

Cultural Anthropology Chapter 2 Quiz

Popular Culture: Introductory Perspectives seeks to define pop culture by exploring the ways that it fulfills our human desire for meaning. The second edition investigates current contexts for popular culture, including the rise of the digital global village through new technology and offers up-to-date examples that connect with today's students.

The Second Edition of Ken Guest's Cultural Anthropology: A Toolkit for a Global Age covers the concepts that drive cultural anthropology by showing that now, more than ever, global forces affect local culture and the tools of cultural anthropology are relevant to living in a globalizing world.

Today many school students are shielded from one of the most important concepts in modern science: evolution. In engaging and conversational style, Teaching About Evolution and the Nature of Science provides a well-structured framework for understanding and teaching evolution. Written for teachers, parents, and community officials as well as scientists and educators, this book describes how evolution reveals both the great diversity and similarity among the Earth's organisms; it explores how scientists approach the question of evolution; and it illustrates the nature of science as a way of knowing about the natural world. In addition, the book provides answers to frequently asked questions to help readers understand many of the issues and misconceptions about evolution. The book includes sample activities for teaching about evolution and the nature of science. For example, the book includes activities that investigate fossil footprints and population growth that teachers of science can use to introduce principles of evolution. Background information, materials, and step-by-step presentations are provided for each activity. In addition, this volume: Presents the evidence for evolution, including how evolution can be observed today. Explains the nature of science through a variety of examples. Describes how science differs from other human endeavors and why evolution is one of the best avenues for helping students understand this distinction. Answers frequently asked questions about evolution. Teaching About Evolution and the Nature of Science builds on the 1996 National Science Education Standards released by the National Research Council--and offers detailed guidance on how to evaluate and choose instructional materials that support the standards. Comprehensive and practical, this book brings one of today's educational challenges into focus in a balanced and reasoned discussion. It will be of special interest to teachers of science, school administrators, and interested members of the community.

If you want to know what anthropology is, look at what anthropologists do. This Very Short Introduction to Social and Cultural Anthropology combines an accessible account of some of the disciplines guiding principles and methodology with abundant examples and illustrations of anthropologists at work. Peter Just and John Monaghan begin by discussing anthropologists most important contributions to modern thought: its investigation of culture as a distinctively human characteristic, its doctrine of cultural relativism, and its methodology of fieldwork and ethnography. They then examine specific ways in which social and cultural anthropology have advanced our understanding of human society and culture, drawing on examples from their own fieldwork. The book ends with an assessment of anthropologists present position, and a look forward to its likely future. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

An introductory undergraduate text (first edition, 1983) containing 16 chapters that cover major topics in cultural anthropology. Each chapter provides a summary and lists key terms and further reading. There are, in addition, 14 original essays by practicing anthropologists in particular subfields. Color and bandw photographs. This book demonstrates how the theories and insights of anthropology have positively influenced the conduct of global business and commerce, providing a foundation for understanding the impact of culture on global business, and global business on culture.

Many racial and ethnic groups in the United States, including blacks, Hispanics, Asians, American Indians, and others, have historically faced severe discrimination—pervasive and open denial of civil, social, political, educational, and economic opportunities. Today, large differences among racial and ethnic groups continue to exist in employment, income and wealth, housing, education, criminal justice, health, and other areas. While many factors may contribute to such differences, their size and extent suggest that various forms of discriminatory treatment persist in U.S. society and serve to undercut the achievement of equal opportunity. Measuring Racial Discrimination considers the definition of race and racial discrimination, reviews the existing techniques used to measure racial discrimination, and identifies new tools and areas for future research. The book conducts a thorough evaluation of current methodologies for a wide range of circumstances in which racial discrimination may occur, and makes recommendations on how to better assess the presence and effects of discrimination.

Mirror for Humanity A Concise Introduction to Cultural Anthropology

Employing the central integrative theme of power, POWER AND SOCIETY, 14th Edition, introduces you to each of the social sciences and demonstrates how they differ in their focus and methods. It also presents an interdisciplinary viewpoint to illustrate the nature and uses of power in society. This compelling book will stimulate your interest in the social sciences as it explores some of the central challenges facing American society, such as ideological conflict, racism and sexism, poverty and powerlessness, crime and violence, community problems, and international relations. Released for the first time in paperback, this landmark social and political volume on feminism is credited with being responsible for raising awareness, liberating both sexes, and triggering major advances in the feminist movement. Reprint.

This textbook presents a survey of physical anthropology, the branch of anthropology that studies the physical development of the human species. It plays an important part in the study of human origins and in the analysis and identification of human remains for legal purposes. It draws upon human body measurements, human genetics, and the study of human bones and includes the study of human brain evolution, and of culture as neurological adaptation to environment. The authors use the progressive term "biological anthropology" to mean "an integrative combination of information from the fossil record and the human skeleton, genetics of individuals and of populations, our primate relatives, human adaptation, and human behavior."

