**Designing Suburban Futures** June Williamson, 2013-05-07 Suburbs deserve a better, more resilient future. June Williamson shows that suburbs aren't destined to remain filled with strip malls and excess parking lots; they can be reinvigorated through inventive design. Today, dead malls, aging office parks, and blighted apartment complexes are being retrofitted into walkable, sustainable communities. Williamson provides a broad vision of suburban reform based on the best schemes submitted in Long Island's highly successful Build a Better Burb competition. Many of the design ideas and plans operate at a regional scale, tackling systems such as transit, aquifer protection, and power generation. While some seek to fundamentally transform development patterns, others work with existing infrastructure to create mixed-use, shared networks. *Designing Suburban Futures* offers concrete but visionary strategies to take the sprawl out of suburbia, creating a vibrant new, suburban form.

*Designing for the Third Age* Lorraine Farrelly, 2014-04-28 Highlights how architecture needs to rise to the challenge of a demographic revolution As people sixty-five and older constitute an ever increasingly proportion of population in most industrialized nations, the design of housing and other built provisions needs to be rethought in order to accommodate this ever-expanding ageing population. How can far-reaching architectural solutions play a key part by creating sustainable cities for the changing profile of the population, reducing models of dependency for care and transport while creating opportunities for recreation, leisure and work? This issue reflects on the population challenges facing Europe, Australia, North America, and Asia, offering innovative responses to these problems on a practical and speculative level. Addresses a major social issue for architects, designers, and students Includes contributions from Arup Global Foresight + Innovation; Baroness Greengross, President of the International Longevity Centre-UK; Matthias Hollwich of HWKN; Jerry Maltz of AIANY Design for Aging; David Birbeck of Design for Homes; Edward Denison, Research Associate at University College London; Kathryn Firth of the London Legacy Development Corporation; Richard Mazuch of IBI Nightingale; architect Walter Menteth; author

Jayne Merkel; architect, writer and researcher Terri Peters; Anjali Rajee, Executive Director of International Longevity Centre-India and architect Radhika Vaidya; Robert Schmidt of the Adaptable Futures research group at Loughborough University; Sally Stewart of Glasgow School of Architecture; Mark Taylor of The University of Newcastle; and Katherine Wilkinson of RMIT Features architects including Amie Gross Architects, Ariktema, Dattner Architects, HWKN, Deborah Gans/Gans Studio, JJW Architects, Henning Larsen Architects, Michael Maltzan Architecture, nARCHITECTS, Nord Architects, PRP Architects, and Yanmin Zhou

*Case Studies in Retrofitting Suburbia* June Williamson, Ellen Dunham-Jones, 2021-01-20 A brand-new collection of 32 case studies that further demonstrate the retrofitting of suburbia This amply-illustrated book, second in a series, documents how defunct shopping malls, parking lots, and the past century's other obsolete suburban development patterns are being retrofitted to address current urgent challenges they weren't designed for: improving public health, increasing resilience in the face of climate change, leveraging social capital for equity, supporting an aging society, competing for jobs, and disrupting automobile dependence. *Case Studies in Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges* provides summaries, data, and references on how these challenges manifest in suburbia and discussion of successful urban design strategies to address them in Part I. Part II documents how innovative design strategies are implemented in a range of northern American contexts and market conditions. From modest interventions with big ripple effects to ambitious do-overs, examples of redevelopment, reinhabitation, and greening of changing suburban places from coast to coast are described in depth in 32 brand new case studies. Written by the authors of the highly influential *Retrofitting Suburbia: Urban Design Solutions for Redesigning Suburbs* Demonstrates changes that can and already have been realized in suburbia by focusing on case studies of retrofitted suburban places Illustrated in full-color with photos, maps, plans, and diagrams Full of replicable lessons and creative responses to ongoing problems and potentials with conventional suburban form, *Case Studies in Retrofitting Suburbia: Urban Design Strategies for Urgent Challenges* is an important book for students and professionals involved in urban design, architecture, landscape architecture, urban planning, development, civil engineering, public health, public policy, and governance. Most of all, it is intended as a useful guide for anyone who seeks to inspire revitalization, justice, and shared prosperity in places they know and care about.

