Operating Systems Ramez Elmasri,A. Gil Carrick,David Levine,2010 Elmasri, Levine, and Carrick's spiral approach to teaching operating systems develops student understanding of various OS components early on and helps students approach the more difficult aspects of operating systems with confidence. While operating systems have changed dramatically over the years, most OS books use a linear approach that covers each individual OS component in depth, which is difficult for students to follow and requires instructors to constantly put materials in context. Elmasri, Levine, and Carrick do things differently by

following an integrative or spiral approach to explaining operating systems. The spiral approach alleviates the need for an instructor to jump ahead when explaining processes by helping students completely understand a simple, working, functional system as a whole in the very beginning. This is more effective pedagogically, and it inspires students to continue exploring more advanced concepts with confidence.

Now in its third edition, this book has been revised and updated to reflect the latest trends in technological and application development. This edition focuses on the relational model and includes recent object-oriented developments such as SQL3 and ODMG. Elmasri and Navathe provide coverage of the popular DBMS products, in particular the relational systems Oracle and Microsoft Access. They also address advanced modeling and system enhancements in the areas of active databases, temporal and spatial databases, and multimedia data models. The new edition also surveys the latest application areas of data warehousing, data mining, digital libraries, GIS, and genome databases.

NoSQL Distilled Pramod J. Sadalage, Martin Fowler, 2013 'NoSQL Distilled' is designed to provide you with enough background on how NoSQL databases work, so that you can choose the right data store without having to trawl the whole web to do it. It won't answer your questions definitively, but it should narrow down the range of options you have to consider.