In *The Interpretation of Cultures*, the most original anthropologist of his generation moved far beyond the traditional confines of his discipline to develop an important new concept of culture. This groundbreaking book, winner of the 1974 Sorokin Award of the American Sociological Association, helped define for an entire generation of anthropologists what their field is ultimately about.

Ideal for any cultural anthropology course, this brief collection of ethnographic case studies exposes students to 15 different cultures. The groups selected are peoples whose traditional cultures are uniquely their own. Each has distinctive patterns and practices; each has faced the challenge of an encroaching world, with differing results. Moreover, they often provide the prime illustrations of important concepts in introductory anthropology course including Azande witchcraft, Ju/'hoansi egalitarianism, Trobriand kula exchange, and Minangkabau matriliney. As such, this volume can stand alone.

The 57 articles collected in this volume---together with the editors' introduction---provide an overview of the key debates in anthropological theory over the past century. Provides the most comprehensive selection of readings and insightful overview of anthropological theory available Identifies crucial conceptual signposts and new theoretical directions for the discipline Discusses broader debates in the social sciences: debates about society and culture; structure and agency; identities and technologies; subjectivities and translocality; and meta-theory, ontology and epistemology

This classic, bestselling study of the !Kung San, foragers of the Dobe area of the Kalahari Desert describes a people's reactions to the forces of modernization, detailing relatively recent changes to !Kung rituals, beliefs, social structure, marriage and kinship system. It documents their determination to take hold of their own destiny, despite exploitation of their habitat and relentless development to assert their political rights and revitalize their communities. Use of the name Ju/'hoansi (meaning real people) acknowledges their new sense of empowerment. Since the publication of the Third Edition in 2003, Richard Lee has made eight further trips to the Kalahari, the most recent in 2010 and 2011. The Dobe and Nyae Nyae Areas have continued to transform and the people have had to respond and adapt to the pressures of capitalist economics and bureaucratic governance of the Namibian and Botswana states. This Fourth Edition chronicles and bears witness to these evolving social conditions and their impacts on lives of the Ju/'hoansi. This concise and accessible introduction establishes the relevance of cultural anthropology for the modern world through an integrated, ethnographically informed approach. The book develops readers' understanding and engagement by addressing key issues such as: What it means to be human The key characteristics of culture as a concept Relocation and dislocation of peoples The conflict between political, social and ethnic boundaries The concept of economic anthropology Cultural Anthropology: 101 includes case studies from both classic and contemporary ethnography, as well as a comprehensive bibliography and index. It is an essential guide for students approaching this fascinating field for the first time.

Based on fieldwork among undocumented immigrants and asylum seekers *Illegal Traveller* offers a narrative of the polysemic nature of borders, border politics, and rituals and performances of border-crossing. Interjecting personal experiences into ethnographic writing it is 'a form of self-narrative that places the self within a social context'.

Victims of Progress, now in its sixth edition, offers a compelling account of how technology and development affect indigenous peoples throughout the world. Bodley's expansive look at the struggle between small-scale indigenous societies, and the colonists and corporate developers who have infringed their territories reaches from 1800 into today. He examines major issues of intervention such as social engineering, economic development, self-determination, health and disease, global warming, and ecocide. Small-scale societies, Bodley convincingly demonstrates, have survived by organizing politically to defend their basic human rights. Providing a provocative context in which to think about civilization and its costs—shedding light on how we are all victims of progress—the sixth edition features expanded discussion of “uprising politics,” Tebtebba (a particularly active indigenous organization), and voluntary isolation. A wholly new chapter devotes full coverage to the costs of global warming to indigenous peoples in the Pacific and the Arctic. Finally, new appendixes guide readers to recent protest petitions as well as online resources and videos.

Cultural Anthropology, South African Edition provides an excellent coverage of cultures around the world. It is designed to increase your understanding of the human past and present, the unity and diversity that characterise the human species and how globalisation has affected the lives of people all around the world.

In eight case studies by leading scholars in history, archaeology, business, economics, geography, and political science, the authors showcase the “natural experiment” or “comparative method”—well-known in any science concerned with the past—on the discipline of human history. That means, according to the editors, “comparing, preferably quantitatively and aided by statistical analyses, different systems that are similar in many respects, but that differ with respect to the factors whose influence one wishes to study.” The case studies in the book support two overall conclusions about the study of human history: First, historical comparisons have the potential for yielding insights that cannot be extracted from a single case study alone. Second, insofar as is possible, when one proposes a conclusion, one may be able to strengthen one's conclusion by gathering quantitative evidence (or at least ranking one's outcomes from big to small), and then by testing the conclusion's validity statistically.

The most complete introduction to the science of human evolution. With a signature blend of evolutionary theory, population genetics, and behavioral ecology, *How Humans Evolved* teaches the science and history behind human evolution. Thoroughly updated with coverage of recent research and new discoveries, the Eighth Edition offers the most

visual, dynamic, and effective learning tools in its field. The Eighth Edition also includes an expanded suite of animations that help students better visualize and understand tricky concepts, as well as real-world videos and InQuizitive adaptive learning.