*Sprawl Repair Manual* Galina Tachieva, 2010-09-14 There is a wealth of research and literature explaining suburban sprawl and the urgent need to retrofit suburbia. However, until now there has been no single guide that directly explains how to repair typical sprawl elements. The *Sprawl Repair Manual* demonstrates a step-by-step design process for the re-balancing and re-urbanization of suburbia into more sustainable, economical, energy- and resource-efficient patterns, from the region and the community to the block and the individual building. As Galina Tachieva asserts in this exceptionally useful book, sprawl repair will require a proactive and aggressive approach, focused on design, regulation and incentives. The *Sprawl*

Repair Manual is a much-needed, single-volume reference for fixing sprawl, incorporating changes into the regulatory system, and implementing repairs through incentives and permitting strategies. This manual specifies the expertise that's needed and details the techniques and algorithms of sprawl repair within the context of reducing the financial and ecological footprint of urban growth. The Sprawl Repair Manual draws on more than two decades of practical experience in the field of repairing and building communities to analyze the current pattern of sprawl development, disassemble it into its elemental components, and present a process for transforming them into human-scale, sustainable elements. The techniques are illustrated both two- and three-dimensionally, providing users with clear methodologies for the sprawl repair interventions, some of which are radical, but all of which will produce positive results.

**The Topography of Wellness** Sara Jensen Carr, 2021-06-15 The COVID-19 pandemic has re-ignited discussions of how architects, landscapes, and urban planners can shape the environment in response to disease. This challenge is both a timely topic and one with an illuminating history. In *The Topography of Wellness*, Sara Jensen Carr offers a chronological narrative of how six epidemics transformed the American urban landscape, reflecting changing views of the power of design, pathology of disease, and the epidemiology of the environment. From the infectious diseases of cholera and tuberculosis, to so-called social diseases of idleness and crime, to the more complicated origins of today's chronic diseases, each illness and its associated combat strategies has left its mark on our surroundings. While each solution succeeded in eliminating the disease on some level, sweeping environmental changes often came with significant social and physical consequences. Even more unexpectedly, some adaptations inadvertently incubated future epidemics. From the Industrial Revolution to present day, this book illuminates the constant evolution of our relationship to wellness and the environment by documenting the shifting grounds of illness and the urban landscape.

**The Nature of Urban Design** Alexandros Washburn, 2015-10-08 The best cities become an ingrained part of their residents' identities. Urban design is the key to this process, but all too often, citizens abandon it to professionals, unable to see a way to express what they love and value in their own neighborhoods. New in paperback, this visually rich book by Alexandros Washburn, former Chief Urban Designer of the New York Department of City Planning, redefines urban design. His book empowers urbanites and lays the foundations for a new approach to design that will help cities to prosper in an uncertain future. He asks his readers to consider how cities shape communities, for it is the strength of our communities, he argues, that will determine how we respond to crises like Hurricane Sandy, whose floodwaters he watched from his home in Red Hook, Brooklyn. Washburn draws heavily on his experience within the New York City planning system while highlighting forward-thinking developments in cities around the world. He grounds his book in the realities of political and financial challenges that hasten or hinder even the most beautiful designs. By discussing projects like the High Line and the Harlem Children's Zone as well as examples from Seoul to Singapore, he explores the nuances of the urban design process while

emphasizing the importance of individuals with the drive to make a difference in their city. Throughout the book, Washburn shows how a well-designed city can be the most efficient, equitable, safe, and enriching place on earth. The Nature of Urban Design provides a framework for participating in the process of change and will inspire and inform anyone who cares about cities.

Suburban Remix Jason Beske, David Dixon, 2018-02 Investment has flooded back to cities because dense, walkable, mixed-use urban environments offer choices that support diverse dreams. Auto-oriented, single-use suburbs have a hard time competing. Suburban Remix brings together experts in planning, urban design, real estate development, and urban policy to demonstrate how suburbs can use growing demand for urban living to renew their appeal as places to live, work, play, and invest. The case studies and analysis show how compact new urban places are being created in suburbs to produce health, economic, and environmental benefits, and contribute to solving a growing equity crisis.

**The Evolution of Urban Form** Brenda Case Scheer, 2017-10-20 Why are so many of our urban environments so resistant to change? The author tackles this question in her comprehensive guide for planners, designers, and students concerned with how cities take shape. This book provides a fundamental understanding of how physical environments are created, changed, and transformed through ordinary processes over time. Most of the built environment adheres to a few physical patterns, or types, that occur over and over. Planners and architects, consciously and unconsciously, refer to building types as they work through urban design problems and regulations. Suitable for professional planners, architects, urban designers, and students, This book includes practical examples of how typology is critical to analytical, design, and regulatory situations.

