For every American fighter pilot involved in the Vietnam War, the ultimate goal was to 'kill a MiG'. In eight years of conflict 43 Vietnamese Peoples Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews, and one single ace crew produced. Navy Phantom IIs scored the first kills of the Vietnam War, in April 1965, as well as scoring the last in January 1973. This volume charts the successes of the navy fighter crews as they encountered 'MiGs, Missiles and AAA' over the jungles of North Vietnam.

- Lower your risk of metabolic disorders, disease, and chronic weight gain
- Protect yourself against the estrogenic substances in the environment, products, water, and food
- Learn how certain foods and herbs can protect you!

Estrogenic chemicals—known for causing the near extinction of various living species—are found in some of the most common foods we eat. In this revolutionary diet book, Ori Hofmekler addresses the millions of overweight and obese individuals who have failed or are disappointed with other diets—those who suffer from yoyo dieting, weight gain rebounds, or accumulation of stubborn fat in the belly and other estrogen-sensitive areas. Focusing on our current over-exposure to estrogenic chemicals in the environment, foods, and water, *The Anti-Estrogenic Diet* provides a practical solution to fat gain, estrogen-related disorders (PMS, endometriosis, fibrocystic disease), and increased risk of common cancers in women and men (breast, ovarian, cervical, prostate). Allowing you to still enjoy

your favorite foods, the program is based on incorporating anti-estrogenic foods, spices, and herbs into your diet, while eliminating estrogenic foods and chemicals. Exposing dietary myths and fallacies, Hofmekler teaches readers that some foods commonly regarded as “healthy” may actually be harmful and vice versa. Special chapters dedicated to readers with different needs and health conditions, recipes, a question-and-answer section, and a list of scientific references are also included in this valuable resource.

The Grand Design, by eminent scientist Stephen Hawking, is the latest blockbusting contribution to the so-called New Atheist debate, and claims that the laws of physics themselves brought the Universe into being, rather than God. In this swift and forthright reply, John Lennox, Oxford mathematician and author of God's Undertaker, exposes the flaws in Hawking's logic. In lively, layman's terms, Lennox guides us through the key points in Hawking's arguments - with clear explanations of the latest scientific and philosophical methods and theories - and demonstrates that far from disproving a Creator

God, they make his existence seem all the more probable.
