

Deadly Beat Inside The Royal Ulster Constabulary

This fast-paced action novel is set in a future where the world has been almost destroyed. Like the award-winning novel *Freak the Mighty*, this is Philbrick at his very best. It's the story of an epileptic teenager nicknamed Spaz, who begins the heroic fight to bring human intelligence back to the planet. In a world where most people are plugged into brain-drain entertainment systems, Spaz is the rare human being who can see life as it really is. When he meets an old man called Ryter, he begins to learn about Earth and its past. With Ryter as his companion, Spaz sets off an unlikely quest to save his dying sister -- and in the process, perhaps the world.

Over the past several years, Ken Wharton, himself a former soldier, has been prolific in his coverage of the Troubles, which spread their tentacles far from the streets, and fields of Northern Ireland. Over 4,000 people died in or as a consequence of them and it cost the lives of over 1,300 British soldiers - a fact which is unacknowledged by the MOD - and the lives of over 300 policemen and women. This is Ken's sixth book about the period and he draws on meticulous and detailed research, first-hand testimony of the soldiers who trod the same streets as himself, and an almost encyclopedic knowledge of the near 30-year period of murder, violence and civil war. The first-hand accounts help us to understand and examine the fears of the young soldiers who patrolled the dangerous streets of the Ardoyne and New Lodge, of Andersonstown, Turf Lodge and Ballymurphy and of the Creggan in Londonderry and the Derrybeg in Newry. He looks at the Loyalist paramilitaries and treats their sectarianism and mindless murder with the same contempt with which he treats the Republicans. He does not mince words about the Irish-Americans and their political stooges in the US Government, judicial system and the ordinary '7th generation Irishmen of the American East Coast.' This is a book not just for soldiers, but for anyone who wishes to look back and try to understand the madness inflicted upon several generations of innocent Irish and British people. In years to come, historians - both social and military - will reflect on this period of insanity with a greater knowledge than hitherto. If you wish to know how it felt to be an innocent sectarian victim, or an off-duty soldier or policeman or a young lad from Leeds, Liverpool or London hard targeting through the Lower Falls, then this book is a must read.

In contemporary missions, soldiers often face unconventional opponents rather than enemy armies. How do Western soldiers deal with war criminals, rioters, or insurgents? What explains differences in behavior across military organizations in multinational missions? How does military conduct impact local populations? Comparing troops from the United States, Britain, Germany, and Italy at three sites of intervention (Bosnia, Kosovo, and Afghanistan), this book shows that militaries in the field apply idiosyncratic organizational routines. Friesendorf uses the concept of routines to explain, for example, why US soldiers are trigger-happy, why British soldiers patrol on foot, and why German soldiers avoid risk. Despite convergence in military structures and practices, militaries continue to fight differently, often with much autonomy. This bottom-up perspective focuses on different routines at the level of operations and tactics, thus contributing to a better understanding of the implementation of military missions, and highlighting failures of Western militaries to protect civilians.

Missouri native Allen Eskens' "stunning small-town mystery" (New York Times Book Review) is a necessary exploration of family, loyalty, and racial tension in America and "a coming-of-age book to rival some of the best, such as Ordinary Grace" (Library Journal, starred review). In a small Southern town where loyalty to family and to "your people" carries the weight of a sacred oath, defying those unspoken rules can be a deadly proposition. After fifteen years of growing up in

