These fully worked-out problems provide a step-by-step road map to help students solve numerical problems. Each problem correlates to similar practice problems at the end of each chapter. In addition, the authors include many extensive real-world examples in the text.

These examples are contemporary applications of the theory and are longer and more extensive to show the evolution of the example. Each chapter opens with an example to draw readers into the topic.

This provocative new book invites us to forget all we have heard about the meaning of the Book of Revelation. Instead David Barr shows us ways to give this familiar text a fresh new reading. If we can think of the right questions to ask the text, and listen without prejudice, there are new things we can learn. The questions David Barr asks the Book of

Revelation are about stories: how they are told, whom they are about, what they consist of, where they go. His commentary, written with little technical vocabulary, provides the knowledge and detail needed to make a fresh reading of the story ourselves.

"The great lights who have come out of all the world's spiritual traditions and graduated from earth's schoolroom have become widely known as masters. They demonstrate that in the world of Spirit, there is no division of race, religion or philosophy—there is simply oneness, ineffable sweetness and love. What is not so widely known is that these great masters have retreats—temples and cities of light in the heaven world—where we can go in spiritual meditation and while our bodies sleep at night. In this comprehensive work, Mark and Elizabeth Prophet talk about these great masters, the stories of their lives and their magnificent spiritual retreats."

A clear-eyed look at the instrumental role drugs have played in our cultural, social, and spiritual development. • First American publication of the surprising European bestseller. • Examines everything from the ancient use of ergot and datura to the modern phenomenon of "designer" drugs such as Ecstasy and crack cocaine. From remotest antiquity to the present era of designer drugs and interdiction, drugs have played a prominent role in the cultural, spiritual, and social development of civilizations. Antonio Escohotado demonstrates how the history of drugs illuminates the history of humanity as he explores the long relationship between mankind and mind-altering substances. Hemp, for example, has been used in India since time immemorial to stimulate mental agility and sexual prowess. Aristotle's disciple Theophrastus testifies to the use of datura by the ancient Greeks and further evidence links the rites at Eleusis to the ingestion of a hallucinogen. Similar examples can be found in cultures as diverse as the Celts, the ancient Egyptians, the Aztecs, and other indigenous peoples around the world. Professor Escohotado also looks at the present-day differences that exist between the more drug-tolerant societies like Holland and Switzerland and countries advocating complete repression of these substances. The author provides a comprehensive analysis of the enormous social costs of the drug war that is coming under increasing fire from all levels of society. Professor Escohotado's work demonstrates that drugs have always existed and been used by societies throughout the world and the contribution they have made to humanity's development has been enormous. The choice we face today is to teach people how to use them correctly or to continue to indiscriminately demonize them. "Just say no," the author says, is not an option. Just say "know" is. Antonio Escohotado is a professor of philosophy and social science methodology at the National University of Distance Education in Madrid, Spain. He travels widely, offering lectures and seminars on the subject of drugs and history.

Heartwarming and profound, this account of one writer's relationship with his beloved German sheperd is a masterpiece of animal literature. The distinguished British man of letters J. R. Ackerley hardly thought of himself as a dog lover when, well into middleage, he came into possession of a German shepherd. Tohis surprise, she turned out to be the love of his life, the "ideal friend" he had been searching for in vain for years. My Dog Tulip is a bittersweet retrospective account of their sixteen-year companionship, as well as a profound andsubtle meditation on the strangeness that lies at the heartof all relationships. In vivid and sometimes startling detail, Ackerley tells of Tulip's often erratic behavior and very canine tastes, and of his own fumbling but determinedefforts to ensure for her an existence of perfect happiness. My Dog Tulip has been adapted to screen as a major animated feature film with a cast that includes the voices of Christopher Plummer, Lynn Redgrave, and Isabella Rossellini. It has been heralded as "A stroke of genius" by New York Magazine and "The love story of the year" by Vanity Fair. My Dog Tulip was adapted into a major motion picture in 2010.

This book makes Hazardous or Electrical Area Classification simple. In plants processing flammable materials, every effort is made to avoid the escape of such materials and in addition, stringent measures are taken to exclude sources of ignition. A complex array of standards surround this topic which has lead to an overly conservative approach being taken. This type of approach means that much more expensive electrical apparatus than is necessary is installed. To avoid this unnecessary expenditure, Dr Groh clearly explains the relevant standards, so that accurate assessment of the risks associated with hazardous areas is possible. He also identifies possible ignition sources and methods of designing apparatus which do not cause sparks thereby maintaining safety. * Covers must-have information regarding IEC/CENELEC standards in electrical or hazardous area classification * Provides a clear overview of a complex area
