This collection features five of Carl Hiaasen's hilarious, award-winning classics! Take a trip to Carl Hiaasen's Florida--where the animals are wild and the people are wilder--with this collection that includes Hoot, Flush, Scat, Chomp, and Squirm. Hoot: Everybody loves Mother Paula's pancakes. Everybody, that is, except the cute but endangered owls that live on the building site of the new restaurant. Can the awkward new kid and his feral friend prank the pancake people out of town? Or is the owls' fate cemented in pancake batter? Flush: The Coral Queen casino boat is treating the ocean like a toilet bowl, so Noah's dad decides to sink the darn thing. Problem is, there's no evidence of illegal dumping. Now Dad's in the clink, the boat's back in business, and only Noah can flush the truth out into the open. Scat: The most terrifying teacher in school is missing in the Everglades, and it's up to Nick and Marta to find her. But first they'll have to reckon with a junior arsonist, a wannabe Texas oilman, and a ticked-off Florida panther. It's all about to hit the fan, and when it does, these kids better scat. Chomp: When Wahoo Cray's dad--a professional animal wrangler--takes a job with a reality-TV survival show, Wahoo figures he'll have to do a bit of wrangling himself to keep his father from killing the show's inept and egotistical star. But the job keeps getting more complicated--and it isn't just the animals who are ready to chomp. Squirm: This summer, Billy will fly across the country, hike a mountain, float a river, dodge a grizzly bear, shoot down a spy drone, save a neighbor's cat, save an endangered panther, and then try to save his own father.

Fly Girl's GuideHow to Become a Flight Attendant

In private life, we try to induce or suppress love, envy, and anger through deep acting or "emotion work," just as we manage our outer expressions of feeling through surface acting. In trying to bridge a gap between what we feel and what we "ought" to feel, we take guidance from "feeling rules" about what is owing to others in a given situation. Based on our private mutual understandings of feeling rules, we make a "gift exchange" of acts of emotion management. We bow to each other not simply from the waist, but from the heart. But what occurs when emotion work, feeling rules, and the gift of exchange are introduced into the public world of work? In search of the answer, Arlie Russell Hochschild closely examines two groups of public-contact workers: flight attendants and bill collectors. The flight attendant's job is to deliver a service and create further demand for it, to enhance the status of the customer and be "nicer than natural." The bill collector's job is to collect on the service, and if necessary, to deflate the status of the customer by being "nastier than natural." Between these extremes, roughly one-third of American men and one-half of American women hold jobs that call for substantial emotional labor. In many of these jobs, they are trained to accept feeling rules and techniques of emotion management that serve the company's commercial purpose. Just as we have seldom recognized or understood emotional labor, we have not appreciated its cost to those who do it for a living. Like a physical laborer who becomes estranged from what he or she makes, an emotional laborer, such as a flight attendant, can become estranged not only from her own expressions of feeling (her smile is not "her" smile), but also from what she actually feels (her managed friendliness). This estrangement, though a valuable defense against stress, is also an important occupational hazard, because it is through our feelings that we are connected with those around us. On the basis of this book, Hochschild was featured in *Key Sociological Thinkers*, edited by Rob Stones. This book was also the winner of the Charles Cooley Award in 1983, awarded by the American Sociological Association and received an honorable mention for the C. Wright Mills Award.

Mother Jones is an award-winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues.

On May 11, 1996, at 1413:42 eastern daylight time, a Douglas DC-9-32 crashed into the Everglades about 10 minutes after takeoff from Miami International Airport, Miami, Florida. The airplane was being operated by ValuJet Airlines, Inc., as flight 592 and was on its way to Atlanta, Georgia. Both pilots, the three flight attendants, and all 105 passengers were killed. The National Transportation Safety Board determined that the probable cause of the accident, was a fire in the airplane's cargo compartment that was initiated by the actuation of one or more oxygen generators being improperly carried as cargo.