**Defensible Space on the Move** Loretta Lees, Eleanor Warwick, 2022-02-02 Both theoretically informed and empirically rich, Defensible Space makes an important conceptual contribution to policy mobilities thinking, to policy and practice, and also to practitioners handling of complex spatial concepts. Critically examines the geographical concept Defensible Space, which has been influential in designing out crime to date, and has been applied to housing estates in the UK, North America, Europe and beyond Evaluates the movement/mobility/mobilisation of defensible space from the US to the UK and into English housing policy and practice Explores the multiple ways the concept of defensible space was interpreted and implemented, as it circulated from national to local level and within particular English housing estates Critiquing and pushing forwards work on policy mobilities, the authors illustrate for the first time how transfer mechanisms worked at both a policy and practitioner level Drawing on extensive archival research, oral histories and in-depth interviews, this important book reveals defensible space to be ambiguous, uncertain in nature, neither proven or disproven scientifically

Daughters of Heaven Michelanne Forster, 2014-04-01 On June 22, 1954 in a secluded part of Victoria Park in Christchurch, Juliet Hulme and Pauline Parker battered Pauline's mother to death. The infamous murder, also depicted in the

Peter Jackson movie *Heavenly Creatures*, arose from the passionate friendship of the two girls.

*The Car in 2035* Kati Rubinyi, 2013 *The Car in 2035: Mobility Planning for the Near Future* focuses on the car, the street, and public policy in Southern California. In this collection of essays and images, the car is viewed as both a challenge and benefit to our neighborhoods, cities, and suburbs. Despite rising fuel prices, the automobile will be Southern California's primary form of transportation in 2035 because the region's population will continue to be dispersed widely, and the car offers the best access to the area's tremendous diversity of economic, social, recreational, and cultural opportunities. But the infrastructure will need to accommodate a heterogeneous mix of modes of transportation, including more cars on the road than today.

**Suburban Transformations** Paul Lukez, 2007-10-04 Smart Growth advocates, environmentalists, and New Urbanists have all tried in their own ways to spread the message of reforming current land use patterns. Their solutions are often criticized for being overly prescriptive, opposed to growth, or nostalgic. *Suburban Transformations* offers an alternative to these practices while synthesizing many of the ideas and proposals that they put forth. Both a work of theory and a practical tool for suburban community planning, the book introduces the adaptive design process: a method that allows for the organic transformation of communities from siteless suburbs and edge cities into places with their own distinct identity and unique character. Five case studies provide fully expressed examples of the process, beginning with a sophisticated system of mapping and culminating in computer projections of likely future outcomes, giving the designer the ability to project changes in the community fabric and adding that knowledge to the designer's kit of place-making tools.

**Street Design** Victor Dover, John Massengale, 2025-02-19 A comprehensive blueprint for fixing America's cities and towns, updated and expanded "This book should be required reading in schools of urban design, architecture, and landscape architecture, and an understanding of it should be part of the licensing requirements for civil, traffic, and transportation engineers." - Elizabeth Plater-Zyberk, DPZ coDESIGN, former Dean of the School of Architecture at the University of Miami. "I am delighted by the eloquence, knowledge, thoroughness, and basic common sense of *Street Design*, which is at once a how-to book and an ode to the beauty and wonder of cities. Much more than a formula for how to design streets, this book helps us understand that there are no simple answers or all-purpose solutions to the challenge of city-building." - Paul Goldberger, Pulitzer-Prize-winning Contributing Editor at *Vanity Fair*, formerly at the *New Yorker* and the *New York Times*. John Massengale and Victor Dover know how to fix America's neighborhoods, cities, and towns: make them walkable again. That begins with great streets where people want to be, streets that are comfortable, safe, interesting, and beautiful. *Street Design, Second Edition* looks at hundreds of streets old and new, shows us what works and what doesn't, and reveals the secrets behind designing great streets and walkable places. Revised and expanded, now with full-color images throughout, this indispensable and transformative guide, the only book of its kind: Shows examples of over 150 excellent streets and

explains why they are successful and how they were designed and created Reveals crucial elements that many modern street designs lack Offers step-by-step instruction on how to design new streets and improve existing ones to create more walkable cities and towns Highlights common street-design challenges and ways they can be addressed through placemaking Features more than 600 color and black-and-white photos Includes contributions from twenty of the leading design experts in the field, including Andrés Duany, Elizabeth Plater-Zyberk, Léon Krier, Nicholas Boys Smith, Jeff Speck, Stefanos Polyzoides, and John Norquist, the former mayor of Milwaukee. Street Design, Second Edition is the indispensable handbook for urban designers, civic leaders, architects, city planners, engineers, and landscape architects, and essential reading for any person who wants to make their community walkable and create memorable streets that are not mere routes to someplace else, but the great places to which other routes lead.

