Returning early from a disastrous date night with my husband, I know something is wrong the moment the wheels crunch the gravel drive of our home. Inside, the TV is on and a half-eaten meal waits on the table. My heart stops when I find our little girl is alone in the house and our babysitter, Sasha, is missing... Days later, when I'm arrested for Sasha's murder and torn away from my perfect little family, I'll wish I had told someone about the threatening note I received that morning. I'll hate myself for not finding out who the gift hidden inside my husband's wardrobe was for. I'll scream from the rooftops that I'm innocent – but no one will listen. I will realise I was completely wrong about everything that happened that night... But will you believe me? NEW YORK TIMES BESTSELLER "I come from a family forged by tragedies and bound by a remarkable, unbreakable love," Hunter Biden writes in this deeply moving memoir of addiction, loss, and survival. When he was two years old, Hunter Biden was badly injured in a car accident that killed his mother and baby sister. In 2015, he suffered the devastating loss of his beloved big brother, Beau, who died of brain cancer at the age of forty-six. These hardships were compounded by the collapse of his marriage and a years-long battle with drug and alcohol addiction. In Beautiful Things, Hunter recounts his descent into substance abuse and his tortuous path to sobriety. The story ends with where Hunter is today—a sober married man with a new baby, finally able to appreciate the beautiful things in life.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar

Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.
