This book offers practical advice for building organizations with social responsibility and sustainability organically built in – based on two-way communication between human resources (HR) and public relations (PR) departments working together as an organizational conscience touchstone benefiting People, Planet, and Profit.

Evaluating Public Relations advises PR practitioners at all levels how to demonstrate clearly and objectively to their clients and managers the impact that their work has. The authors draw on both their practical and academic experience to discuss a diverse range of evaluation methods and strategies, illustrating them throughout with award winning case studies and interviews. Fully revised and updated, the second edition of this book allows practitioners to more closely

monitor and evaluate their campaigns and helps them develop more robust campaign strategies. This edition includes new information on: online evaluation; measuring relationships; practitioner culture, evaluation procedures and structures; payment by results; econometrics; word of mouth. This book reports findings of a three-nation study of public relations and communication management sponsored by the International Association of Business Communicators (IABC) Research Foundation. The Excellence Study provides communication managers and public relations practitioners with information critical to their own professional growth, and supplies organizations with tools that help them communicate more effectively and build beneficial relations with key publics. Communication excellence is a powerful idea of sweeping scope that applies to all organizations -- large or small -- that need to communicate effectively with publics on whom the organization's survival and growth depend. The essential elements of excellent communication are the same for corporations, not-for-profit organizations, government agencies, and professional/trade associations. And they are applicable on a global basis. The study identifies three spheres of communication excellence. These spheres consider the overall function and role of communication in organizations, and define the organization of this book. They are: \* the core or inner sphere of communication excellence -- the knowledge base of the communication department, \* the shared expectations of top communicators and senior managers about the function and role of communication, and \* the organization's culture -- the larger context that either nurtures or impedes communication excellence. This text also examines communication excellence as demonstrated in specific programs developed for specific publics.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Directed primarily toward undergraduate marketing college/university majors, this text also provides practical content to current and aspiring industry professionals. Written by two of the most respected individuals in the field, *Public Relations Practices* presents timeless case studies to help future practitioners develop agility in the principles and applications of effective two-way communications likely to confront them and their employer.

Based largely on primary sources, this book presents the first detailed history of public relations from 1900 through the 1960s. The author utilized the personal papers of John Price Jones, Ivy L. Lee, Harry Bruno, William Baldwin III, John W. Hill, Earl Newsom as well as extensive interviews -- conducted by the author himself -- with Pendleton Dudley, T.J. Ross, Edward L. Bernays, Harry Bruno, William Baldwin, and more. Consequently, the book provides practitioners, scholars, and students with a realistic inside view of the way public relations has developed and been practiced in the United States since its beginnings in mid-1900. For example, the book tells how: \* President Roosevelt's reforms of the Square Deal brought the first publicity agencies to the nation's capital. \* Edward L. Bernays, Ivy Lee, and Albert Lasker made it socially acceptable for women to smoke in the 1920s. \* William Baldwin III saved the now traditional Macy's Thanksgiving Day parade in its infancy. \* Ben Sonnenberg took Pepperidge Farm bread from a small town Connecticut bakery to the nation's supermarket shelves -- and

made millions doing it. \* Two Atlanta publicists, Edward Clark and Bessie Tyler, took a defunct Atlanta bottle club, the Ku Klux Klan, in 1920 and boomed it into a hate organization of three million members in three years, and made themselves rich in the process. \* Earl Newsom failed to turn mighty General Motors around when it was besieged by Ralph Nader and Congressional advocates of auto safety. This book documents the tremendous role public relations practitioners play in our nation's economic, social, and political affairs -- a role that goes generally unseen and unobserved by the average citizen whose life is affected in so many ways by the some 150,000 public relations practitioners.

Now in its third edition, *In the News* is the standard Canadian textbook on media relations, used across the country. The authors provide an introduction to media relations, grounded in both communications theory and hands-on, day-to-day experience. Whether you need to promote your issues to the nation or reach small, targeted groups, this book is your step-by-step guide. *In the News* is perfect for communications students; media relations practitioners in the private, public and voluntary sectors; and anyone who wants to break a story.

Initiated by the editors' interest in cross-disciplinary exploration, this volume evolved to its current form as a result of the need for a framework for understanding public relations and the potential impact of organization-public relationships on the study, practice, and teaching of public relations. Ledingham and Bruning include contributions that present state-of-the-art research in relationship management, applications of the relational perspective to various components of public relations, and the implications of the approach to influence further research and practice. The discussion conducted here is certain to influence and promote future theory and practice on the concept of relationship management.

Beginning with the basic premise that public relations can best be understood as a specialized type of communication, the contributors to this volume establish public relations as a vital and viable realm for communication research and theory development. Through the application of communication theories, they attempt to explain and predict public relations practices and then use these practices to develop communication theories. Their discussions fall into three distinct categories: metatheory, theory, and examples of applications of theories. An ideal volume for professionals and students in communication, journalism, and related fields.