"One of the leading big-picture thinkers of our day" (Utne Reader) delivers his boldest work in this erudite, tough-minded, and far-reaching manifesto. Never has the world seemed so completely united-in the form of communication, commerce, and culture-and so savagely torn apart-in the form of war, financial meltdown, global warming, and even the migration of diseases. No matter how much we put our minds to the task of meeting the challenges of a rapidly globalizing world, the human race seems to continually come up short, unable to muster the collective mental resources to truly "think globally and act locally." In his most ambitious book to date, bestselling social critic Jeremy Rifkin shows that this disconnect between our vision for the world and our ability to realize that vision lies in the current state of human consciousness. The very way our brains are structured disposes us to a way of feeling, thinking, and acting in the world that is no longer entirely relevant to the new environments we have created for ourselves. The human-made environment is rapidly morphing into a global space, yet our existing modes of consciousness are structured for earlier eras of history, which are just as quickly fading away. Humanity, Rifkin argues, finds itself on the cusp of its greatest experiment to date: refashioning human consciousness so that human beings can mutually live and flourish in the new globalizing society. In essence, this shift in consciousness is based upon reaching out to others. But to resist this change in human relations and modes of thinking, Rifkin contends, would spell ineptness and disaster in facing the new challenges around us. As the forces of globalization accelerate, deepen, and become ever more complex, the older faith-based and rational forms of consciousness are likely to become stressed, and even dangerous, as they attempt to navigate a world increasingly beyond their reach and control. Indeed, the emergence of this empathetic consciousness has implications for the future that will likely be as profound and

far-reaching as when Enlightenment philosophers upended faith-based consciousness with the canon of reason.

Intrapersonal communication is a relatively new phenomenon for communication study and still lacks the grounding of a sound theoretical base. The first to present a developed theory of this discipline, this book's goal is to provide graduate students and professionals with an organized point of departure for their research. The theoretical section begins with an intrapersonal communication theory derived from the sociogenetic views of George Herbert Mead and L.S. Vygotsky. This theory emphasizes social interaction, the developmental nature of mind, and the crucial role of speech in creating a self, a culture, and a mind which then interact in human intrapersonal communication. This section also provides the reader with a coherent interdisciplinary knowledge base taken from speech communication, biology, neurology, cultural psychology, anthropology, sociology, speech pathology, and linguistics. The integrated theoretical perspective that results makes the study compatible with communication scholarship focusing on the social, cultural, cognitive, or performance aspects of communication phenomena. The applications section examines neurophysiological/intrapersonal communication research methods and studies to date, together with specific applications of intrapersonal communication theory to childhood language acquisition, to the establishment of gender identities, and to intrapersonal competence. The final chapter presents pedagogical guidance on how we can influence intrapersonal competence and performance as well as commenting on the current state of this study and its future prospects. The editor's interstitial commentary facilitates access by readers wishing to construct their own theory.

This book offers essential insights into how the world's second largest industry, tourism, is responding to challenges involved in expanding the corporate social responsibility (CSR) concept to corporate sustainability and responsibility, referred to as CSR 2.0. It analyzes the typical setup of tourism with various types of commercial agents: corporations, small and medium sized enterprises, public-private partnerships, social enterprises and local cooperatives. In addition, the book examines a broad range of voluntary initiatives, the effectiveness of these efforts, and how contextual and wider policy features shape these relationships. The book is divided into three parts, the first of which elaborates on strategic drivers and rationales for CSR. In turn, the second part introduces readers to design approaches for CSR programs and envisaged impacts, while part three focuses on implementation, certification, reporting, and possible outcomes. Each part offers a mixture of theoretical perspectives, synthesis analyses and case studies. The respective chapters tackle a broad spectrum of tourism sub-sectors, e.g. the cruise industry, aviation, gastronomy, nature-based tourism, and urban destinations.

'Definitive, critical and engaging, this is a superb introduction to the sociology of work.' Leo McCann, Professor of Management, University of York Now in a fully updated third edition, *The Sociology of Work* draws on the work of classic and contemporary theorists, to provide readers with a thorough exploration of all aspects of work and employment, including paid and unpaid work, standard and non-standard employment, and unemployment. The new edition includes: Two new chapters on "Work, Skill and the Labour Process" and "Managing Culture at Work". Expanded coverage of the rise and decline of trade unions; emotional labour, misbehaviour, and resistance at work. Further discussion of the gig economy and precarious work; automation and the end of work; globalization and human rights. For Sociology and Business students, taking modules in work, employment and society.

Do nurses still care? In today's inflexible, fast-paced and more accountable workplace where biomedical and clinical models dominate health care practice, is there room for emotional labour? Based on original empirical research, this book delves into personal accounts of nurses' emotion expressions and experiences as they emerge from everyday nursing practice, and illustrates how their emotional labour is adapting in response to a constantly changing work environment. The book begins by re-examining Arlie Hochschild's sociological notion of emotional labour, and combines it with Margaret Archer's understanding of emotion and the inner dialogue. In an exploration of the nature of emotional labour, its historical and political context, and providing original, but easily recognisable, typology, Catherine Theodosius emphasises that it is emotion – complex, messy and opaque – that drives emotional labour within health care. She suggests that rather than being marginalised, emotional labour in nursing is frequently found in places that are hidden or unrecognised. By understanding emotion itself, which is fundamentally interactive and communicative, she argues that emotional labour is intrinsically linked to personal and social identity. The suggestion is made that the nursing profession has a responsibility to include emotional labour within personal and professional development strategies to ensure the care needs of the vulnerable are met. This innovative volume will be of interest to nursing, health care and sociology students, researchers and professionals.

