Isabel Valdes' most recent book features a completely new analysis of Latino segments, based on how long Latinos have lived in the U.S. culture. These new segments provide an understanding not just of acculturation, but of how the length of time in country affects the way companies should position their products for Latinos. These descriptions will help you quantify and differentiate among people who are recent arrivals in the U.S., those who are third generation and beyond, and those who are second generation. In reality, a huge share of the Latino population was born in the United States and the majority of babies born today in the U.S. have Latino parents.

By 2010, Jeffrey Humphrey, director of the Selig Center, projects Hispanic buying power will top \$1 trillion. By 2050, some estimates place the value of Hispanic consumer marketplace between \$2.5 and \$3.6 trillion. Chapter 8: Just Call Me Slick! People Really Hate to be "Sold" What We've Accomplished So Far By now you know that branding is not exclusively about business identity in the form of a logo or advertising. You might recognize the Nike brand from its iconic swoosh logo. You might immediately think of McDonald's when you think of fast food because McDonald's commercials are ubiquitous, but by this point, you know that icons and awareness do not constitute a brand. You also know that big businesses are not the only brands. Your business does not have to be the size of GM, Microsoft, AOL Time Warner or Wal-Mart. Your business could be run out of your home with you as the sole employee. You could conduct business from a small office with a single assistant, or in a store with several employees. The size, scope, and location of your business does not change the fact that it's a brand, nor should any of these factors truly impact your brand if you're focusing on one-on-one relationships. Businesses are not the only brands, either. Every individual is a brand, as are organizations from non-profits to political parties to social clubs. For example, the Gates Foundation, the Red Cross, UNICEF, Make-A-Wish Foundation, Boy Scouts, Girl Scouts, Kiwanis Clubs, Rotary Clubs, Republican Party, and Democratic Party — all are brands. The concept of branding I've been articulating is personal, which means everyone needs to develop one. Each category — from individuals to organizations to businesses large and small — brings with it its own brand development challenges. At the same time, however, these challenges are minimized when you understand your brand identity. Throughout this book, I have written about creating unique and memorable experiences for your customers. Chapter 2 defined a brand in terms of establishing relationships with your customers. Chapter 3 distinguished between types of experiences you can generate for your customers, and differentiated a brand experience from ones that are merely

transactional or simply meet customer expectations. Chapter 4 highlighted the importance of changing your perspective to adopt your customer's point of view, rather than emphasize your product or service. Chapter 5 analyzed the results of changing your perspective. Chapter 6 admonished you to avoid overstating your own worth. Finally, Chapter 7 focused on the ripple effects of your actions. Thus, most of the facets of branding I've been articulating since the beginning of this book have emphasized how you affect the customer's perceptions. In other words, I've been talking about the customer's connection to your brand. Now I'm going to talk about how you perceive your own brand, and about your connection to your own brand. Creating An Authentic Brand Identity: Sincerity Can't Be Faked! First, you must take stock of your brand identity. In the Introduction to this book I stated that everyone is a brand. Everyone has a brand identity, but not everyone understands their own brand correctly, or even knows what it is. You cannot develop an authentic, sincere brand without this understanding. And you cannot create brand evangelists — people who trust you and praise your brand every chance they get — without an authentic, sincere brand. You earn someone's trust through your actions, so you'd better know how to act! Understanding your brand identity, and developing the trust that turns your customers into evangelists, involves knowing what your own beliefs and values are. The fact is, when you walk in your customer's shoes, when you change your perspective to deliver the impossible, you're reflecting a core element of your identity, your values, and your beliefs. When you are sincere about trying to understand your customers' needs, desires, and what they'd truly love from you, a genuine connection is made that is the foundation of trust between you and your customers. Compassion and sincerity can't be faked. Branding is not a matter of putting on a persona that others will like. It's not playing a role, putting on a mask, or pretending — all that is superficial, a veneer that covers up the "real" you. Moreover, a veneer can be quickly spotted. I don't think there's anyone that hasn't had the experience of being "sold." It's uncomfortable precisely because it's not authentic. The experience simply feels hollow. Think about the slick car salesman who's "going to do what it takes to get you into this car!" Maybe he's heavy on the 'hale fellow well met,' demeanor, or drenches you with flattery. When the time comes to make an offer on the car, he engages in an overly dramatic show of anxiety. "I'm gonna see my manager right now and see if I can talk him into this one. Between you and me, he's having a bad day, but I'm really gonna work on him." Eventually, the long, drawn out ceremonial dance ends with you signing the lease or sale papers, but you walk away knowing the whole experience could have been different, and you dread the prospect of going through it again. Why do you dread it? What has soured you on going through the process again? In a word: insincerity. Insincerity is the wolf trotting around in sheep's clothing pretending to be something he's not. When you experience a wolf in sheep's clothing, you're soured on future interactions. It is this sort of insincerity that destroys a brand or prevents an authentic one from being established. The car salesman example is cliché, just like the sales girl at the clothing store who tells you every single piece of clothing you try on looks so good! Though they're cliché for a reason, we tend to forget just what that reason is. We instantly recognize the cliché, but not what made it true in the first place.