*The New Localism* Bruce Katz,Jeremy Nowak,2018-01-09 The New Localism provides a roadmap for change that starts in the communities where most people live and work. In their new book, *The New Localism*, urban experts Bruce Katz and Jeremy Nowak reveal where the real power to create change lies and how it can be used to address our most serious social, economic, and environmental challenges. Power is shifting in the world: downward from national governments and states to cities and metropolitan communities; horizontally from the public sector to networks of public, private and civic actors; and globally along circuits of capital, trade, and innovation. This new locus of power—this new localism—is emerging by necessity to solve the grand challenges characteristic of modern societies: economic competitiveness, social inclusion and opportunity; a renewed public life; the challenge of diversity; and the imperative of environmental sustainability. Where rising populism on the right and the left exploits the grievances of those left behind in the global economy, new localism has developed as a mechanism to address them head on. New localism is not a replacement for the vital roles federal governments play; it is the ideal complement to an effective federal government, and, currently, an urgently needed remedy for national dysfunction. In *The New Localism*, Katz and Nowak tell the stories of the cities that are on the vanguard of problem solving. Pittsburgh is catalyzing inclusive growth by inventing and deploying new industries and technologies. Indianapolis is governing its city and metropolis through a network of public, private and civic leaders. Copenhagen is using publicly owned assets like their waterfront to spur large scale redevelopment and finance infrastructure from land sales. Out of these stories emerge new norms of growth, governance, and finance and a path toward a more prosperous, sustainable, and inclusive society. Katz and Nowak imagine a world in which urban institutions finance the future through smart investments in innovation, infrastructure and children and urban intermediaries take solutions created in one city and adapt and tailor them to other cities with speed and precision. As Katz and Nowak show us in *The New Localism*, “Power now belongs to the problem solvers.”

**Suburban Form** Kiril Stanilov,Brenda Case Scheer,2004 This book examines and documents the remarkable

development and transformation of suburban form throughout the globe during the twentieth century. The premise that suburban areas are monotonous, inert environments is put to a test through investigation of the complexity of those suburban settings and the dynamic physical changes that have taken place since their inception.

**Speculative Everything** Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

**Iconography and Electronics Upon a Generic Architecture** Robert Venturi, 1998-02-06 This new collection of writings in a variety of genres argues for a generic architecture defined by iconography and electronics, an architecture whose elemental qualities become shelter and symbol.

*Clear Light*, 2016-11 Although much of my work is architectural in character, I do not represent real spaces. Rather, my work has its origins in the spaces I have abandoned - the mood of Rome and the landscape of Texas - and the paintings are of spaces I know that look nothing like what I paint ...They are essentially meditations on essences of architecture like enclosure, surface and light. Born in Italy in 1943, Laurotta Vinciarelli passed away in New York in 2011. Trained as an architect in Rome but a watercolorist by vocation, her works reside in numerous private collections and among the holdings of prominent institutions, including the Museum of Modern Art in New York, the National Gallery in Washington DC, and the San Francisco Museum of Modern Art. Noted for their luminous qualities of color and light, her depictions of imagined spaces open up a world of enclosed rooms, sweeping landscapes, watery materiality, and atmospheric ephemerality. Describing her work, a noted theorist and critic once said, They are not architecture exactly, but evidence that it exists. This book brings together paintings from 1981 onwards in the most complete collection of Vinciarelli's work to date. It also

includes texts from knowledgeable commentators and for the first time presents sketch materials that provide insight into Vinciarelli's working methodology. Vinciarelli's technique often operated at the very limits of her medium; sometimes even to the point of failure. In these paintings, color is used as a device for shaping space, with watercolor the chosen medium for its rich portrayal of light and the conceptual simplicity of the act of mixing paste with water.

Increments of Neighborhood Brian O'Looney, 2020 Intended as a comprehensive resource, 'Increments of Neighborhood' is a compendium of recent built work for urban neighbourhoods, encompassing the spectrum of building types financed/built by today's American real estate industry - from single family and townhouses, through 'missing middle' stacked housing, stick-built housing, large multi-family, and high-rise buildings. This publication is the only resource in the marketplace that tabulates market-rate products that fill America's cities, as well as being a comparative resource that shows how these types can be deployed in a way befitting smart-growth using sustainable principles. The only resource of its type, 'Increments of Neighborhood' will demystify the understanding of costs and type, contribute to the public realm for the non-architectural professional, and provide a breadth and range of significant new information for experienced architects who typically specialise in a particular segment of building products such as hospitals or single-family houses, information with which they are frequently unacquainted.

The CEO as Urban Statesman Sam A. Williams, 2014 Sam Williams is one of the US's leading experts in urban competitiveness. Williams has earned a national reputation for harnessing the power of CEOs to make cities thrive. In The CEO as Urban Statesman, Williams uses case studies to argue that business leaders can and should contribute to their communities by using their business skills to solve public policy problems--and he tells them how to do it.
