The New Black is Darian Leader's compassionate and illuminating exploration of melancholy. What happens when we lose someone we love? A death, a separation or the break-up of a relationship are some of the hardest times we have to live through. We may fall into a nightmare of depression, lose the will to live and see no hope for the future. What matters at this crucial point is whether or not we are able to mourn. In this important and groundbreaking book, acclaimed psychoanalyst and writer Darian Leader urges us to look beyond the catch-all concept of depression to explore the deeper, unconscious ways in which we respond to the experience of loss. In so doing, we can loosen the grip it may have upon our lives. 'His orthodox, psychoanalytical approach, produces an unpredictable, occasionally brilliant book. The New Black is a mixture of Freudian text, clinical assessments and Leader's own brand of gentle wisdom.' Herald 'Compelling and important . . . an engrossing and wise book.' Hanif Kureishi 'There are many self-help books on the market . . . The New Black is a book that might actually help.' Independent Darian Leader is a psychoanalyst practising in London and a member of the Centre for Freudian Analysis and Research and of the College of Psychoanalysts - UK. He is the author of The New Black, Strictly Bipolar, Why do women write more letters than they post?, Promises lovers make when it gets late, Freud's Footnotes and Stealing the Mona Lisa, and co-author, with David Corfield, of Why Do People Get Ill? He is Honorary Visiting Professor in the School of Human and Life Sciences, Roehampton University.

Available technical data for every car is also provided. The Car Design Yearbook is the most comprehensive annual reference to the latest trends in car design worldwide ever published. No one interested in cars--whether as an industry insider or a car enthusiast--can afford to be without this definitive guide.

The energy industry is boiling over with changes. Deregulation, new opportunities in foreign fields and markets and environmental challenges are rushing together head-on to shape the energy and utilities business of the future. Extremely deep offshore wells in the Gulf of Mexico and offshore of West Africa are being drilled at immense cost. Meanwhile China has become a major energy importer and Russia has become a major exporter. In the U.S., Europe and Japan, renewable and alternative energy sources are developing quickly, including big breakthroughs in wind power and fuel cells. This exciting new reference book covers everything from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil field services and engineering. Petroleum topics include upstream and downstream. Additional topics include coal, natural gas and LNG. More than a dozen statistical tables cover everything from energy consumption, production and reserves to imports, exports and prices. Next, our unique profiles of the Energy 500 Firms are also included, with such vital details as executive contacts by title, revenues, profits, types of business, web sites,

competitive advantage, growth plans and more. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

"This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."

First published in 1983, *Collapse and Survival* was written as an examination of the position of industry worldwide at the time of publication. The book looks at the post-war growth of output and the policies adopted in advanced countries, socialist countries, and LDCs to bolster and shape this growth. It explores in detail the experience of firms across several of the industries at the forefront of the changes in world industry since 1945, including automobiles, steel, consumer electronics, advanced electronics, and oil refining. Particular attention is paid to the influence that the majority of countries, public agencies, lobbyists and other interests have in shaping the business environment in which firms operate. This analysis provides the basis for a description of the business strategies open to firms in each of these key industries. *Collapse and Survival* will appeal to those with an interest in the history of industrial and development economics, and international business and economics.

Dates are an important fruit, especially in many African, Middle-Eastern and Asian countries. In recent years this fruit has gained significant importance in terms of global commerce. During the period 1990–2009, global production of dates saw an increase of 219% and this trend is expected to continue as per FAO projections. Some of the major challenges confronting date fruit production and commerce are issues related to postharvest handling technologies, use of appropriate processing and packaging technologies, food safety aspects and quality assurance. *Dates: Postharvest Science, Processing Technology and Health Benefits* provides contemporary information that brings together current knowledge and practices in the value chain of dates, from production through to consumption. The important book published by Wiley Blackwell features coverage from leading experts on innovative processing technologies, packaging, quality management and pest control for dates. It is the only book to address the science and technology of the postharvest production of dates, a commercially important and growing sector of the food industry.

*A Life in Music* reviews five decades of the rich and uniquely varied musical life of Daniel Barenboim. A child prodigy as a pianist and a virtuoso conductor of symphonies and opera, he has known and worked with many of the most distinguished and exciting musicians of the 20th century, not least his own wife Jacqueline du Pré. With memories of music heard and performed, and thoughtful examinations of global influences and professional inspiration, *A Life in Music* offers a profound window to the mind of one of the twentieth century's greatest musicians. In this definitive edition, Barenboim discusses his work in Bayreuth, where he has been the most important artistic influence on the annual Wagner Festival; his involvement with the rebirth of the Berlin State Opera House in post-wall Berlin, and as conductor of two great orchestras in Berlin and Chicago; his

thoughts on the state of Israel and his work with young Israeli and Arab musicians in Germany; his worldwide travels, his discovery of young talent and his insights into the changing world of music.

Collection of political pieces, many of which originally appeared in the magazine Counterpunch with a foreword by Jeffrey St. Clair.

A gathering of votes from famous and prestigious drivers such as Carroll Shelby, Bob Bondurant, Sir Stirling Moss, Dan Gurney, and Jay Leno, this book reveals—for the first time—what the professionals list as the best of the best. This is a full-color book that will please anyone who's passionate about driving, even with more mundane transportation. "There are cars," says the author, "and then there are those greater than the sum of their parts." The expert panel picked the top fifty, largely avoiding traditional choices they call simply "fundamental to automotive history." This panel agreed that the Top Five list includes the 1957 Ferrari Testa Rossa, the 1913 Mercer Racabout, the 1932–37 Model SJ Dusenbergs, the 1955 Mercedes-Benz 300 SLR, and the Maserati Birdcage. Stunning full-color photos complement the passionate text from expert drivers in a book that will rev up the RPMs of many a man (and woman).

The Airbus A380 is the world's most recognised and most talked about airliner since the Boeing 747 and Concorde appeared in the skies in the late 1960s. Designed to challenge Boeing's monopoly in the large-aircraft market, it made its first flight in April 2005, entering commercial service two years later with Singapore Airlines. This jet has become so popular that every four minutes--24 hours a day, seven days a week--an A380 is taking off or landing somewhere in the world. There is no other development in recent aviation history to rival this remarkable aircraft.
