Making Believe Lisa Bode, 2017-07-07 In the past twenty years, we have seen the rise of digital effects cinema in which the human performer is entangled with animation, collaged with other performers, or inserted into perilous or fantastic situations and scenery. Making Believe sheds new light on these developments by historicizing screen performance within the context of visual and special effects cinema and technological change in Hollywood filmmaking, through the silent, early sound, and current digital eras. Making Believe incorporates North American film reviews and editorials, actor and crew interviews, trade and fan magazine commentary, actor training manuals, and film production publicity materials to discuss the shifts in screen acting practice and philosophy around transfiguring makeup, doubles, motion capture, and acting to absent places or characters. Along the way it considers how performers and visual and special effects crew work together, and struggle with the industry, critics, and each other to define the aesthetic value of their work, in an industrial system of technological reproduction. Bode opens our eyes to the performing illusions we love and the tensions we experience in wanting to believe in spite of our knowledge that it is all make believe in the end.

Girl Head Genevieve Yue, 2020-11-10 *Girl Head* shows how gender has had a surprising and persistent role in film production processes, well before the image ever appears onscreen. For decades, feminist film criticism has focused on issues of representation: images of women in film. But what are the feminist implications of the material object underlying that image, the filmstrip itself? What does feminist analysis have to offer in understanding the film image before it enters the realm of representation? *Girl Head* explores how gender and sexual difference have been deeply embedded within film materiality. In rich archival and technical detail, Yue examines three sites of technical film production: the film laboratory, editing practices, and the film archive. Within each site, she locates a common motif, the vanishing female body, which is transformed into material to be used in the making of a film. The book develops a theory of gender and film materiality through readings of narrative film, early cinema, experimental film, and moving image art. This original work of feminist media history shows how gender has had a persistent role in film production processes, well before the image ever appears onscreen.

In My Power Konstantin Dierks,2011-09-29 *In My Power* tells the story of letter writing and communications in the creation of the British Empire and the formation of the United States. In an era of bewildering geographical mobility, economic metamorphosis, and political upheaval, the proliferation of letter writing and the development of a communications infrastructure enabled middle-class Britons and Americans to rise to advantage in the British Atlantic world. Everyday letter writing demonstrated that the blessings of success in the early modern world could come less from the control of overt political power than from the cultivation of social skills that assured the middle class of their technical credentials, moral deserving, and social innocence. In writing letters, the middle class not only took effective action in a turbulent world but also defined what they believed themselves to be able to do in that world. Because this ideology of agency was extended to women and the youngest of children in the eighteenth century, it could be presented as universalized even as it was withheld from Native Americans and enslaved blacks. Whatever the explicit purposes behind letter writing may have been—educational improvement, family connection, business enterprise—the effect was to render the full terms of social division invisible both to those who accumulated power and to those who did not. The uncontested power that came from letter writing was, Konstantin Dierks provocatively argues, as important as racist violence to the rise of the white middle class in the British Atlantic world.

Cinematic Independence Noah Tsika,2022-02-22 *Cinematic Independence* traces the emergence, demise, and rebirth of big-screen film exhibition in Nigeria. Film companies flocked to Nigeria in the years following independence, beginning a long history of interventions by Hollywood and corporate America. The 1980s and 90s saw a shuttering of cinemas, which were almost entirely replaced by television and direct-to-video movies. After 1999, the exhibition sector was again revitalized with the construction of multiplexes. *Cinematic Independence* is about the periods that straddle this disappearing act: the decades bracketing independence in 1960, and the years after 1999. At stake in both instances is the postcolony's role in global debates about the future of the movie theater. That it was eventually resurrected in the flashy form of the multiplex is not simply an achievement of commercial real estate but also a testament to cinema's persistence--its capacity to stave off annihilation or, in this case, come back from the dead--
