What makes you passionate about working with SQL Server? What lessons have you learned, perhaps the hard way, on how to get the best performance and scalability out of your SQL Server databases? We challenged a group of talented, up-and-coming 'new voices' in SQL Server to share their passion and knowledge with the Community. A DBA's core responsibilities are constant. A DBA must maintain and enforce security mechanisms on the data, prepare effectively for disaster recovery, ensure the performance and availability of all the databases in their care. As such, we have chapters providing tips on how to get the most out of features such as data compression, backup verification, performance tuning with traces and extended events, auditing, SSIS, and more. Side by side with these, we have chapters on the importance to a DBA of communicating clearly with their co-workers and business leaders, presenting data as useful information that the business can use to make decisions, adopting a more Agile approach to their work, and sound project management skills. The resulting book, Tribal SQL, is a reflection of how a DBA's core and long-standing responsibilities sit alongside new thinking and fresh ideas about where the DBA role is going, and what it means to be a DBA in today's businesses.

This volume of essays examines the ways in which magical practices are found in different aspects of contemporary capitalist societies. From contract law to science, by way of finance, business, marketing, advertising, cultural production, and the political economy in general, each chapter argues that the kind of magic studied by anthropologists in less developed societies – shamanism, sorcery, enchantment, the occult – is not only alive and well, but flourishing in the midst of so-called 'modernity'. Modern day magicians range from fashion designers and architects to Donald Trump and George Soros. Magical rites take place in the form of political summits, the transformation of products into brands through advertising campaigns, and the biannual fashion collections shown in New York, London, Milan and Paris. Magical language, in the form of magical spells, is used by everyone, from media to marketers and all others devoted to the art of 'spin'. While magic may appear to be opposed to systems of rational economic thought, Moeran and Malefyt highlight the ways it may in fact be an accomplice to it.

on. And now that they're all grown up, things are about to get geekin' ugly. My name is Tass. I'm smart, I'm driven, and I am determined not to let prankster Hunter Johnson continue raining on my parade. When we were little, he'd pull my hair and call me names. When we were teenagers, he'd throw food and tease me for being a flat-chested virgin. But now that we've ended up at the same college, he's out of his hot head if he thinks he can keep messing with my life. It's like he's fixated on me or something. Well, guess what, Mr. Amazefootball? I'm not that geeky little girl anymore and you do not screw with a smart woman. So what's my plan? It's definitely wild, and he's about to find out.

Exiled from his province Cobb Ash for a crime he did not commit, Raspail becomes the most wretched of wolves, a ramblefoot. Now he must survive on his own navigating the treacherous outer fringes of the wolf provinces, dangerously close to where the new predator wages war on the wolf. It is here, in an anarchic enclave where meatdrunk ramblefoots plunder the bountiful treasures of man, that Raspail comes to prominence as a legend among wolves. But Raspail has no interest in power, only Kileo, the love he was torn from. With old foes waiting to assassinate him and Cob Ash recently allied with hostile neighbor Draguignon, Raspail will need to unite the lawless ramblefoots and conquer Cob Ash if he is to ever see Kileo again. With a keen eye for the extraordinary in nature, and a portrayal of wolf culture that is both meticulously researched and then fantastically extrapolated on, *Ramblefoot* is a thrilling adventure that will immerse you in its sprawling mythology from the first sentence.
