

Dbt Manual Jansbooksz

One bad corpse can ruin your whole day. Rhiannon Murphy left behind the flash and sass of Miami for the no-nonsense groove of New York City, eager for a clean slate and a fresh start. A bartender by trade, a loud mouth by choice, and a necromancer by chance; she managed to keep her nifty talent hidden from those around her -- until now. The deliciously good-looking vampire, Disco, knows her secret. When he strolls into her bar to solicit help investigating the mysterious disappearances of his kind from the city, Rhiannon discovers he's not the kind of person that appreciates the significance of the word no. But in a world where vampires peddle their blood as the latest and greatest drug of choice, it's only a matter of time before the next big thing hits the market. Someone or something is killing vampires to steal their hearts, and unlike Rhiannon, this isn't their first stroll around the undead block. ****Warning. Contains coarse language, violence, sexual situations, violence. For mature audiences only.****

Experienced Guidance on the Technical Issues of Decommissioning Projects Written by one of the original MARSSIM authors, Decommissioning Health Physics: A Handbook for MARSSIM Users, Second Edition is the only book to incorporate all of the requisite technical aspects of planning and executing radiological surveys in support of decommissioning. Extensively revised and updated, it covers survey instrumentation, detection sensitivity, statistics, dose modeling, survey procedures, and release criteria. New to the Second Edition Chapter on hot spot assessment that recognizes appropriate dosimetric significance of hot spots when designing surveys and includes a new approach for establishing hot spot limits Chapter on the clearance or release of materials, highlighting aspects of the MARSAME manual Revised chapter on characterization survey design to reflect guidance in ANSI N13.59 on the value of data quality objectives (DQOs) Updated regulations and guidance documents throughout Updated survey instrumentation used to support decontamination and decommissioning (D&D) surveys, including expanded coverage of in situ gamma spectrometers Revised statistics chapter that includes an introduction to Bayesian statistics and additional double sampling and ranked set sampling statistical approaches More case studies and examples throughout Implement the Surveys Effectively and Avoid Common Pitfalls With more than 20 years of experience as a practitioner in the decommissioning survey field, author Eric W. Abelquist prepares you for the technical challenges associated with planning and executing MARSSIM surveys. He discusses the application of statistics for survey design and data reduction and addresses the selection of survey instrumentation and detection sensitivity. He presents final status survey procedures and covers pathway modeling to translate release criteria to measurable quantities. He also offers solutions for navigating the complexity inherent in designing and implementing MARSSIM and MARSAME surveys. Detailed derivations, thorough discussions of technical bases, and real-world examples and case studies illustrate effective strategies for demonstrating to regulators and stakeholders that contaminated sites can be released for other beneficial uses.

THEIR LOVE IS IN DANGER.... Caleb and Gianna went from being enemies to friends to falling for each other. They hid their new relationship from the one person who would try to keep them apart. But now their secret was out and they were fighting to stay

together. Running away wouldn't solve their problems, but it allowed them a break from real life. Unfortunately, new problems arose. Caleb still fought giving all of himself to Gianna and Gianna tried to hide the hurt it caused her. When opposition becomes too strong and they are forced apart, will Caleb be able to win Gianna back?

Contributed articles worked and developed by ICID Working Group on History of Irrigation, Drainage, and Flood Control established in 1980.

This book offers students and practitioners alike an integrated approach to strategic planning for companies. Marcos Fava Neves presents a new and unique perspective on this critical topic based on three main points: strongly demand-driven decisions that bridge the gap between long- and short-term strategy; a vision of a company as an integrated network, full of relationships that deserve consideration during the planning process; and the introduction of 'collective-action' thinking, which raises the prospect for cooperation between competitors. With this clear, comprehensive framework for strategic planning, companies can be sure to navigate today's complex environment and enhance their prospects of success.

This volume joins the pragmatic philosophy of Deleuze to current affairs. The twelve new essays in this volume use a contemporary context to think through and with Deleuze. Engaging the here and now, the contributors use the Deleuzian theoretical apparatus to think about issues such as military activity in the Middle East, refugees, terrorism, information and communication, and the State. The book is aimed both at specialists of Deleuze and those who are unfamiliar with his work but who are interested in current affairs. Incorporating political theory and philosophy, culture studies, sociology, international studies, and Middle Eastern studies, the book is designed to appeal to a wide audience.

