic policies have eroded the foundations of an economy in which everyone can participate—and would have done so even with a much less globalized economy. Sandbu contends that we have to double down on economic openness while pursuing dramatic reforms involving productivity, regional development, support for small- and medium-sized businesses, and increased worker representation. He discusses how a more active macroeconomic policy, education for all, universal basic income, and better taxation of capital could work together for society's benefit. Offering real answers, not invective, for facing our most serious political issues, The Economics of Belonging shows how a better economic system can work for all.

Despite the doom and gloom of financial crises, global terrorism, climate collapse, and the rise of the far-right, a number of leading intellectuals (Steven Pinker, Hans Rosling, Johan Norberg, and Matt Ridley, among others) have been arguing in recent years that the world is getting better and better. But this “progress narrative” is little more than a very conservative defence of the capitalist status quo. At a time when liberal democracy appears incapable of stemming the tide of the far-right populism, and when laissez-faire capitalism is ill-equipped to deal with socio-economic problems like climate change, inequality, and the future of work, the real advocates of progress are those willing to challenge these established paradigms. The Glass Half-Empty argues that, without criticising the systems of capitalism, the changes needed to make a better world will always fall short of our expectations. The "progress narrative" needs to be challenged before we stumble into a potentially catastrophic future, despite having the means to build a truly better world.

Learn how to live the life you want, not just the life you can afford! Managing your money is like going to the dentist or standing in line at the DMV. Nobody wants to do it, but at some point, it's inevitable: you need to clean your teeth, renew your license, and manage your personal finances like a grown-up. Whether you're struggling to pay off student loan debt, ready to stop living paycheck to paycheck, or have finally accepted that your Beanie Baby collection will never pay off, tackling your finances may seem immensely intimidating. But it doesn't have to be. By approaching personal finance as a game--something that requires you to set clear goals, as well as face challenges you must "beat"--personal finance can not only be easy to understand, but it can also be fun! In Get Money, personal finance expert Kristin Wong shows you the exact steps to getting more money in your pocket without letting it rule your life. Through a series of challenges designed to boost your personal finance I.Q., interviews with other leading financial experts, and exercises tailored to help you achieve even your biggest goals, you'll learn valuable skills such as: Building a budget that (gasp) actually works Super-charging a debt payoff plan How to strategically hack your credit score Negotiating like a shark (or at least a piranha) Side-hustling to speed up your money goals Starting a lazy investment portfolio...and many more! Simply put, with this gamified guide to personal finance, you'll no longer stress about understanding how your finances work--you'll finally "get" money.

Acing Federal Income Taxation is a new study aid from Professor Samuel A. Donaldson of the University of Washington School of Law. Using the innovative format of the Acing Series, this cutting-edge title uses a detailed checklist format to help students navigate systematically through the provisions of the Internal Revenue Code that are commonly studied in

introductory federal income taxation courses. Acing Income Tax helps students through the most challenging part of a first course in taxation: arranging and synthesizing all of the Code provisions, cases, rulings, and regulations on a given topic into a coherent, step-by-step resource that the student can use to analyze a tax question accurately and thoroughly. Despite its compact size, Acing Income Tax is complete with summaries of key topics and sample problems with detailed analysis. No other study aid in the field offers so much value per page!

For newly hired young engineers assigned to their first real 'project', there has been little to offer in the way of advice on 'where to begin', 'what to look out for and avoid', and 'how to get the job done right'. This book gives this advice from an author with long experience as senior engineer in government and industry (U.S. Army Corps of Engineers and Exxon-Mobil). Beginning with guidance on understanding the typical organizational structure of any type of technical firm or company, author Plummer incorporates numerous hands-on examples and provides help on getting started with a project team, understanding key roles, and avoiding common pitfalls. In addition, he offers unique help on first-time experiences of working in other countries with engineering cultures that can be considerably different from the US. Reviews essentials of management for any new engineer suddenly thrust into responsibility Emphasizes skills that can get you promoted—and pitfalls that can get you fired Expanded case study to show typical evolution of a new engineer handed responsibility for a major design project

In *The Future We Choose*, Christiana Figueres and Tom Rivett-Carnac—who led negotiations for the United Nations during the historic Paris Agreement of 2015—have written a cautionary but optimistic book about the world's changing climate and the fate of humanity. The authors outline two possible scenarios for our planet. In one, they describe what life on Earth will be like by 2050 if we fail to meet the Paris Agreement's climate targets. In the other, they lay out what it will be like to live in a regenerative world that has net-zero emissions. They argue for confronting the climate crisis head-on, with determination and optimism. *The Future We Choose* presents our options and tells us what governments, corporations, and each of us can, and must, do to fend off disaster.