In this brilliant work, the most influential philosopher since Sartre suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Demonstrate the nature of culture and its influence on people's lives. For over 40 years, the best-selling Conformity and Conflict has brought together original readings and cutting edge research alongside classic works as a powerful way to study human behavior and events. Its readings cover a broad range of theoretical perspectives and demonstrate basic anthropological concepts. The Fourteenth Edition incorporates successful articles from past editions and fresh ideas from the field to show fascinating perspectives on the human experience. Addressing important and timely topics, including global climate change and the #MeToo movement, Through the Lens of Cultural Anthropology is a fresh and contemporary textbook designed to engage students in the world surrounding them. The book offers a sustained focus on language, food, and sustainability in an inclusive format that is sensitive to issues of gender, sexuality, and race. Integrating personal stories from her own fieldwork, the author brings her passion for transformative learning to students in a way that is both timely and thought-provoking. Beautifully illustrated with over sixty full-color images, including comics and maps, the text brings concepts to life in a way sure to resonate with undergraduate readers. Through the Lens of Cultural Anthropology is supplemented by a full suite of instructor and student supports that can be accessed at lensofculturalanthropology.com.

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Accompanying CD-ROM contains ... "25 succinct video clips, each corresponding to a chapter in the textbook. Each clip is accompanied by a text overview and probing questions to exercise the student's critical thinking skills."--Page 4 of cover.

This text is designed to provide a concise introduction to cultural anthropology, carefully balancing coverage of core topics with contemporary changes in the field.

With an unparalleled art program, Our Origins is an accessible, up-to-date text that focuses on anthropology's big questions and the scientific process.

Inner city communities in the US have become "junkyards of dreams," to quote Mike Davis--wastelands where gangs package narcotics to stimulate the local economy, gunshots occur multiple times on any

given day, and dreams of a better life can fade into the realities of poverty and disability. Laurence Ralph lived in such a community in Chicago for three years, conducting interviews and participating in meetings with members of the local gang which has been central to the community since the 1950s. Ralph discovered that the experience of injury, whether physical or social, doesn't always crush dreams into oblivion; it can transform them into something productive: renegade dreams. The first part of this book moves from a critique of the way government officials, as opposed to grandmothers, have been handling the situation, to a study of the history of the historic "Divine Knights" gang, to a portrait of a duo of gang members who want to be recognized as "authentic" rappers (they call their musical style "crack music") and the difficulties they face in exiting the gang. The second part is on physical disability, including being wheelchair bound, the prevalence of HIV/AIDS among heroin users, and the experience of brutality at the hands of Chicago police officers. In a final chapter, "The Frame, Or How to Get Out of an Isolated Space," Ralph offers a fresh perspective on how to understand urban violence. The upshot is a total portrait of the interlocking complexities, symbols, and vicissitudes of gang life in one of the most dangerous inner city neighborhoods in the US. We expect this study will enjoy considerable readership, among anthropologists, sociologists, and other scholars interested in disability, urban crime, and race.

After fifteen years of teaching anthropology at a large university, Rebekah Nathan had become baffled by her own students. Their strange behavior—eating meals at their desks, not completing reading assignments, remaining silent through class discussions—made her feel as if she were dealing with a completely foreign culture. So Nathan decided to do what anthropologists do when confused by a different culture: Go live with them. She enrolled as a freshman, moved into the dorm, ate in the dining hall, and took a full load of courses. And she came to understand that being a student is a pretty difficult job, too. Her discoveries about contemporary undergraduate culture are surprising and her observations are invaluable, making *My Freshman Year* essential reading for students, parents, faculty, and anyone interested in educational policy.

In a first-of-its-kind format, *Cultural Anthropology: A Problem-Based Approach* is organized by problems and questions rather than topics, creating a natural discussion of traditional anthropological concerns such as kinship, caste, gender roles, and religion. This brief text promotes critical thinking through meaningful exercises, case studies, and simulations. Readers will learn how to analyze their own culture and gain the tools to understand the cultures of other societies. The Eighth Edition has been thoroughly updated and reorganized to emphasize contemporary issues around social and economic inequality, gender identity, and more.

The *Oxford Handbook of Human Development and Culture* provides a comprehensive synopsis of theory and research on human development, with every chapter drawing together findings from cultures around the world. This includes a focus on cultural diversity within nations, cultural change, and globalization. Expertly edited by Lene Arnett Jensen, the Handbook covers the entire lifespan from the prenatal period to old age. It delves deeply into topics such as the development of emotion, language, cognition, morality, creativity, and religion, as well as developmental contexts such as family, friends, civic institutions, school, media, and work. Written by an international group of eminent and cutting-edge experts, chapters showcase the burgeoning interdisciplinary approach to scholarship that bridges universal and cultural perspectives on human development. This "cultural-developmental approach" is a multifaceted, flexible, and dynamic way to conceptualize theory and research that is in step with the cultural and global realities of human development in the 21st century.