A lyrical report on the long-lasting effects of war on individual and national psyche shares the experiences of veterans working through post-traumatic stress disorder at a Christian rehabilitation camp, in an account that also discusses the process through which survivors reconcile their faith with trauma. 50,000 first printing.

Demand Driven Strategic PlanningRoutledge

Now revised and updated, this classic book is still the definitive step-by-step guide to creating cutting edge print ads. It covers everything from how advertising works, how brand-building methodologies are changing, how to get an idea, and how copy and art should be crafted. It demystifies the advertising creative process, with page after page of practical, inspiring and often controversial advice from such masters as David Abbott, Bob Barrie, Tim Delaney, David Droga, Neil French, Marcello Serpa, and dozens more. Over 200 print ads and case histories reveal the creative processes at work in world-famous agencies in the US, UK, Asia and Australia. This new edition also includes an exclusive section featuring winning ads from the World Press Awards. No other book takes you on such a journey through the minds of advertising's creative leaders.

Vitruvian Man is the world's most famous drawing, by one of the world's most famous artists. The image - named after a Roman architect and

engineer, Vitruvius - has become visual shorthand for artistic genius and scientific inquiry, and yet nobody knows anything about it. In *Da Vinci's Ghost*, critically acclaimed historian Toby Lester examines the forces that converged in 1490 to turn an idea that had been around for centuries into this iconic image, bringing the ghost of an unknown Leonardo da Vinci back to life. Rooted in little-known episodes of the artist's colourful career, and taking in ideas including theories of the cosmos, Roman land-surveying and the relationship between anatomy and architecture, the book tells the story of his evolving, lifelong study of the human body, restoring in vivid detail the intellectual and cultural spheres of fifteenth-century Florence and Milan. Beautifully illustrated with da Vinci's drawings and those of his predecessors, *Da Vinci's Ghost* is both a personal story and a grand saga of intellectual discovery that brilliantly reconstructs the artistry and scholarship of one of the world's greatest creative minds.

Did you know your car can be hacked? Your medical device? Your employer's HVAC system? Are you aware that bringing your own device to work may have security implications? Consumers of digital technology are often familiar with headline-making hacks and breaches, but lack a complete understanding of how and why they happen, or if they have been professionally or personally compromised. In *Cybersecurity in Our Digital Lives*, twelve experts provide much-needed clarification on the technology behind our daily digital interactions. They explain such things as supply chain, Internet of Things, social media, cloud computing, mobile devices, the C-Suite, social engineering, and legal confidentiality. Then, they discuss very real threats, make suggestions about what can be done to enhance security, and offer recommendations for best practices. An ideal resource for students, practitioners, employers, and anyone who uses digital products and services.

The teacher's edition contains reproducible student activity pages, and accompanying teacher support, answer key, and skills charts.

As industrial control systems (ICS), including SCADA, DCS, and other process control networks, become Internet-facing, they expose crucial services to attack. Threats like Duqu, a sophisticated worm found in the wild that appeared to share portions of its code with the Stuxnet worm, emerge with increasing frequency. Explaining how to develop and implement an effective cybersecurity program for ICS, *Cybersecurity for Industrial Control Systems: SCADA, DCS, PLC, HMI, and SIS* provides you with the tools to ensure network security without sacrificing the efficiency and functionality of ICS.

Highlighting the key issues that need to be addressed, the book begins with a thorough introduction to ICS. It discusses business, cost, competitive, and regulatory drivers and the conflicting priorities of convergence. Next, it explains why security requirements differ from IT to ICS. It differentiates when standard IT security solutions can be used and where SCADA-specific practices are required. The book examines the plethora of potential threats to ICS, including hi-jacking malware, botnets, spam engines, and porn dialers. It outlines the range of vulnerabilities inherent in the ICS quest for efficiency and functionality that necessitates risk behavior such as remote access and control of critical equipment.

Reviewing risk assessment techniques and the evolving risk assessment process, the text concludes by examining what

is on the horizon for ICS security, including IPv6, ICSv6 test lab designs, and IPv6 and ICS sensors.

Journalist and storyteller Toby Lester brings Vitruvian Man to life, resurrecting the ghost of an unknown Leonardo.

Populated by a colorful cast of characters, including Brunelleschi of the famous Dome, "Da Vinci's Ghost" opens up a surprising window onto the artist and philosopher himself and the tumultuous intellectual and cultural transformations he bridged.
