Large mass bolometers are used in particle physics experiments to search for rare processes, like neutrinoless double beta decay and dark matter interactions. In the next years the CUORE experiment (a 1 Ton detector composed by 1000 crystals of TeO₂ operated as bolometers in a large cryostat at 10mK) will be the particle physics experiment with the highest chance of discovering the Majorana neutrino, a long standing and yet fundamental question of particle physics. The study presented in this book was performed on the bolometers of the CUORE experiment. The response function of these detectors is not linear in the energy range of interest, and it changes with the operating temperature, worsening the performances. The nonlinearity appeared to be dominated by the thermistor and the biasing circuit used to read the bolometer, and was modeled using few measurable parameters. A method to obtain a linear response is the result of this work. It allows a great improvement of the detector operation and data analysis. With a foreword by Fernando Ferroni.

Rich and detailed poems by one of America's preeminent experimental writers. *il cuore* : the heart is a major new collection of poetry by Kathleen Fraser, one of the most significant poets of the last generation and a writer of unusual courage and inventiveness. From the intimacy of early poems to the syntactic play of her much-praised book, when new time folds up (1993), Fraser's work examines fields of possibility, where the visual, theoretical, and lyrical collide. This book provides a generous selection of work both new and old, tracing the development of her poetics over the last three decades. Rich with detail, these poems radicalize intention by embracing error, as in "boundayr," and reassert language innovation as a feminist strategy. They lead us toward "the infinity of a door only slightly ajar" and have established Fraser as one of America's preeminent experimental writers.

The Cure of the Heart is a poetry book, completely equipped with Italian translations, about the life of a child overcoming and growing up in an Italian American household, with a parent who has been incarcerated since she was nine years old. It is based on true events and discusses the author's personal experience with sexual assault, heartbreak, and insecurity issues. This powerful story is told through poetic stylistics and in chronological order of the author's life. It is told through the heart of New York City, constantly surviving Brooklyn and Staten Island stereotypes. This title comes from the author using writing as a way to cope with everything she was forced to overcome.
