Convergent Architecture Richard Hubert,2002-07-15 The only complete technical guide to building integrated business systems using the convergent architecture approach In his groundbreaking *Business Engineering with Object Technology* (0-471-04521-7), David Taylor introduced the concept of convergent architecture (CA), a framework for building the business design directly into the software systems that support it. Now, in this important follow-up to that 1995 classic, expert Richard Hubert provides systems developers and architects with their first complete blueprint for building integrated CA business systems using the hottest technologies, including Enterprise JavaBeans, XML, UML, Rational Rose, and others. Following a detailed introduction to the elements of CA, he walks readers through the entire CA design and implementation process, using examples in Java and EJB to illustrate key points. Companion Website provides hands-on tutorials, links to related tool sites, and updates to the CA methodology.

Developing a Center for Teaching Excellence Lawrence A. Tomei, James A. Bernauer, Anthony Moretti, 2016-09-23
Developing a Center for Teaching Excellence: A Case Study Using the Integrated Readiness Matrix builds on the 2015 text, Integrating Pedagogy and Technology: Improving Teaching and Learning in Higher Education with a focus on teaching in higher education. Developing a Center for Teaching Excellence is premised on our contention in the first book that, while individual faculty members can independently begin to use the IRM to improve their pedagogical and technological skills in their content areas, an organizational structure is needed to sustain ongoing improvement. In addition, while the first book provided a primer on learning theory as it relates to pedagogy, Developing a Center for Teaching Excellence plumbs this topic more deeply from the perspective of the college instructor. Further, the second book is dedicated to demonstrating how the IRM can be institutionalized as the foundation for providing the structure and support to faculty and how they can help shape centers for teaching excellence by becoming more familiar with relevant learning theories and related pedagogical and technological approaches.
