Communities provide the context in which programs, principles, and policies are implemented. Their needs dictate the kinds of programs that community organizers and advocates, program developers and implementers, and researchers will bring to bear on a problem. Their characteristics help determine whether a program will succeed or fail. The detailed workings of programs cannot be separated from the communities in which they are embedded. Communities also represent the front line in addressing many behavioral health conditions experienced by children, adolescents, young adults, and their families. Given the importance of communities in shaping the health and well being of young people, the National Academies of Sciences, Engineering, and Medicine held a workshop in June 2016, to examine the implementation of evidence-based prevention by communities. Participants examined questions related to scaling up, managing, and sustaining science in communities. This publication summarizes the presentations and discussions from the workshop.

This book offers a number of ground rules for being successful at work, based on Eastern philosophies and martial arts, at the heart of which lies the right balance between reason and intuition. Concepts such as efficiency, the overall picture, proactive behaviour, breathing, the here and now, peace, freeing yourself of hindrances and perceiving what is true are the underlying principles of the classic Eastern martial arts, but they can also be directly applied to modern (business)life. The ground rules in this book are all you need to teach yourself to use your own strength to find the right answer to any situation in this constantly changing world and to be able to enjoy your work more, with less stress and strain. They lead to inner peace and give an insight into the overall picture. Achieving success no longer requires an effort - instead it becomes a state of being. Bjørn Aris has been studying the art of Eastern fighting and Zen philosophies for more than 35 years. After a 12 year career in investment banking, he moved on to become a successful entrepreneur, and since 2000 he has been working as a trainer and advisor to business executives in the corporate world. By effectively fusing Eastern

wisdom with Western knowledge he has created the Mental Bridging (c) training programme, which makes sure you achieve better results with less effort or stress and more pleasure. Scientifically validated through academic studies in 2007 and 2012, it received an innovation award in 2013. More than 10,000 participants from 60 different countries have attended and benefitted from Bjørn's workshops

Political advertising is as important as ever, ad spending records are broken each election cycle, and the volume of ads aired continues to increase. Political Advertising in the United States is a comprehensive survey of the political advertising landscape and its influence on voters. The authors, co-directors of the Wesleyan Media Project, draw from the latest data to analyze how campaign finance laws have affected the sponsorship and content of political advertising, how 'big data' has allowed for more sophisticated targeting, and how the Internet and social media has changed the distribution of ads. With detailed analysis of presidential and congressional campaign ads and discussion questions in each chapter, this accessibly written book is a must-read for students, scholars and practitioners who want to understand the ins and outs of political advertising.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Addressing disability not as a form of student impairment—as it is typically perceived at the postsecondary level—but rather as an important dimension of student diversity and identity, this book explores how disability can be more effectively incorporated into college environments. Chapters propose new perspectives, empirical research, and case studies to provide the necessary foundation for understanding the role of disability within campus climate and integrating students with disabilities into academic and social settings. Contextualizing disability through the lens of intersectionality, *Disability as Diversity in Higher Education* illustrates how higher education institutions can use policies and practices to enhance inclusion and student success.

From the author of the #1 New York Times bestseller *She Persisted* comes a beautiful book about the animals who share our planet--and what we can do to help them survive. Did you know that blue whales are the largest animals in the world? Or that sea otters wash their paws after every meal? The world is filled with millions of animal species, and all of them are unique and special. Many are on the path to extinction. In this book, Chelsea Clinton introduces young readers to a selection of endangered animals, sharing what makes them special, and also what threatens them. Taking readers through the course of a day, *Don't Let Them Disappear* talks about rhinos, tigers, whales, pandas and more, and provides helpful tips on what we all can do to help prevent these animals from disappearing from our world entirely. With warm and engaging art by Gianna Marino, this book is the perfect read for animal-lovers and anyone who cares about our planet. This book considers the promise of women's and gender history for revolutionizing our understanding of the past while also acknowledging the current national political, financial, and other contextual realities that can (and do) constrain or promote the possibilities for researching and writing women's history. The editors assert that the promise of women's and gender history is a cutting edge field of research, "a revolutionary development in the politics of historical scholarship," essential for understanding the human past. Further, they argue for the inseparability of women's history and gendered analytical approaches. The contributors to the volume address questions including: what have been the achievements of women's and gender history over the past two decades? To what extent has it succeeded in making women's history an integral part of historical study rather than an optional specialist area? What impact has the study of manhood, masculinities, and men's gendered power had on our understanding of women's lives? What is the relationship between gender studies and new critical histories of colonialism and empire, contact zones, cross-cultural encounters, and racialization? How is new work on cultural geography and spatial categories impacting on our historical understandings of bodily difference? This book was originally published as a special issue of the Women's History Review.