Did you know that by adding a few simple steps to your selling process you could achieve sales you only dreamt of in the past? GoodbyeSellingProblems.com provides a 12 step system that you, as a business owner, or you, as a sales manager, can implement in less than a day and dramatically increase your results. Your sales efforts become much more productive and less stressful. It provides a framework for small businesses to structure their sales process. It strips away all the "fluff" and confusion that you encounter with most expensive sales training courses. The simple 12 step system provides a "nuts and bolts" approach to selling. It allows you to enter every sales situation with a purpose for closing the sale and gets you away from the deadly "sales visit" dilemma that most business owners and sales professionals fall into. In a just a few hours, you can literally gather the information that system introduces you to and make the most powerful sales presentation your company has ever encountered. When this system becomes part of your selling culture, it will provide you with improved sales, greater margins, and eliminate the competition. Author, Buzz Glover, after quietly reviewing and critiquing the sales people that called on him in his own businesses for over 15 years, became disillusioned with the fact that the great majority of salespeople were ill-prepared to sell their products or services. He knew that if he could introduce them to a system that he had developed and refined as a salesperson (and later as a sales manager), they could easily become much more effective at closing more sales faster! The system became a reality when he wrote this book as a companion to his system's website, [www.goodbyesellingproblems.com](http://www.goodbyesellingproblems.com). Through this sales system he is confident that he can change the way small businesses sell and make fundamental cultural changes in their approach to marketing their products and services.

Mitchell's personal approach to customer service involves a simple 5-stage process that anyone can master: 1st Stage: Making the Connection Learn how to make a great first impression that engages customers immediately—and keeps them coming back again and again. 2nd Stage: Decoding the Mission Look for easy-to-read tells to determine what each customer wants—and what you need to do to make him or her happy. 3rd Stage: Show and Share Instead of a hard sales pitch, engage your customer in a genuine one-on-one conversation and form a personal connection to you and your product. 4th Stage: Allowing the Buy Adopt a warm, relaxed manner to gradually establish trust, gently convince the customer—and ultimately close the deal. 5th Stage: The Kiss Goodbye Just as important as first impressions, make a strong lasting impression that makes each customer feel valued, special, and delighted. The Extra Stage: One for Good Measure Take that extra step to follow up on your customers, build on your connections, and make them your customers for life. These winning sales strategies will help you adjust your mindset, refine your selling style, and embrace the joy and value of caring for your customers. Mitchell's tried-and-true techniques make it easy to size up your customer quickly and customize your approach perfectly to suit each individual and situation. He brings tremendous value in his explanations of how to connect with customers in a way that requires awareness and authenticity. Arjun excels in his ability to shift his perspective, and reframe situations, so that the reader can see things as both the business and the customer. His first-hand experiences are relatable and applicable to seemingly every business. Arjun cleverly examines plausible and real-life business scenarios, through the lens of karma, which he defines as outcomes based on one's own efforts and actions. The reader is left with a deeper understanding of what works to