the Ozark hills with his widowed mother, high-school freshman Boady Sanden is beyond ready to move on. He dreams of glass towers and cityscapes, driven by his desire to be anywhere other than Jessup, Missouri. The new kid at St. Ignatius High School, if he isn't being pushed around, he is being completely ignored. Even his beloved woods, his playground as a child and his sanctuary as he grew older, seem to be closing in on him, suffocating him. Then Thomas Elgin moves in across the road, and Boady's life begins to twist and turn. Coming to know the Elgins -- a black family settling into a community where notions of "us" and "them" carry the weight of history -- forces Boady to rethink his understanding of the world he's taken for granted. Secrets hidden in plain sight begin to unfold: the mother who wraps herself in the loss of her husband, the neighbor who carries the wounds of a mysterious past that he holds close, the quiet boss who is fighting his own hidden battle. But the biggest secret of all is the disappearance of Lida Poe, the African-American woman who keeps the books at the local plastics factory. Word has it that Ms. Poe left town, along with a hundred thousand dollars of company money. Although Boady has never met the missing woman, he discovers that the threads of her life are woven into the deepest fabric of his world. As the mystery of her fate plays out, Boady begins to see the stark lines of race and class that both bind and divide this small town -- and he will be forced to choose sides. Corrupting angels should be fun. But damn it. It's more soul-crushing and infuriating work than I expected. Especially when Lucifer, AKA Lucian, is a lying sack of demon guts and would much prefer to rule Hell alone. Yeah...no. That doesn't work for me. If he gets his way and I fail, I'll lose my soul. I'll lose my chance at helping the Seven Sinners of Hell's Kingdom to rise with me taking the throne of Purgatory. And unfortunately, Lucian's not my only problem. One of the angels that was supposed to jump and create a new level of Hell as its ruler has already fallen from grace. He's mortal and bound to a bottom feeder demon. How the hell am I supposed to complete my mission for my soul when the universe is out to get me? I guess I'll find out. Four more thrones that must be claimed and my current collection of devils need me to fill them to secure our eternities. I can't let them down. Plus, I'm not a big fan of being Lucifer's little toy forever. He's not my type of psycho. He should be the one to bow to me. This is a dark romance with possible triggering situations.

"[Volume 1] Traces the social issues, technological advances, and combative encounters of the international naval race from 1890 through WWI, as the largest industrial nations (U.S, Great Britain, Japan, and Germany) scrambled to secure global markets and empire, using their battleship navies as pawns of power politics"--Provided by publisher.

'You go to work and you might be shot dead. You imagine being horribly maimed in a bomb blast. You come home and wonder if you'll be shot at the door. You go to bed with a revolver on the bedside cabinet. At times you wonder if this is really part of the UK' This was the world inhabited by Richard Latham during his service with the Royal Ulster Constabulary – a force that remains an institution of contradictions and intrigue to many outside observers. Considered by some to be one of the finest police forces in the world, its officers are looked upon by others as the evil storm-troopers of Unionism and the British Government. The RUC is now a force undergoing sweeping change in response to Republican demands, yet for 30 years it stood alongside the British Army in a war with Republicans that killed over 300 policemen and injured thousands more. For 14 years Latham, an Englishman, served as a police officer, both in England and in Ulster, transferring from the English Special Branch to the RUC in 1991. *Deadly Beat* is his raw and hard-hitting story, giving a unique insight into the grim reality of policing Ulster. Latham charts the dedication and restraint of officers who witnessed their colleagues die, yet were obliged to play within the rules of the law - rules so loaded in favour of the killers that comparatively few were brought to justice. This book exposes incidents of racism and religious bias experienced by the author himself. It looks behind the scenes to reveal the extremes of behaviour, alcohol abuse, womanising and petty corruption that the heady cocktail of stress, big pay packets and a sense of 'living for the day' bring to many of the men who don the RUC uniform. *Deadly Beat* is an open, warts-and-all view of the RUC by a man who makes intuitive comparisons between policing on

the mainland and serving in Ulster.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

A journalist visits five of America's disaster-zone towns and the devoted residents who chose to stay despite hellish conditions. As a young reporter, Jake Halpern became obsessed with stories about "some outlandish and often hellish place inhabited by a handful of stalwarts who refused to leave." His fellow reporters joked with him and nicknamed him the Bad Homes Correspondent. But the more he learned about these people, the more he was drawn to them. *Braving Home* is Halpern's irresistible portrait of these hometowns and his friendships with their most loyal residents. In North Carolina, Halpern meets a retired mill worker who single-handedly manned his hometown in the wake of a devastating flood. In Alaska, he visits a lone snowbound high-rise at the foot of a glacier. At the base of a Hawaiian volcano, he stays with a hermit whose house was surrounded by molten lava. Among the glitterati of Malibu, a longtime "hillbilly" teaches him the traditions of firefighting. And on a barrier island off the coast of Louisiana, a legendary storm rider tells of

surviving hurricanes—even if it means tying one's hair to a tree. Throughout his journey, Halpern explores the value of rootedness in an age when American society is more mobile than ever.

