The Fear of Barbarians Tzvetan Todorov,2010-10-15 The relationship between Western democracies and Islam, rarely entirely comfortable, has in recent years become increasingly tense. A growing immigrant population and worries about cultural and political assimilation—exacerbated by terrorist attacks in the United States, Europe, and around the world—have provoked reams of commentary from all parts of the political spectrum, a frustrating majority of it hyperbolic or even hysterical. In *The Fear of Barbarians*, the celebrated intellectual Tzvetan Todorov offers a corrective: a reasoned and often highly personal analysis of the problem, rooted in Enlightenment values yet open to the claims of cultural difference. Drawing on history, anthropology, and politics, and bringing to bear examples ranging from the murder of Theo van Gogh to the French ban on headscarves, Todorov argues that the West must overcome its fear of Islam if it is to avoid betraying the values it claims to protect. True freedom, Todorov explains, requires us to strike a delicate balance between protecting and imposing cultural values, acknowledging the primacy of the law, and yet strenuously protecting minority views that do not interfere with its aims. Adding force to Todorov's arguments is his own experience as a native of communist Bulgaria: his admiration of French civic identity—and Western freedom—is vigorous but non-nativist, an inclusive vision whose very flexibility is its core strength. The record of a penetrating mind grappling with a complicated, multifaceted problem, *The Fear of Barbarians* is a powerful, important book—a call, not to arms, but to thought.

Early Flowers and Angiosperm Evolution Else Marie Friis,Peter R. Crane,Kaj Raunsgaard Pedersen,2011-08-18 The recent discovery of diverse fossil flowers and floral organs in Cretaceous strata has revealed astonishing details about the structural and systematic diversity of early angiosperms. Exploring the rich fossil record that has accumulated over the last

three decades, this is a unique study of the evolutionary history of flowering plants from their earliest phases in obscurity to their dominance in modern vegetation. The discussion provides comprehensive biological and geological background information, before moving on to summarise the fossil record in detail. Including previously unpublished results based on research into Early and Late Cretaceous fossil floras from Europe and North America, the authors draw on direct palaeontological evidence of the pattern of angiosperm evolution through time. Synthesising palaeobotanical data with information from living plants, this unique book explores the latest research in the field, highlighting connections with phylogenetic systematics, structure and the biology of extant angiosperms.

The Brill Dictionary of Ancient Greek Franco Montanari, 2015-05 The Brill Dictionary of Ancient Greek is also available online and as a two-volume boxed set. The Brill Dictionary of Ancient Greek is the English translation of Franco Montanari's *Vocabolario della Lingua Greca*. With an established reputation as the most important modern dictionary for Ancient Greek, it brings together 140,000 headwords taken from the literature, papyri, inscriptions and other sources of the archaic period up to the 6th Century CE, and occasionally beyond. The Brill Dictionary of Ancient Greek is an invaluable companion for the study of Classics and Ancient Greek, for beginning students and advanced scholars alike. Translated and edited under the auspices of The Center for Hellenic Studies in Washington, DC, The Brill Dictionary of Ancient Greek is based on the completely revised 3rd Italian edition published in 2013 by Loescher Editore, Torino. Features The principal parts of some 15,000 verbs are listed directly following the entry and its etymology. For each of these forms, the occurrence in the ancient texts has been certified. When found only once, the location is cited. Nearly all entries include citations from the texts with careful mention of the source. The dictionary is especially rich in personal names re-checked against the sources for the 3rd Italian edition, and in scientific terms, which have been categorized according to discipline. Each entry has a clear structure and typography making it easy to navigate. For a number of years now, scholars at ease in Italian have benefitted enormously from the riches, layout, concision, and accuracy of Professor Montanari's *Vocabolario della Lingua Greca*, with its added advantage of the inclusion of names. Hence classicists in general will welcome the English version of this very valuable resource. Professor Richard Janko, University of Michigan Franco Montanari is a giant in our field, and his Dictionary is a major leap forward for us. Professor Gregory Nagy, Harvard University

Ambrose of Milan Neil B. McLynn,2014-06-26 In this new and illuminating interpretation of Ambrose, bishop of Milan from 374 to 397, Neil McLynn thoroughly sifts the evidence surrounding this very difficult personality. The result is a richly detailed interpretation of Ambrose's actions and writings that penetrates the bishop's painstaking presentation of self. McLynn succeeds in revealing Ambrose's manipulation of events without making him too Machiavellian. Having synthesized the vast complex of scholarship available on the late fourth century, McLynn also presents an impressive study of the politics and history of the Christian church and the Roman Empire in that period. Admirably and logically organized, the book traces the chronology of Ambrose's public activity and reconstructs important events in the fourth century. McLynn's zesty, lucid prose gives the reader a clear understanding of the complexities of Ambrose's life and career and of late Roman government.

Francesco Petrarca Rime Disperse Joseph A. Barber,2020-12-18 First published in 1991. It was the lyric poetry of Petrarch that popularized the sonnet in European literature, that set the standard for love poetry for centuries to follow. Compared to the large volume of prose, poetry and notes in Latin, the corpus of Petrarch's Italian writings is small: the 366 poems that make up the Canzoniere, the 2000 or so verses of the Trionfi, and an undetermined number of poems, drafts and fragments that comprise what we call the Rime disperse. This collection includes indexes of first lines in both Italian and English.

Biology and Wildlife of the Mediterranean Region Jacques Blondel,James Aronson,1999 The Mediterranean is an outstanding 'hot-spot' of biological diversity. It is exceptional not only for this, but also because of its long history of interactions between its human inhabitants and the other fauna and flora of the region. The cradle of many civilizations, the Mediterranean region has been host to humans for thousands of years. This book is the first to synthesise our current understanding of the ecology, biology, and geology of Mediterranean animals, birds, and plants, and their habitats. The authors focus on the unique historical determinants and spatial patterns of Mediterranean biodiversity. In particular, the dramatic impacts of long-term human activities on the region's landscapes, flora, and fauna, are considered. This fascinating story will be of interest to researchers and students in ecology, biology, conservation, and geography, as well as to naturalists, and ecotourists visiting this popular holiday region.
