Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

DIESEL ENGINE VIDEOS contain 57 original videos, each averaging 2 minutes in length, on topics that cover both the theory and servicing of modern diesel engines, fuel and engine management systems. Designed to accompany the Fourth Edition of Medium/Heavy Duty Truck Engines, Fuel & Computerized Management Systems, the videos provide step-by-step demonstrations of some of the key shop floor procedures undertaken by technicians. There is an emphasis on service and maintenance tasks, and up-to-date equipment and tools are used in the demonstrations. Basic engine service techniques, engine reconditioning, and operations such as connecting to a chassis data bus are covered, along with demonstrations of dynamometer test bed procedure. The videos were scripted and filmed with expert oversight at every step to insure the highest degree of authenticity and technical accuracy. They are ideally suited as attention-getting additions to the Powerpoint presentations available with Medium/Heavy Duty Truck Engines, Fuel & Computerized Management Systems, or to an instructor's own lecture materials. The video files are available on CD-ROM and come with a chart correlating them to relevant Medium/Heavy Duty Truck Engines, Fuel