This book examines memoir-writing by many of the key political actors in the Northern Irish Troubles (1969-1998), and argues that memoir has been a neglected dimension of the study of the legacies of the violent conflict. It investigates these sources in the context of ongoing disputes over how to interpret Northern Ireland's recent past. A careful reading of these memoirs can provide insights into the lived experience and retrospective judgments of some of the main protagonists of the conflict. The period of relative peace rests upon an uneasy calm in Northern Ireland. Many people continue to inhabit contested ideological territories, and in their strategies for shaping the narrative telling of the conflict, key individuals within the Protestant Unionist and Catholic Irish Nationalist communities can appear locked into exclusive and self-justifying discourses. In such circumstances, while some memoirists have been genuinely self-critical, many others have utilised a post-conflict language of societal reconciliation in order to mask a strategy that actually seeks to score rhetorical victories and to discomfort traditional enemies. Memoir-writing is only one dimension of the current ad hoc approach to "dealing with the past" in Northern Ireland, but in the absence of any consensus regarding an overarching "truth and reconciliation" process, this is likely to be the pattern for the foreseeable future. This study provides the first comprehensive analysis of a major resource for understanding the conflict.

Intervening states apply different approaches to the use of force in war-torn countries. Calibrating the use of force according to the situation on the ground requires a convergence of military and police roles: soldiers have to be able to scale down, and police officers to scale up their use of force. In practice, intervening states display widely differing abilities to demonstrate such versatility. This paper argues that these differences are shaped by how the domestic institutions of sending states mediate between demands for versatile force and their own intervention practices. It considers the use of force by Germany, Italy, the United Kingdom and the United States in three contexts of international intervention: Bosnia and Herzegovina, Kosovo and Afghanistan. The paper highlights quite different responses to security problems as varied as insurgency, terrorism, organised crime and riots. This analysis offers important lessons. Those planning and implementing international interventions should take into account differences in the use of force. At the same time, moving towards versatile force profoundly changes the characteristics of security forces and may increase their short-term risks. This difficulty points to a key message emerging from this paper: effective, sustainable support to states emerging from conflict will only be feasible if intervening states reform their own security policies and practices.

Formed out of the Royal Irish Constabulary at the time of Partition, the RUC's history is predictably a turbulent one right through to its replacement in 2001 by the Police Service of Northern Ireland. Few police forces in the world have suffered so grievously as the RUC and this book is a fitting memorial to the sacrifices made in the interests of the civil population it was determined to protect. Throughout its history, it has not only had to perform normal police duties but contain the ever present IRA threat. In 1969, the climate changed and ushered in a new and even more violent era of sectarian strife. The emergence of extreme nationalist organizations posed grave problems and, with the RUC in a prime role, the position of the Chief Constable was hugely important. This book tells the story of a remarkable police force without fear or favor. Ironically its reward for containing a hugely challenging internal security situation and at the same time policing the community traditionally was its disbandment.

In this timely new book Sir Kenneth Bloomfield, former Head of the Northern Ireland Civil Service, explores a number of crucial questions in the immediate aftermath of PIRA decommissioning and attempts to re-activate the political process in Northern Ireland. Was it inevitable that Northern Ireland should undergo some three decades of costly violence? What, in truth, were those costs? Might the descent into catastrophe have been delayed or even averted if the main actors (defined as the parliament and government of the United Kingdom, the political parties and institutions operating within Northern Ireland since 1920, and the parties and institutions of the Irish Free State and Republic) had done things they ought to have done, or left undone things they ought not to have done? Are the political process and the peace process the same thing, and indeed how is peace to be defined?

