Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at [www.vancouver-traders.com](http://www.vancouver-traders.com). You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. Are you tired of living paycheck to paycheck? Do you need clear financial information to maximize your investment in trading? If yes, then keep reading... What exactly does a day trader do? Simply stated, a day trader is an individual who enters and exits a position in the markets during the course of the trading day. For the purpose of this book, we will consider a day trade to be a trade that is entered and closed out within the course of the day. It is a simple but clear definition. If, for example, you decide to keep a trade overnight, then it is really not a day trade and it does not conform to the rules I will present herein. This guide is going to show you everything that makes the markets so amazing. We will show you how to think about the fundamentals of business, how to take that information, use it and create economic forecasts based on it. Originally, the most important U.S. stocks were traded on the New York Stock Exchange. A trader would contact a stockbroker, who would relay the order to a specialist on the floor of the NYSE. Before 1975, brokerage commissions were fixed at 1% of the amount of the trade, i.e. to purchase \$10,000 worth of stock cost the buyer \$100 in commissions and same 1% to sell. Meaning that to profit trades had to make over 2% to make any real gain. One of the first steps to make day trading of shares potentially profitable was the change in the commission scheme. In 1975, the United States Securities and Exchange Commission (SEC) made fixed commission rates illegal, giving rise to discount brokers offering much reduced commission rates. This book covers the following topics: - What is day trading? - How day trading works? - How to find stocks for trades - Tools and platforms - Money management - Risk management techniques - Trading credit and debit - Average income of a day trader - Starting on your first trade - Day trading glossary ...And much more This book discusses the basics of day trading, the essential information you need as a beginner, the most popular and workable strategies that successful traders have always used, and the daily tips you can leverage for success. It helps you to distinguish between the best platforms and strategies that beginners use from those that suit the veterans. Ready to get started? Click "Buy Now!"
