Nothing General About It Maurice Benard, Susan Black, 2020-04-07 Instant New York Times bestseller! The Emmy Award-winning star of General Hospital chronicles his astonishing and emotional life journey in this powerful memoir—an inspiring story of success, show business, and family, and his struggle with mental illness. This shocking true story is General Hospital on anabolic steroids. — Mehmet Oz, M.D., Emmy Award-winning host of The Dr. Oz Show Maurice Benard has been blessed with family, fame, and a successful career. For twenty-five years, he has played one of the most well-known characters on daytime television: General Hospital’s Michael “Sonny” Corinthos, Jr. In his life outside the screen, he is a loving husband and the father of four. But his path has not been without hardship. When he was only twenty, Maurice was diagnosed with bipolar disorder. In *Nothing General About It*, Maurice looks back to his youth in a small town and his tenuous relationship with his father. He describes how his bipolar disorder began to surface in childhood, how he struggled to understand the jolting mood swings he experienced, and how a doctor finally saved his life. For years Maurice was relentless in his goal to be a successful actor. But even after he “made it,” he still grappled with terrifying lows, breakdowns, and setbacks, all while trying desperately to maintain his relationship with his wife, who endured his violent, unpredictable episodes. Maurice holds nothing back as he bravely talks about what it was like to be medicated and institutionalized, and of how he learned to manage his manic episodes while on the set of GH. *Nothing General About It* is also an incredible love story about an enduring marriage that demonstrates what those vows—for better, for worse, in sickness and in health—truly mean. Maurice also pays tribute to the community that has been there for him through thick and thin, and ruminates on the importance of both inherited and created family. A shocking, riveting, and utterly candid memoir of love, adversity, and ultimately hope, *Nothing General About It* offers insights and advice for everyone trying to cope with mental illness, and is a motivational story that offers lessons in perseverance—of the importance of believing in and fighting for yourself through the

darkest times. *Nothing General About It* includes a 16-page insert featuring approximately 50 photographs.

Television Characters Vincent Terrace, 2011-09-22 Alice Kramden's (*The Honeymooners*) first job was as a jelly donut stuffer before she was promoted to donut taster. John Robinson (*Lost in Space*) was a professor at the University of Stellar Dynamics and his daughter Penny had an IQ of 147. Sam Malone (*Cheers*) graduated from Boston Prep and then was a pitcher for the Boston Red Sox (jersey number 16) before he bought the bar where everybody knows your name... Detailed biographical information on 1,485 television characters who appeared from 1947 through 2004 is provided in this extensive reference work (more than 200,000 facts). Character entries (primarily from prime time network, cable and syndicated series) provide full names, years and place of birth, education, home address, marital status, jobs and much more. There is an index of performers and two appendices.

The Television Crime Fighters Factbook Vincent Terrace, 2015-10-02 Did you know that detective Adrian Mont (*Monk*) is afraid of milk? That Pinky's real first name on *The Roaring '20s* is Delaware? That on *Charlie's Angels*, Sabrina was the only Angel who was never seen in a bikini or swimsuit? These are only a few of the more than 9,800 facts readers will find in this work, which presents detailed information on 134 syndicated and cable series broadcast from 1948 to 2003, plus six experimental programs broadcast from 1937 to 1946 and 204 unsold pilots broadcast from 1948 to 1996, that featured the work of television's law enforcers who risk their lives to solve crimes and bring criminals to justice. The entries are arranged alphabetically and provide such details as character names, addresses, names of pets, telephone numbers, and license plate numbers--in short, anything and everything that adds interest to a program and its characters. Many of the entries contain information about related projects, including TV movies and pilots that were broadcast as part of a series (for example, Sharon Stone's appearance as detective Dani Starr on the Hollywood Starr episode of *T.J. Hooker*).

Radio Programs, 1924-1984 Vincent Terrace, 2015-09-02 This is an encyclopedic reference work to 1,802 radio programs broadcast from the years 1924 through 1984. Entries include casts, character relationships, plots and storylines, announcers, musicians, producers, hosts, starting and ending dates of the programs, networks, running times, production information and, when appropriate, information on the radio show's adaptation to television. Many hundreds of program openings and closings are included.

Experimental Television, Test Films, Pilots, and Trial Series, 1925 Through 1995 Vincent Terrace, 1997 Test films, pilots, trial series, limited runs, summer tryouts--by whatever name, television networks have produced thousands of experimental

shows that never made it into the regular line-up. Some were actually shown, but failed to gain an audience; many others never even made it on the air. This work includes over 3,000 experimental television programs, both aired and unaired, that almost became a series. Each entry includes the name of the show, length, network, air date (if appropriate), a fact-filled plot synopsis, cast, guest stars, producer, director, writer, and music coordinator. Information for this work was gathered primarily by watching the shows, reading years' worth of press releases, and using sources such as TV Guide and Variety to augment the primary research.

Evaluating Second Language Education J. Charles Alderson, Alan Beretta, 1992-02-27 Counter Responsibility for planning language teaching programs now carries with it a strong element of accountability. Evaluation of the whole process of course design, development, and implementation is therefore a necessary area of activity for course designers, language planners, and researchers. This book brings together accounts of recent work in this increasingly important field and will be a valuable resource both for those already engaged in evaluation and for those in training. Part One presents a review of the literature, covering past developments in the wider field of educational evaluation, as well as specifically in second language education. Part Two contains a series of eight original case-studies, written by scholars involved in evaluations in widely divergent settings. The focus in each case is on how the evaluator addresses the difficulties central to each study, and the findings are also included. The final Part Three provides practical guidance for evaluators, offering suggestions about how to set up and carry out evaluations in any given setting.--Publisher's website.

Stranger Suns George Zebrowski, 2014-04-01 The orbiting tachyon detector was designed by physicist Juan Obrion to identify life in other star systems, but even though he expected to find some signs of life, he certainly didn't expect to find any life on Earth. When Obrion discovers that a culture has been concealed for many years far below Antarctica, he ventures out as part of a four-man team to explore the unknown. Juan, Lena, Malachi, and Magnus are awestruck when they discover a myriad of portals to parallel lands, but the maze they fall into makes them wonder if their journey will ever come to an end.

Encyclopedia of Television Shows, 1925 Through 2007: A-E Vincent Terrace, 2009 This work represents decades of research and television's entire history. While documentation regarding cast and personnel is now often found online, descriptions of the shows from authoritative sources are still not widely available. Terrace fills that gap with this work, which covers more than 9,350 shows and constitutes the most comprehensive documentation of TV series ever published--Provided by publisher.

The Language Web Jean Aitchison,1997 Language is like a vast spider's web. In this volume Jean Aitchison explores the different facets of this web. She begins with the cobweb of false worries which surrounds language. She then discusses how language evolved in the human species, how children acquire it, and how educated English speakers remember 50,000 or more words. Finally, she argues that people are right to be concerned about language, though not in the ways traditionally assumed. This is the text of the 1996 BBC Reith lectures, slightly revised for publication, with illustrations and full references, and an afterword which looks at the reception of the lectures.
