The tourism industry provides employment for literally millions of individuals. Despite global recessions, terrorist attacks and other catastrophes this is likely to remain unchanged in the long-term. Resilience of this nature helps tourism remain a major global employer in both developed and emerging economies. The important role played by tourism workers cannot be overstated; some argue that they actually define the product on offer. Accordingly, mediocre or poor

performance gives rise to an unremarkable service experience or one to which customers would not return willingly. The inextricable link between the calibre and performance of staff and service delivery is a key issue for human resources management. This challenge is further complicated by a number of structural characteristics including: dominance of unaffiliated small to medium-sized organizations; high levels of labour turnover; and a heterogeneous workforce with individuals having a wide variety of cultural differences and employment aspirations. This book accounts for the above factors using an approach which is part prescriptive and part enquiry or research-oriented. In doing so, espoused 'HRM convention' may be understood against 'HRM in practice'. Additionally, by using this method we hope to instil a sense of enquiry in the reader. This is a necessary intellectual asset for the future and will also allow the individual to make a positive contribution in the workplace.

This dissertation examines how human resources are managed at selected Ethiopian private companies, how Ethiopian human resource management practice is evolving and how it can be improved. The examination is qualitative and exploratory, since no comparative research on human resource management has yet been conducted at Ethiopian profit or non-profit organizations. An understanding of Ethiopian human resource management practice makes it possible to improve Ethiopian human resource management practice, and thus to increase employee productivity. The study took place at four manufacturing and four service companies in Addis Ababa, all representative of their sector. The research claim is that Ethiopian human resource management practices differ from human resource management practices in the West, due to differences in cultural factors, economic systems, political systems, and legal and industrial relations. For this reason, Ethiopia's culture, politics, economy and legal and industrial relations have been analyzed. The main finding of this study is that the importance of human resource management is not uniformly understood at all the case-study companies. Although the multinational companies based in Ethiopia see their human resources as the companies most important asset, as human capital, the local companies generally do not. The fact that respondents claim that Ethiopia has limited experience in industrialization might explain why human resource management in Ethiopia is rudimentary and

still has a long way to go. With this dissertation the researcher wants to contribute to improving Ethiopian human resource management practice. Moreover, this dissertation may be used as a framework for similar research in other sectors or for more specific in-depth research. This dissertation may also serve as a knowledge base for company managers, business consultants, academics and government officials of countries with a national culture similar to Ethiopia's (for example Kenya, Tanzania and Zambia), countries undergoing (or which have undergone) a recent transition to a free market economy, and countries facing similar macro-economic developments.

The role of HRM in developing sustainable business organizations is increasingly attracting attention. Sustainability can be used as a principle for HRM itself and the tasks of Sustainable HRM are twofold. On the one hand it fosters the conditions for individual employee sustainability and develops the ability of HRM systems to continuously attract, regenerate and develop motivated and engaged employees by making the HRM system itself sustainable. On the other hand Sustainable HRM contributes to the sustainability of the business organizations through cooperation with the top management, key stakeholders and NGOs and by realising economic, ecological, social and human sustainability goals. This book provides a comprehensive review of the new area of Sustainable HRM and of research from different disciplines like sustainable work systems, ergonomics, HRM, linking sustainability and HRM. It brings together the views of academics and practitioners and provides many ideas for conceptual development, empirical exploration and practical implementation. This publication intends to advance the international academic and practice-based debates on the potential of sustainability for HRM and vice versa. In 19 chapters, 26 authors from five continents explore the role of HRM in developing economically, socially and ecologically sustainable organizations, the concept of Sustainable HRM and the role of HRM in developing Sustainable HRM systems and how sustainability and HRM are conceptualized and perceived in different areas of the world.