"The Unexpected" posits a new theory about the relationship between service and customer loyalty, as well as how to execute it. Four elements comprise The Unexpected: It is memorable, distinguishable, viral, and profitable. Delivering The Unexpected starts at the top of an organization and requires senior executive buy-in. It is executed at ground level and requires empowerment of employees at all levels of an organization. The Unexpected does not have to be costly, and relies more upon creativity, innovation and training team members to see - and act upon - opportunities when they present themselves. Finally, it can be delivered by any organization in any industry and of any size. "The Unexpected" is designed for entrepreneurs and business owners; senior executives; educational professionals; and front-line service employees. The book is written by Howard Brodsky, co-founder and co-CEO of CCA Global Partners, a \$10 billion privately held organization; and Dustin S. Klein, publisher of Smart Business magazine and co-author of the Amazon #1 bestseller, "The Benevolent Dictator".

In this completely revised and updated edition of the customer service classic, Carl Sewell enhances his time-tested advice with fresh ideas and new examples and explains how the groundbreaking "Ten Commandments of Customer Service" apply to today's world. Drawing on his incredible success in transforming his Dallas Cadillac dealership into the second largest in America, Carl Sewell revealed the secret of getting customers to return again and again in the original Customers for Life. A lively, down-to-earth narrative, it set the standard for customer service excellence and became a perennial bestseller. Building on that solid foundation, this expanded edition features five completely new chapters, as well as significant additions to the original material, based on the lessons Sewell has learned over the last ten years. Sewell focuses on the expectations and demands of contemporary consumers and employees, showing that businesses can remain committed to quality service in the fast-paced new millennium by sticking to his time-proven approach: Figure out what customers want and make sure they get it. His "Ten Commandants" provide the essential guidelines, including: • Underpromise, overdeliver: Never disappoint your customers by charging them more than they planned. Always beat your estimate or throw in an extra service free of charge. • No complaints? Something's wrong: If you never ask your customers what else they want, how are you going to give it to them? • Measure everything: Telling your employees to do their best won't work if you don't know how they can improve.

Finally, the book that all professionals frustrated with fleeting client loyalty and relentless price pressure have waited for -- the first in-depth, client-tested guide to developing lasting business relationships. What separates extraordinary professionals from ordinary ones? Why are some professionals always drawn into their clients' inner circle of advisers, while others are employed on a one-shot basis and treated like vendors? Based on groundbreaking research, Clients for Life sets forth a comprehensive framework for how professionals in all fields can develop breakthrough relationships with their clients and enjoy enduring client loyalty. Drawing on insights from extensive interviews with both leading CEOs and today's most prominent client advisers, Jagdish Sheth and Andrew Sobel debunk the conventional wisdom about professional success -- "find a specialty, do good work" -- as hopelessly inadequate in a world where clients have unlimited access to information and expertise. The authors replace these tired conventions with an innovative blueprint, supported by over one hundred case studies and examples drawn from consulting, financial services, law, technology, and other fields, for how you can evolve from an expert for hire -- a commodity -- to an extraordinary adviser. Riveting portraits of both exceptional contemporary professionals and legendary advisers such as Aristotle, Thomas More, Niccolò Machiavelli, and J. P. Morgan reveal how great client relationships are achieved in practice. Readers will learn, for example, to develop selfless independence, which tempers complete emotional, intellectual, and financial independence with a powerful commitment to client needs; to become deep generalists and overcome the narrow perspective caused by specialization; to systematically build lifelong trust; and to cultivate the power of synthesis -- big-picture thinking -- that is so highly valued by clients. Acclaimed by leading management thinkers, Clients for Life clearly illustrates the most important attributes and strategies of extraordinary client advisers and shows how you can use them to enrich your own relationships. It provides sophisticated professionals with the tools and insights they need to reap the rewards of lifetime client loyalty.
