Uncle Petros and Goldbach's Conjecture Apostolos Doxiadis,2012-11-15 Uncle Petros is a family joke. An ageing recluse, he lives alone in a suburb of Athens, playing chess and tending to his garden. If you didn't know better, you'd surely think he was one of life's failures. But his young nephew suspects otherwise. For Uncle Petros, he discovers, was once a celebrated mathematician, brilliant and foolhardy enough to stake everything on solving a problem that had defied all attempts at proof for nearly three centuries - Goldbach's Conjecture. His quest brings him into contact with some of the century's greatest mathematicians, including the Indian prodigy Ramanujan and the young Alan Turing. But his struggle is lonely and single-minded, and by the end it has apparently destroyed his life. Until that is a final encounter with his nephew opens up to Petros, once more, the deep mysterious beauty of mathematics. Uncle Petros and Goldbach's Conjecture is an inspiring novel of intellectual adventure, proud genius, the exhilaration of pure mathematics - and the rivalry and antagonism which torment those who pursue impossible goals.

The First Century After Beatrice Amin Maalouf,1995 In the 21st Century, a drug that guarantees the birth of boys--originally developed to reduce Third World populations--leads to a worldwide shortage of women. The result is an explosion of male violence, wars, and the sale of women on the black market. The narrator is a French entomologist trying to eradicate

the drug.

To Have or To Be? Erich Fromm,2013-11-05 To Have Or to Be? is one of the seminal books of the second half of the 20th century. Nothing less than a manifesto for a new social and psychological revolution to save our threatened planet, this book is a summary of the penetrating thought of Eric Fromm. His thesis is that two modes of existence struggle for the spirit of humankind: the having mode, which concentrates on material possessions, power, and aggression, and is the basis of the universal evils of greed, envy, and violence; and the being mode, which is based on love, the pleasure of sharing, and in productive activity. To Have Or to Be? is a brilliant program for socioeconomic change.

The memory of catastrophe Peter Gray,Kendrick Oliver,2024-07-30 Investigates the dynamic relationship between experiences of profound social and cultural disruption, and human memory. Critical comparisons are made across a wide variety of catastrophic experiences and memories; not just of war, but also of massacre, genocide, rebellion, famine, partition, shipwreck and fire. The book is an accessible showcase for a wide range of methodological approaches to the study of memory, including literary studies, cultural studies, participant-observation and historical studies, and uses a variety of oral, visual and written sources. Offers a diverse chronological and geographical range of catastrophic cases, from seventeenth-century England to the recent conflicts in the former Yugoslavia, from Ireland to the Indian sub-continent, from Mexico to wartime Leningrad. Well-written and accessible - a fascinating read.

Get Us Out of Here!! Nicky Eltz,2002-12-01 Dear Reader,What you are now holding is a most interesting book. The world beyond is speaking. It is offering advice, asking for help and giving answers. It exists and speaks about life -- our life here on earth and of possible consequences of our behaviour. It tells us that it is not the same to be humble, loving, good, merciful, loyal and honest as it is to be proud, loveless, bad, merciless, betraying and dishonest. At death this is not forgotten but rather remembered in total clarity. Not only is the punishment, or better yet the cleansing, spoken about; but also the length of this cleansing is so very much more. Then you ask yourself, is it possible? In the Catholic church one speaks about a transitory state which for a very long time has been referred to as Purgatory. Despite there being different theories, this state is always taken seriously. One needs it because one can only come before God cleansed and pure.

The Years of High Theory G. L. S. Shackle,1967-08-01 Even a decade after the end of the 1914-1918 war, economic theory assumed that the world was tranquil and orderly. By 1939 an economic slump without parallel, allied to the re-emergence of military ambition in Europe, had brought economic theorists face to face with reality. In this classic book, first published in 1967, Professor Shackle provides a study, in exact and professional language, of the precise nature, structure, presuppositions, language and inter-relations of the theories which were formulated in these fourteen years - unparalleled in the whole history of economics except perhaps by the years of the Physiocrats and Adam Smith. These theories are not prototypes on the way to something better but are of essential and permanent importance.

Modes of Censorship Francesca Billiani,2014-05-22 Modes of Censorship and Translation articulates a variety of scholarly and disciplinary perspectives and offers the reader access to the widening cultural debate on translation and censorship, including cross-national forms of cultural fertilization. It is a study of censorship and its patterns of operation across a range of disciplinary settings, from media to cultural and literary studies, engaging with often neglected genres and media such as radio, cinema and theatre. Adopting an interdisciplinary and transnational approach and bringing together contributions based on primary research which often draws on unpublished archival material, the volume analyzes the multi-faceted relationship between censorship and translation in different national contexts, including Italy, Spain, Great Britain, Greece, Nazi Germany and the GDR, focusing on the political, ideological and aesthetic implications of censorship, as well as the hermeneutic play fostered by any translational act. By offering innovative methodological interpretations and stimulating case studies, it proposes new readings of the operational modes of both censorship and translation. The essays gathered here challenge current notions of the accessibility of culture, whether in overtly ideological and politically repressive contexts, or in seemingly 'neutral' cultural scenarios.

Teaching Patients with Low Literacy Skills Cecilia Conrath Doak,Leonard G. Doak,Jane H. Root,1996 This practical text guides the reader in developing the necessary tools for teaching those patients with limited literacy skills. Nurses will learn proven strategies for evaluating comprehension and teaching patients using written materials, tapes, video, computer aided instruction, visuals, and graphics. An abundance of case studies helps to demonstrate the application of teaching/learning theory to actual practice. Readers will also explore literacy issues in health care as well as the cultural impact on comprehension.

Comprehensive Geriatric Assessment Alberto Pilotto,Finbarr C. Martin,2017-12-29 This book offers an up-to-date review on the principles and practice of multidimensional assessment and management of the older individual, which represents the cornerstone of modern clinical practice in the elderly. The early chapters cover the main elements and scope of the comprehensive geriatric approach and explain the pathways of care from screening and case finding through to in-depth assessment and treatment planning. Subsequent chapters review the evidence of how best to apply the multidimensional assessment and management approach in defined healthcare settings and within specific clinical areas, such as cancer and surgery. Finally, the education and training challenges are reviewed and the prospects for future clinical service and research in this important field are examined. The book is very timely given the recent advances in application of this approach, which reflect the growing international realization that older people are “core business” in many clinical areas where the role of specialist geriatric medicine has hitherto been limited. Accordingly, the book will be relevant to a wide range of clinicians. The authorship comprises many of the best known and widely published experts in their respective fields.
