The Royal Ontario Museum is situated among ivy-covered University of Toronto colleges and faculty buildings and a cluster of cultural institutions transformed by Toronto's architectural reawakening, early in the 21st century - the Royal Conservatory of Music, the Gardiner Museum, the Art Gallery of Ontario, the Ontario College of Art and Design, and the Four Seasons Centre for the Performing Arts. In this landscape, the Daniel Libeskind-designed Michael Lee-Chin Crystal rose to completion in 2007. The flagship of Renaissance ROM, an initiative of growth and renewal, it restores the logic of the Museum's original Beaux Arts master plan. The earliest ROM, now the Philosophers' Walk Building, opened in 1914, Additions followed in 1933, 1968, 1984, and 2007. In this textual and photographic study, Kelvin Browne analyses the evolution of ROM architecture and illuminates the buildings the tangible form and expression of the times and the bold visions of the Museum's founders and leaders.

Combine traditional techniques with modern media for more communicative renderings Digital Drawing for Landscape Architecture: Contemporary Techniques and Tools for Digital Representation in Site Design, Second Edition bridges the gap between traditional analog and new digital tools by applying timeless concepts of representation to enhance design work in digital media. The book explores specific techniques for creating landscape designs, including digitally rendered plans, perspectives, and diagrams, and the updated second edition offers expanded coverage of newer concepts and techniques. Readers will gain insight into the roles of

different drawings, with a clear emphasis on presenting a solid understanding of how diagram, plan, section, elevation, and perspective work together to present a comprehensive design approach. Digital rendering is faster, more efficient, and more flexible than traditional rendering techniques, but the design principles and elements involved are still grounded in hand-rendering techniques. Digital Drawing for Landscape Architecture exploits both modalities to help designers create more beautiful, accurate, and communicative drawings in a professional studio environment. This second edition contains revised information on plan rendering techniques, camera matching workflow, and color selection, along with brand new features, like: Time-based imagery and tools Workflow integration techniques Photoshop and Illustrator task automation Over 400 updated images, plus over 50 new examples of award-winning work The book takes a tutorial-based approach to digital rendering, allowing readers to start practicing immediately and get up to speed quickly. Communication is a vital, but often overlooked component of the design process, and designers rely upon their drawings to translate concepts from idea to plan. Digital Drawing for Landscape Architecture provides the guidance landscape designers need to create their most communicative renderings yet.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

In 1907 and again in 1908 Adolf Hitler applied for entry at the Academy of Fine Arts in Vienna. He was rejected on both occasions - a professor citing "unfitness for painting." It seems that this decision has been deemed by many historians as not a significant event. But what if Adolf Hitler had been accepted to the prestigious Academy of Fine Arts? Prior to this rejection, Adolf had sold some of his paintings so it would not have been unthinkable for him to have been accepted. Some have thought that perhaps he had been rejected by Jewish professors and so began his hatred of the Jews. Again, we have to think about what if Adolf Hitler had been accepted in the Academy of Fine Arts? Would that have changed his path and therefore changed the course of history? Would someone else have simply taken his place? "The Artist Formerly Known as Adolf Hitler," is a novel that looks at what the world may have looked like had he chose a different course in life. For many people, the name Adolf Hitler is the embodiment and true definition of evil. The purpose of this book is not to venerate Adolf Hitler. This story is meant to have the reader think in a different way about Adolf Hitler. Was Adolf Hitler predestined to be the architect of one of the most horrendous and evil events in modern history, or was it simply a series of bad choices and decisions and eventually choosing the wrong course in life? There is evidence that in Adolf Hitler's youth, he had many interactions with Jewish people and in some cases, quite beneficial ones. What were those events or interactions that shaped his opinions to become drastically different in later life? What if we had to walk a mile in Adolf Hitler's shoes? Many find such a thought preposterous. But what if we had his formative years? What if we had his physiology? What if we had the same path and obstacles to go down or around as he? Would we make the same decisions? While we may judge people like Hitler, Stalin and Mao as ruthless and evil dictators, had we been born to live their lives, would we have made different choices while in their shoes? To this point, are all human beings just subject to their predestined fate, or do we all the unfettered opportunity to make the correct or incorrect choices that lead us down a certain path? Another aspect of this novel looks at how the 20th century would have transpired, had Adolf Hitler chosen another path. Is it likely World War II would have occurred? If it hadn't what would the world look like? The war was directly responsible for the economic upturn for the United States and many countries, lifting them from the malaise of the Great Depression. What would have become of the Soviet Union? Would we have landed a man on the moon? The war brought about economic, political and technological changes to an extent that had never been experienced before in history. What would this have meant for the Jewish race as well as all people all around the world? The book also looks at what might have happened to some notable people affected directly or indirectly by Adolf Hitler had he lived his life differently. What might have happened to the political careers of Rosa Luxemburg and Karl Leibknect? What might have happened to Ann Frank? Who was Ernst Thallman and Marla de los Remedios Alicia Rodriga Varo y Uranga? What is amazing to think in terms of, is that how could the decisions of one man have made such a dramatic impact on the history and culture of the world that we live in today. "The Artist Formerly Known as Adolf Hitler" will make you rethink history and how our behavior can impact not only the lives of our small communities, but the entire world.