This book provides an account and analysis of policing in Northern Ireland, providing an account and analysis of the RUC (Royal Ulster Constabulary) from the start of 'the troubles' in the 1960s to the early 1990s, through the uneasy peace that followed the 1994 paramilitary ceasefires (1994-1998), and then its transformation into the Police Service of Northern Ireland following the 1999 Patten Report. A major concern is with the reform process, and the way that the RUC has faced and sought to remedy a situation where it faced a chronic legitimacy deficit. Policing Northern Ireland focuses on three key aspects of the police legitimization process: reform measures which are implemented to redress a legitimacy crisis; representational strategies which are invoked to offer positive images of policing; and public responses to these various strategies. Several key questions are asked about the ways in which the RUC has sought to improve its standing amongst nationalists: first, what strategies of reform has the RUC implemented? second, what forms of representation has the RUC employed to promote and portray itself in the positive terms that might secure public support? third, how

have nationalists responded to these initiatives? The theoretical framework and analysis developed in the book also highlights general issues relating to the implications of police legitimacy and illegitimacy for social conflict and divisions, and their management and/or resolution, in relation to transitional societies in particular. In doing so it makes a powerful contribution to wider current debates about police legitimacy, police-community relations, community resistance, and conflict resolution.

Volume 2 does what it says on the can - it continues from where the first volume left off. It looks at the bloody years of 1978 and 1979. It covers eyewitness accounts from soldiers on the ground and there is the occasional comment from civilians who were living in the troubled province at the time. There are accounts from the IRA atrocity at the la Mon Restaurant when the terrorists used a napalm-like device to incinerate 12 innocent civilians; it includes the murder of Lord Mountbatten, hero of Burma, and some of his family and staff on his yacht in Co Sligo. It also covers the worst tragedy for the Army in Ulster, the murder of 18 soldiers at Warrenpoint. Every single troubles-related death and every major incident is covered and includes those soldiers who died in 'non-battle' incidents, the ones who are not included in the 'official' figures. The book pulls no punches and the author is outspoken in his criticism of the Irish-American community and their incredibly naive support of the Republican terrorists who almost destroyed an entire country. The author condemns in equal measure the paramilitaries of both sides and considers the evil activities of Lenny Murphy and the 'Shankill Butchers' as bad as anything which the Provisional IRA or INLA did. The book looks at individual incidents and tries to examine the terrorist mindset and their motives for the atrocities which they carried out in the name of their communities. It supports the security forces unequivocally but renders criticism where appropriate. The book examines the role of the young soldiers from Leeds, Liverpool, Manchester, indeed from every part of the UK from which these young men came. It looks at foot patrols, riot control and the daily fear and threat under which they operated for their four month or two year tours. Read carefully the words of an Irish-American who clearly is contemptuous of the way her fellow Americans almost sleepwalked into supporting the IRA from afar with the dollars which they placed so willingly into the NORCID collection jars. The level of detail and research the author goes into is phenomenal and demonstrates his commitment to continue telling the story of one of Britain's forgotten wars.

The exposure of two senior republicans as informers for British intelligence in 2005 led to a popular perception that the IRA had 'lost' the intelligence war and was pressurised into peace. In this first in-depth study across the entire conflict, Thomas Leahy re-evaluates the successes and failures of Britain's intelligence activities against the IRA, from the use of agents and informers to special-forces, surveillance and electronic intelligence. Using new interview material alongside memoirs and Irish and UK archival materials, he suggests that the IRA was not forced into peace by British intelligence. His work sheds new light on key questions in intelligence and security studies. How does British intelligence operate against paramilitaries? Is it effective? When should governments 'talk to terrorists'? And does regional variation explain the outcome of intelligence conflicts? This is a major contribution to the history of the conflict and of why peace emerged in Northern Ireland.