Detailed guide on how to become a flight attendant, from creating a resume through the applications, interviews and training, and into actual professional flying. This is the fifth edition over past 21 years and thousands have benefited from using Tom Janovsky's expertise and guidance. The book goes into details even on the "dark side" such as accidents and terrorist actions, covers layovers, but concentrates most on making it into the airlines. Profusely illustrated with actual photos.

An intriguing, uncensored, inside view of the not-so-friendly skies through the eyes of former flight attendant, Margo Anderson. If you are a frequent flier, or if you plan to fly in the near future, fasten your seat belt for a turbulent read! After five years of flying with a commuter airline based at Atlanta's Hartsfield-Jackson International Airport, Anderson draws on her personal experiences and conversations, painting a portrayal of life as a flight attendant--grueling twelve hour days, complaining and unfriendly passengers, and unexpected, almost unbelievable situations, especially in the days and weeks following 9/11. Anderson navigates the complex world of flight crews with clarity, insight, wittiness, and her own special brand of humor. Readers are given a view of flying they may never have seen before, through the lens of the workhorse of the airline industry, regarded by many as the "puddle-jumpers," the commuter airlines.

Happiness is big business. Books, consultants, psychologists, organizations, and even governments tout happiness secrets that are backed by scientific findings. The problem is that all of this science is done by and for cis white men. And some of the most vocal of these happiness experts were announcing that women could become happier by espousing "traditional" values and eschewing feminism. Skeptical of this hypothesis, Ariel Gore took a deep dive into the optimism industrial complex, reading the history, combing the research, attending the conferences, interviewing the thought leaders, and exploring her own and her friends' personal experiences and desires. *Fuck Happiness* is a nuanced, thoughtful examination of what happiness means and to whom, how it's played a role in defining modern gender roles and power structures, and how we can all have a more empowered relationship with the pursuit of joy in our lives.

Every aspiring flight attendant wants one thing; to land a job! Very few people realize how many airlines exist and often limit their job search because they are not aware of all of the options available to them. Most people know the major carriers and a few of the national airlines, but that is just the tip of the iceberg. As you explore this book, you will find many airlines that you have likely never heard of before. I encourage you to take the time to read about each airline and each type of flying available to flight attendants. In this book, I share detailed and highly sought after information about each air carrier. In fact, I designed this book as a guide to help you compare the pros and cons of each airline based on your preferences. There is a checklist provided to help you analyze which airlines are the best and worst fit for your career goals and desired lifestyle.

This volume presents the reader with a stimulating rich tapestry of essays exploring the nature of action and intentionality, and discussing their role in human development. As the contributions make clear, action is an integrative concept that forms the bridge between our psychological, biological, and sociocultural worlds. Action is also integrative in the sense of entailing motivational, emotional, and cognitive systems, and this integration too is well represented in the chapters. Action is defined, and distinguished from behavior, according to its

intentional quality. Thus, a constantly recurring theme in the volume involves the dialectic of action-intentionality, and specifically the questions of how and when these concepts are to be distinguished.

Emotions shape our mental and social lives, but their relation to morality is problematic: are they sources of moral knowledge, or obstacles to morality? Fourteen original articles by leading scholars in moral psychology and philosophy of mind explore the relation between emotions and practical rationality, value, autonomy, and moral identity.

The extensively revised and updated second edition combines carefully chosen primary quotes with wide-ranging discussion and everyday illustrative examples to provide an in-depth introduction to classical and contemporary sociological theory. Combines classical and contemporary theory in a single, integrated text Short biographies and historical timelines of significant events provide context to theorists' ideas Innovatively builds on excerpts from original theoretical writings with detailed discussion of the concepts and ideas under review Includes new examples of current social processes in China, South Korea, India, Latin America, the Middle East, and other non-Western societies Additional resources, available at www.wiley.com/go/dillon, include multiple choice and essay questions, PowerPoint slides with multimedia links to content illustrative of sociological processes, a list of complementary primary readings, a quotation bank, and other background materials

As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde."

An adaptation of 'Social Research Methods' by Alan Bryman, this volume provides a comprehensive introduction to the area of business research methods. It gives students an assessment of the contexts within which different methods may be used and how they should be implemented.
