Through the first-hand experiences of pilots and ground crew, the author of *Javelin Boys* chronicles the history of the RAF's first jet-engined aircraft. As Britain's first jet fighter, the Gloster Meteor has had a remarkably varied and lengthy life. But while many books have focused on its development and service history, the time has come to hear the personal experiences of its air and ground crews. By interviewing over thirty veterans, author and Meteor veteran Steve Bond has written an incredibly detailed insight into this iconic aircraft, which is supported by anecdotes and accounts from those who knew it best. One example is Alan McDonald who described the Meteor as "a bit unforgiving if you got it wrong, as many pilots found out to their cost, especially on one engine, but I must admit I got to like it very much—it was a great adrenaline rush." Alongside these entertaining anecdotes are details of the Meteor's

origins and developments. Starting with the first deliveries in 1944 working through to the present day, Bond documents the diverse role that the Meteor has had—from operations against the V1 and photo-reconnaissance missions to its use as a training machine and later as a display aircraft. The book also features photographs never seen before in print. This detailed history of this iconic and much loved jet fighter will appeal to all aviation fans. “Bond has done a great job with this book with many personal accounts of the people that were involved every day in the life of the Meteor. Highly Recommended.” —International Plastic Modelers’ Society/USA

Modified for low-level operations to counter Luftwaffe attacks on the south coast, the Griffon-powered Spitfire XIV became the best low-level fighter of World War II. Squadrons moved to south-eastern England to counter the V1 flying bomb offensive, where daring pilots pioneered the technique of tipping the V1 over with the aircraft's wingtip to disorientate the bomb. Andrew Thomas also investigates the role played by the modified Spitfire squadrons after the V1 offensive, both in the attack on Germany and after the war in Malaya and Palestine. First-hand stories, photographs and colour profiles complete this account of the aces who flew the most powerful Spitfire variant ever built.

When the revolutionary twin jet-powered Arado Ar 234 first appeared in the skies over north-west Europe in the summer of 1944, it represented the state-of-the-art in terms of aeronautical and technical development. The Ar 234 was a

formidable aircraft – powered by Jumo 004Bs, the same engine used by the Me 262, and with a maximum speed of 735 km/h and range of 1600 km/h, it was very difficult for the Allies to 'catch'. Here was a machine that with its superior speed could operate with impunity as both a bomber and in the reconnaissance role. As such, the aircraft became the world's first reconnaissance jet, undertaking secret, high-speed, high-altitude observation missions for the German High Command over the Allied beachheads in Normandy and other Allied strongholds. Astonishingly, in September 1944 and as late as 1945, lone Ar 234s conducted reconnaissance flights over British ports and the Mediterranean. The aircraft was equally efficient as a jet bomber – although the Ar 234B-2 bomber variant carried no defensive gun armament, it was able to deliver 1000 kg of bombs at high-speed and at either low- or high-level with considerable and devastating accuracy. This highly detailed title from renowned aviation historian Robert Forsyth explores the history of this incredible aircraft, from its development in the early 1940s to its deployment in both reconnaissance and bomber roles throughout the rest of the war. The masterful text is supported by stunning, specially commissioned artwork.

The film's heroine is a young police officer who is desperately trying to find the girl's mother. The missing woman was no angel, and there are plenty of suspects to choose from, including an estranged husband, an angry ex-lover, her detestable father, her mysterious brother, and a jealous rival. Allied fighter pilots began encountering German jets – principally the outstanding Me 262 fighter – from the autumn of 1944. Stunned by the aircraft's speed and rate of climb, it took USAAF and RAF units time to work out how to combat this deadly threat as the Luftwaffe targeted the medium and heavy bombers attacking targets across the Reich. A number of high-scoring aces from the Eighth Air Force (Drew, Glover, Meyer, Norley and Yeager, to name but a few) succeeded in claiming Me 262s, Me 163 and Ar 234s during the final months of the campaign, as did RAF aces like Tony Gaze and 'Foob' Fairbanks. The exploits of both famous and little-known pilots will be chronicled in this volume, detailing how they pushed their P-47s, P-51s, Spitfires and Tempests to the limits of their performance in order to down the Luftwaffe's 'wonder weapons'.

"The Spitfire is probably Britain's best loved and admired airplane. It is also revered around the world. This book looks at the later marques that were modified for various special tasks and differed to a large degree from Supermarine's first early versions that saw action in the early days of World War II. New and more powerful Rolls-Royce engines replaced the well-tried Merlin, but increased the aircraft's performance in terms of speed and operational altitude. Subtle changes to wing design also increased the maneuverability and capability of these spectacular models that survived in the operational role until superseded by the introduction of jet-powered flight. The content explains the design details, development and flight testing of twelve models and also contains their operational roles and history. Lengthy appendices will include Griffon-powered Spitfire aces, V1 rocket destruction aces, Griffon-powered Spitfire losses

and where the survivors can be found."

Why would someone write a book on Mind Control?

Because as much as we try to elevate ourselves above being human animals we are, in fact, animals. We are subject to the wants and desires of any being with a genome and vertebrae. To rise above that is an admirable and a task we should take on as a worthy spiritual endeavor. But to deny that we are, truly, animals is to lie to ourselves. We must deal with people who may not be so enlightened advanced as we are. They may desire what we have and be secretly filled with envy and contempt. The worst event is to have these suspicions fulfilled and then be pulled down into the politics of man. Do we deny that it's happening and hope others will be touched by our honesty and good will enough to change? Or do we drop our highest spiritual ideals and play their game? I would like to suggest a radically different strategy. Take the game of manipulation and Mind Control and make it a part of your spirituality. Reid Wolfe is a master of seducing women. An intimate, everyday perspective on information-seeking behavior, reaching into the social context of American history and American homes. All day, every day, Americans seek information. We research major purchases. We check news and sports. We visit government Web sites for public information and turn to friends for advice about our everyday lives. Although the Internet influences our information-seeking behavior, we gather information from many sources: family and friends, television and radio, books and magazines, experts and community leaders. Patterns of information seeking have evolved throughout American history and are shaped by a number of forces, including war, modern media, the state of the economy, and government

regulation. This book examines the evolution of information seeking in nine areas of everyday American life. Chapters offer an information perspective on car buying, from the days of the Model T to the present; philanthropic and charitable activities; airline travel and the complex layers of information available to passengers; genealogy, from the family Bible to Ancestry.com; sports statistics, as well as fantasy sports leagues and their fans' obsession with them; the multimedia universe of gourmet cooking; governmental and publicly available information; reading, sharing, and creating comics; and text messaging among young people as a way to exchange information and manage relationships. Taken together, these case studies provide a fascinating window on the importance of information in the past century of American life.

Widely acclaimed when first published, this lively social history of Hogarth's England went into a second edition with a new preface and updated notes and guide to further reading. 'This panorama of eighteenth-century English life ...Methodists and melancholia, village cricketers versified to glory and

homosexuals pilloried to death, he has an eye and a word for everything in the pullulating scene.' THE SUNDAY TIMES 'Social history is ever flourishing, but the number of really original contributions is relatively small. Mr. Jarrett's book is one of this number; he is an historian of established reputation in general history who sets out to describe the eighteenth-century scene from his own examination of original sources.' ECONOMIST 'Jarrett's comprehensive learning, his graceful style, and his instinct for the telling detail make this an excellent book to dip into, to read in installments and to keep for reference.' NEW YORKER 'Jarrett digs deep into the diaries, letters, memoirs of the period, gives anecdote and incident as a counterpoint to the illustrations, examines the age's attitude toward children and education, the role of women, marriage, pleasures, politics, life and death ...A brilliant study.'
